FORM 8-K

Current Report
Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Date of Report (date of earliest event reported):
May 9, 2018

Fidelity National Information Services, Inc.

(Exact name of Registrant as Specified in its Charter)

1-16427
(Commission File Number)

Georgia	37-1490331
(State or Other Jurisdiction of Incorporation or Organization)	(IRS Employer Identification Number)

601 Riverside Avenue
Jacksonville, Florida 32204
(Addresses of Principal Executive Offices)

(904) 438-6000
(Registrant's Telephone Number, Including Area Code)
(Former Name or Former Address, if Changed Since Last Report)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions:

o Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)

o Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)

o Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))

o Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).
Emerging growth company o

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. o

Item 8.01. Other Events

Fidelity National Information Services, Inc. (the "Company") is filing this Current Report on Form 8-K (this "Current Report") to recast certain prior period financial statements to reflect our retrospective application of the new revenue accounting standard ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)" ("ASU 2014-09").

ASU 2014-09 amends substantially all authoritative literature related to revenue recognition, including industry-specific requirements, and converges the guidance under this topic with that of the International Financial Reporting Standards. The Company has adopted ASU 2014-09 effective January 1, 2018 utilizing the full retrospective method with the application of certain practical expedients. The Company began to report comparative results under ASU 2014-09 in its Quarterly Report on Form 10-Q for the quarter ended March 31, 2018.

The Company is filing this Current Report to recast its consolidated financial statements for each of the years in the three-year period ended December 31, 2017 to reflect our retrospective application of ASU 2014-09 described above. The recasting of information presented in certain sections of the Company's 2017 Annual Report on Form 10-K (the "2017 Annual Report") is set forth in Exhibits 99.1, 99.2, 99.3, 99.4, 99.5 and 99.6 to this Form 8-K, which are incorporated herein by reference.

The information included in this Current Report, including the exhibits, is presented in connection with the reporting changes described above. This Current Report does not reflect events occurring after the Company filed the 2017 Annual Report and does not modify or update the disclosures therein in any way, other than to reflect our retrospective application of ASU 2014-09. For developments that have occurred subsequent to the filing of the 2017 Annual Report, refer to the Company's Quarterly Report on Form 10-Q for the quarter ended March 31, 2018, which was filed with the SEC on May 2, 2018, and other filings by the Company with the SEC.

Exhibit 23.1

Consent of Independent Registered Public Accounting Firm

The board of directors
Fidelity National Information Services, Inc.:

We consent to the incorporation by reference in the registration statements on Form S-8 (No. 333-157575, 333-158960, 333-162262, 333-190793, 333-206214, 333-206832, and 333-208266) and Form S-3 (No. 333-212372) of Fidelity National Information Services, Inc. and subsidiaries (the "Company") of our report dated May 9, 2018, with respect to the consolidated balance sheets of the Company as of December 31, 2017 and 2016, and the related consolidated statements of earnings, comprehensive earnings, equity, and cash flows for each of the years in the three-year period ended December 31, 2017, and the related notes (collectively, the "consolidated financial statements"), which report appears in the Current Report on Form 8-K dated May 9, 2018 of the Company.

Our report refers to the change in the Company's method of accounting for revenue in response to the adoption of Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers*.

/s/ KPMG LLP

Jacksonville, Florida
May 9, 2018

PART I

Item 1. *Business*

Note: The information contained in this Item has been updated to recast certain prior period financial information to reflect our retrospective application of the new revenue accounting standard ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)" ("ASU 2014-09"). The resulting changes are as follows:

- *The revenue data under the caption "Revenues by Segment" has been recast to reflect our retrospective application of ASU No. 2014-09.*
- *All references to footnotes are to the new audited consolidated financial statements included with this Form 8-K under "Exhibit 99.6".*

This Item has not been updated for any other changes since the filing of the 2017 Annual Report on Form 10-K (“2017 Annual Report”) with the U.S. Securities and Exchange Commission ("SEC") on February 22, 2018. For developments since the filing of the 2017 Annual Report, refer to our Quarterly Report on Form 10-Q for the quarter ended March 31, 2018, and other filings by the Company with the SEC.

Overview

FIS is a global leader in financial services technology with a focus on retail and institutional banking, payments, asset management and wealth and retirement, risk and compliance and outsourcing solutions. Through the depth and breadth of our solutions portfolio, global capabilities and domain expertise, FIS serves more than 20,000 clients in over 130 countries. Headquartered in Jacksonville, Florida, FIS employs more than 53,000 people worldwide and holds leadership positions in payment processing, financial software and banking solutions. Providing software, services and outsourcing of the technology that empowers the financial world, FIS is a Fortune 500 company and is a member of the Standard & Poor’s 500® Index.

FIS is incorporated under the laws of the State of Georgia as Fidelity National Information Services, Inc. and our stock is traded on the New York Stock Exchange under the trading symbol "FIS".

