Full-Year 2019 Guidance Revised

- Consolidated GAAP revenue increase of 0.0 to 0.5 percent
- Net earnings margin expansion of 210 to 350 bps
- Diluted EPS of \$3.15 to \$3.55

Use of Non-GAAP Financial Information

Generally Accepted Accounting Principles (GAAP) is the term used to refer to the standard framework of guidelines for financial accounting in the United States. GAAP includes the standards, conventions, and rules accountants follow in recording and summarizing transactions and in the preparation of financial statements. In addition to reporting financial results in accordance with GAAP, we have provided certain non-GAAP financial measures.

These non-GAAP measures include adjusted revenue, constant currency revenue, organic revenue increase/decrease, EBITDA, adjusted EBITDA, adjusted EBITDA margin, adjusted net earnings (including per share amounts), adjusted cash flows from operations and free cash flow. These non-GAAP measures may be used in this release and/or in the attached supplemental financial information.

We believe these non-GAAP measures help investors better understand the underlying fundamentals of our business. As further described below, the non-GAAP revenue and earnings measures presented eliminate items management believes are not indicative of FIS' operating performance. The constant currency and organic revenue increase/decrease measures adjust for the effects of exchange rate fluctuations, while organic revenue increase/decrease also adjusts for acquisitions and divestitures, giving investors further insight into our performance. Finally, the non-GAAP cash flow measures provide further information about the ability of our business to generate cash. For these reasons, management also uses these non-GAAP measures in its assessment and management of FIS' performance.

Adjusted revenue consists of revenue, increased to reverse the purchase accounting deferred revenue adjustment made upon the acquisition of SunGard. The deferred revenue adjustment represents revenue that would have been recognized in the normal course of business by SunGard under GAAP but was not recognized due to GAAP purchase accounting adjustments. The deferred revenue adjustment in purchase accounting was made entirely in the Corporate and Other segment; reported GAAP results for the IFS and GFS segments are not affected by this adjustment and, therefore, no adjusted revenue is presented for these segments.

Constant currency revenue represents (i) adjusted revenue, as defined above, in respect of the consolidated results and the Corporate and Other segment and (ii) reported revenue in respect of the IFS and GFS segments, in each case excluding the impact of fluctuations in foreign currency exchange rates in the current period.

Organic revenue increase/decrease is constant currency revenue, as defined above, for the current period compared to an adjusted revenue base for the prior period, which is further adjusted to add pre-acquisition revenue of acquired businesses for a portion of the prior year matching the portion of the current year for which the business was owned, and subtract pre-divestiture revenue for divested businesses for the portion of the prior year matching the portion of the current year for which the business was not owned, for any acquisitions or divestitures by FIS.

EBITDA reflects earnings from continuing operations before interest, taxes, depreciation and amortization.

Adjusted EBITDA is EBITDA, as defined above, excluding certain costs and other transactions which management deems non-operational in nature, the removal of which improves comparability of operating results across reporting periods. This measure is reported to the chief operating decision maker for purposes of making decisions about allocating resources to the segments and assessing their performance. For this reason, adjusted EBITDA, as it relates to our segments, is presented in conformity with Accounting Standards Codification 280, Segment Reporting, and is excluded from the definition of non-GAAP financial measures under the Securities and Exchange Commission's Regulation G and Item 10(e) of Regulation S-K.

Adjusted EBITDA margin reflects adjusted EBITDA divided by adjusted revenue.

Adjusted net earnings excludes the impact of certain costs and other transactions which management deems non-operational in nature, the removal of which improves comparability of operating results across reporting periods. It also excludes the impact of depreciation and amortization and equity method investment earnings (loss), both of which are recurring.

Adjusted net earnings per diluted share, or Adjusted EPS, reflects adjusted net earnings from continuing operations divided by weighted average diluted shares outstanding.

Adjusted cash flows from operations reflect net cash provided by operating activities adjusted for the net change in settlement assets and obligations and exclude certain transactions that are closely associated with non-operating activities or are otherwise non-operational in nature and not indicative of future operating cash flows.

Free cash flow reflects adjusted cash flows from operations less capital expenditures. Free cash flow does not represent our residual cash flow available for discretionary expenditures, since we have mandatory debt service requirements and other non-discretionary expenditures that are not deducted from the measure.

Any non-GAAP measures should be considered in context with the GAAP financial presentation and should not be considered in isolation or as a substitute for GAAP measures. Further, FIS' non-GAAP measures may be calculated differently from similarly titled measures of other companies. Reconciliations of these non-GAAP measures to related GAAP measures, including footnotes describing the specific adjustments, are provided in the attached schedules and in the Investor Relations section of the FIS website, www.fisglobal.com.

SUPPLEMENTAL GAAP TO NON-GAAP RECONCILIATIONS — UNAUDITED
(In millions, except per share amounts)

Exhibit E (continued)

Notes to Unaudited - Supplemental GAAP to Non-GAAP Reconciliations for the three months ended March 31, 2019 and 2018.

The adjustments are as follows:

This item represents the impact of depreciation and amortization expense. The Company has excluded the impact of depreciation of fixed assets and amortization of intangibles as such amounts can be significantly impacted by the timing and/or size of acquisitions. Although the Company excludes these amounts from its non-GAAP expenses, the Company believes that it is important for investors to understand that such tangible and intangible assets contribute to revenue generation. Depreciation and amortization of assets, including those that relate to past acquisitions, (1) will recur in future periods until such assets have been fully depreciated or amortized. Any future acquisitions may result in the depreciation and/or amortization of future assets. Within the depreciation and amortization item, \$195 million and \$169 million for the three months ended March 31, 2019 and 2018, respectively, consist of depreciation and amortization of non-purchase accounting assets.
