JACKSONVILLE, Fla.--(BUSINESS WIRE)--Apr. 29, 2025-- [FIS](#)<sup>®</sup> (NYSE: FIS), a global leader in financial technology, today announced the launch of its next-generation enterprise treasury platform, Treasury and Risk Manager – Quantum Cloud Edition. This cloud-native solution can support increased workloads, larger transaction volumes, and increased enterprise connectivity, scaling these capabilities to provide CFOs and corporate treasurers with greater visibility of risks; improved data-driven decision-making; and faster, more efficient money movement.

### Why Cloud Enablement Matters

This next-generation treasury and risk management solution is a testament to FIS' commitment to innovating across the money lifecycle, unlocking insights for more informed strategic decisions and giving customers a clearer understanding of risk exposure and capital allocation.

FIS is launching its enhanced solution as CFOs and corporate treasurers increasingly need to accelerate performance across their technology infrastructure. [According to EY](#), 65% of businesses have made strategic investments in the cloud, but only 32% are achieving their goals for the technology, a dynamic that reinforces the importance of true scalability for more effective cloud-based ecosystems.

By running on a public cloud, this solution not only features stronger data processing power and connectivity, but also can provide a new level of flexibility for quicker implementations, faster product upgrades and more seamless rollouts of new capabilities.

### Enabling Real-time Cash Management

In addition to leveraging the power of the public cloud, this version of FIS' treasury and risk management solution offers a new Liquidity Hub module for harnessing data from multiple sources – such as enterprise resource planning systems and bank APIs – to enable cash-management analysis in real time.

“CFOs and corporate treasury departments continually face a complicated landscape of shifting headwinds and tailwinds, including the fluctuations of capital costs, volatile markets and continuously expanding responsibilities,” said JP James, head of Treasury & Risk Management at FIS. “As part of our commitment to advancing how the world pays, banks and invests, we saw a need for more harmonious workflows that unlock how CFOs and treasurers process company data, understand their financial risks and build well-informed strategies. With this new offering, we’re providing innovative solutions that can help companies better navigate choppy waters and drive growth.”

Treasury and Risk Manager – Quantum Cloud Edition is the latest edition in FIS' award-winning Treasury & Risk Management solution suite that helps over 1,000 organizations unlock cash visibility and mitigate risk holistically. The classic version of Quantum will remain available for both new and existing users.