We have grown organically, as well as through acquisitions, which have contributed critical applications and services that complement or enhance our existing offerings, diversifying our revenues by customer, geography and service offering. These acquired offerings include integrated core banking and payment solutions, mobile banking solutions, item processing services, card issuer services, risk management solutions, electronic loan amendment applications and services, electronic funds transfer ("EFT") services, merchant acquiring services, and prepaid/gift card processing for community banks, credit unions, and other financial institutions. We sell many of these solutions to domestic companies, as well as to global organizations and companies domiciled both within and outside of North America, where our solutions are able to be deployed across multiple regions. Our strategic acquisitions have enabled us to broaden our available solution sets, scale our operations, expand and diversify our customer base and strengthen our competitive position.

On November 30, 2015, FIS acquired SunGard (the "SunGard acquisition"). The SunGard acquisition increased our existing portfolio of solutions to automate a wide range of complex business processes to financial services institutions and corporate and government treasury departments, adding solutions for trading, securities operations, administering investment portfolios, accounting for investment assets, and managing risk and compliance requirements. The combination of FIS and SunGard brought together complementary technology solutions and services to enable a broader technology platform serving our existing and future clients.

Financial Information About Operating Segments and Geographic Areas

In 2015, FIS finalized a reorganization and began reporting its financial performance based on three segments: Integrated Financial Solutions (“IFS”), Global Financial Solutions (“GFS”) and Corporate and Other. We recast all previous periods to conform to the new segment presentation. Following our November 30, 2015 acquisition of SunGard, the SunGard business was included within the GFS segment as its economic characteristics, international business model, and various other factors largely aligned with those of our GFS segment. As we further integrated the acquired SunGard businesses through March 31, 2016, we reclassified certain SunGard businesses (corporate liquidity and wealth and retirement) that are oriented more to the retail banking and payments activities of IFS into that segment. Certain other businesses from both SunGard (the public sector

and education businesses, which were divested in February 2017), and legacy FIS (global commercial services and retail check processing) were reclassified to the Corporate and Other segment, as were SunGard administrative expenses. Prior periods were reclassified to conform to the current segment presentation. For information about our revenues and assets by geographic area see Notes 2(n), 4 and 21 of the Notes to Consolidated Financial Statements.

Competitive Strengths

We believe our competitive strengths include the following:

- *Brand* - FIS has built a global brand known for innovation and thought leadership in the financial services sector.

- *Global Distribution and Scale* - Our worldwide presence, array of solution offerings, customer breadth, established infrastructure and employee depth enable us to leverage our client relationships and global scale to drive revenue growth and operating efficiency. We are a global leader in the markets we serve, supported by a large, knowledgeable talent pool of employees around the world.

- *Extensive Domain Expertise and Extended Portfolio Depth* - FIS has a significant number and wide range of high-quality software applications and service offerings that have been developed over many years with substantial input from our customers. Our broad portfolio of solutions includes a wide range of flexible service arrangements for the deployment and support of our software, from managed processing arrangements, either at the customer's site or at an FIS location, to traditional license and maintenance fee approaches. This broad solution set allows us to bundle tailored or integrated services to compete effectively. In addition, FIS is able to use the modular nature of our software applications and our ability to integrate many of our services with the services of others to provide customized solutions that respond to individualized customer needs. We understand the needs of our customers and have developed and acquired innovative solutions that can give them a competitive advantage and reduce their operating costs.

- *Excellent Relationship with Customers* - A significant percentage of FIS’ business with our customers relates to applications and services provided under multi-year, recurring contracts. The nature of these relationships allows us to develop close partnerships with these customers, resulting in high client retention rates. As the breadth of FIS’ service offerings has expanded, we have found that our access to key customer personnel is increasing, presenting greater opportunities for cross-selling and providing integrated, total solutions to our customers.

Strategy

Our mission is to deliver superior solutions and services to our clients, which will result in sustained revenue and earnings growth for our shareholders. Our strategy to achieve this goal has been and continues to be built on the following pillars:

- *Build, Buy, or Partner to Add Solutions to Cross-Sell* - We continue to invest in growth through internal software development, as well as through acquisitions and equity investments that complement and extend our existing solutions and capabilities, providing us with additional solutions to cross-sell. We also partner from time to time with other entities to provide comprehensive offerings to our prospects and customers. By investing in solution innovation and integration, we continue to expand our value proposition to our prospects and clients.

- *Support Our Clients Through Innovation* - Changing market dynamics, particularly in the areas of information security, regulation and innovation, are transforming the way our clients operate, which is driving incremental demand for our integrated solutions and services around our intellectual property. As prospects and customers evaluate technology, business process changes and vendor risks, our depth of services capabilities enables us to become involved earlier in their planning and design process and assist them as they manage through these changes.

