Management's Discussion and Analysis of Financial Condition and Results of Operations, page 31

1. We note your response to prior comment 1 that your 2022 Global Sustainability Report disclosed Scope 1, 2, and 3 emissions "associated with" the Company's operations. We report reflects that your operations include greenhouse gas emissions purchase of electricity, chilled water and steam consumed across your portfolio, including your data centers and facilities. Please explain in greater detail how you determined that there was no increased demand for generation and transmission of energy from alternative energy sources and discuss the potential adverse consequences to your reputation resulting from your operations that produce greenhouse gas emissions.