- *Continually Improve to Drive Margin Expansion* - We strive to optimize our performance through investments in infrastructure enhancements, our workforce and other measures that are designed to drive margin expansion.

- *Expand Client Relationships* - The overall market we serve continues to gravitate beyond single-application purchases to multi-solution partnerships. As the market dynamics shift, we expect our clients and prospects to rely more on our multidimensional service offerings. Our leveraged solutions and processing expertise can produce meaningful value and cost savings for our clients through more efficient operating processes, improved service quality and convenience for our clients' customers.

- *Build Global Diversification* - We continue to deploy resources in global markets where we expect to achieve meaningful scale.

Revenues by Segment

The table below summarizes our revenues by reporting segment (in millions):

	2017	2016	2015
IFS	$ 4,260	$ 4,178	$ 3,485
GFS	4,050	4,183	2,349
Corporate and Other	358	470	426
Total Consolidated Revenues	$ 8,668	$ 8,831	$ 6,260

Integrated Financial Solutions ("IFS")

The IFS segment is focused primarily on serving North American clients for transaction and account processing, payment solutions, channel solutions, digital channels, fraud, risk management and compliance solutions, lending and wealth and retirement solutions, and corporate liquidity, capitalizing on the continuing trend to outsource these solutions. Clients in this segment include regional and community banks, credit unions and commercial lenders, as well as government institutions, merchants and other commercial organizations. These markets are primarily served through integrated solutions and characterized by multi-year processing contracts that generate highly recurring revenues. The predictable nature of cash flows generated from this segment provides opportunities for further investments in innovation, integration, information and security, and compliance in a cost-effective manner.

Our solutions in this segment include:

- *Core Processing and Ancillary Applications.* Our core processing software applications are designed to run banking processes for our financial institution clients, including deposit and lending systems, customer management, and other central management systems, serving as the system of record for processed activity. Our diverse selection of market-focused core systems enables FIS to compete effectively in a wide range of markets. We also offer a number of services that are ancillary to the primary applications listed above, including branch automation, back-office support systems and compliance support.

- *Digital Solutions, Including Internet, Mobile and eBanking.* Our comprehensive suite of retail delivery applications enables financial institutions to integrate and streamline customer-facing operations and back-office processes, thereby improving customer interaction across all channels (e.g., branch offices, Internet, ATM, Mobile, call centers). FIS' focus on consumer access has driven significant market innovation in this area, with multi-channel and multi-host solutions and a strategy that provides tight integration of services and a seamless customer experience. FIS is a leader in mobile banking solutions and electronic banking enabling clients to manage banking and payments through the Internet, mobile devices, accounting software and telephone. Our corporate electronic banking solutions provide commercial treasury capabilities including cash management services and multi-bank collection and disbursement services that address the specialized needs of corporate clients. FIS systems provide full accounting and reconciliation for such transactions, serving also as the system of record.

- *Fraud, Risk Management and Compliance Solutions.* Our decision solutions offer a spectrum of options that cover the account lifecycle from helping to identify qualified account applicants to managing existing customer accounts and fraud. Our applications include know-your-customer, new account decisioning and opening, account and transaction management, fraud management and collections. Our risk management services use our proprietary risk management models and data sources to assist in detecting fraud and assessing the risk of opening a new account. Our systems use a combination of advanced authentication procedures, predictive analytics, artificial intelligence modeling and proprietary and shared databases to assess and detect fraud risk for deposit transactions for financial institutions.

- *Electronic Funds Transfer and Network Services.* Our electronic funds transfer and debit card processing businesses offer settlement and card management solutions for financial institution card issuers. We provide traditional ATM-based debit network access through NYCE and emerging real-time payment alternatives. NYCE connects millions of cards and point-of-sale locations nationwide, providing consumers with secure, real-time access to their money. Also

through NYCE, clients such as financial institutions, retailers and independent ATM operators can capitalize on the efficiency, consumer convenience and security of electronic real-time payments, real-time account-to-account transfers, and strategic alliances such as surcharge-free ATM network arrangements.

- *Card and Retail Solutions.* Approximately 5,600 financial institutions use a combination of our technology and/or services to issue VISA®, MasterCard® or American Express® branded credit and debit cards or other electronic payment cards for use by both consumer and business accounts. Card transactions continue to increase as a percentage of total point-of-sale payments, which fuels continuing demand for card-related services. We offer Europay, MasterCard and VISA ("EMV") integrated circuit cards, often referred to as smart cards or chip cards, as well as a variety of stored-value card types and loyalty/reward programs. Our integrated services range from card production and activation to processing to an extensive range of fraud management services and value-added loyalty programs designed to increase card usage and fee-based revenues for financial institutions and merchants. The majority of our programs are full service, including most of the operations and support necessary for an issuer to operate a credit card program. We do not make credit decisions for our card issuing clients. We are also a leading provider of prepaid card services, which include gift cards and reloadable cards, with end-to-end solutions for development, processing and administration of stored-value programs. Our closed loop gift card solutions and loyalty programs provide merchants compelling solutions to drive consumer loyalty. In addition, our merchant processing service provides a merchant or financial institution a comprehensive solution to manage its merchant card activities, including point-of-sale equipment, transaction authorization, draft capture, settlement, charge-back processing and reporting.

- *Corporate Liquidity.* Our corporate liquidity solutions help chief financial officers and treasurers manage working capital by increasing visibility to cash, reducing risk and improving communication and response time between a company’s buyers, suppliers, banks and other stakeholders. Our end-to-end collaborative financial management framework helps bring together receivables, treasury and payments for a single view of cash and risk, which helps our clients optimize business processes for enhanced liquidity management.

- *Wealth and Retirement.* We provide wealth and retirement solutions that help banks, trust companies, brokerage firms, insurance firms, retirement plan professionals, benefit administrators and independent advisors acquire, service and grow their client relationships. We provide solutions for client acquisition, transaction management, trust accounting and recordkeeping that can be deployed stand-alone or as part of an integrated wealth or retirement platform, or on an outsourced basis.

- *Item Processing and Output Services.* Our item processing services furnish financial institutions with the technology needed to capture data from checks, transaction tickets and other items; image and sort items; process exceptions through keying; and perform balancing, archiving and the production of statements. Our item processing services are performed at one of our multiple item processing centers located throughout the U.S. or on-site at client locations. Our extensive solutions include distributed (i.e., non-centralized) data capture, mobile deposit capture, check and remittance processing, fraud detection, and document and report management. Clients encompass banks and corporations of all sizes, from de novo banks to the largest financial institutions and corporations. We offer a number of output services that are ancillary to the primary solutions we provide, including print and mail capabilities, document composition software and solutions, and card personalization fulfillment services. Our print and mail services offer complete computer output solutions for the creation, management and delivery of print and fulfillment needs. We provide our card personalization fulfillment services for branded credit cards and branded and non-branded debit and prepaid cards.

- *Government Payments Solutions.* We provide comprehensive, customized electronic service applications for government agencies, including Internal Revenue Service (IRS) payment services and government food stamp and nutrition programs known as Supplemental Nutrition Assistance Program (“SNAP”) and Women, Infants and Children ("WIC"). We also facilitate the collection of state income taxes, real estate taxes, utility bills, vehicle registration fees, driver’s license renewal fees, parking tickets, traffic citations, tuition payments, court fees and fines, hunting and fishing license fees, as well as various business licenses.

- *ePayment Solutions.* We provide reliable and scalable bill publishing and bill consolidation technology for our clients, generating and facilitating the payment of millions of monthly bills, servicing both billers and financial institution clients. Online bill payment functionality includes credit and debit card-based expedited payments. Our end-to-end presentment and payment solution provides an all-in-one solution to meet billers’ needs for the distribution and collection of bills and other customer documents. FIS also provides Automated Clearing House ("ACH") processing.

Global Financial Solutions ("GFS")

The GFS segment is focused on serving the largest global financial institutions and/or international financial institutions with a broad array of capital markets (including asset managers, buy- and sell-side securities and trading firms), asset management and insurance solutions, as well as banking and payments solutions.

GFS clients include the largest global financial institutions, including those headquartered in the United States, as well as international financial institutions we serve as clients in more than 130 countries around the world, and asset managers, buy-and sell-side securities and trading firms, insurers and private equity firms. These institutions face unique business and regulatory challenges and account for the majority of financial institution information technology spend globally. The purchasing patterns of GFS clients vary from those of IFS clients who typically purchase solutions on an outsourced basis. GFS clients purchase our solutions and services in various ways including licensing and managing technology “in-house”, using consulting and third-party service providers as well as fully outsourced end-to-end solutions. We have long-established relationships with many of these financial institutions that generate significant recurring revenue. This segment also includes the Company's consolidated Brazilian Venture (see Note 19 of the Notes to Consolidated Financial Statements). Our solutions in this segment include:

- *Securities Processing and Finance.* Our offerings help financial institutions to increase the efficiency, transparency and control of their back-office trading operations, post-trade processing and settlement including derivative solutions, risk management, securities lending, syndicated lending, tax processing, and regulatory compliance. The breadth of our offerings also facilitates advanced business intelligence and market data distribution based on our extensive market data access.

- *Global Trading*. Our trading solutions provide trade execution, data and network solutions to financial institutions, corporations and municipalities in North America, Europe and other global markets across a variety of asset classes. Our trade execution and network solutions help both buy- and sell-side firms improve execution quality, decrease overall execution costs and address today’s trade connectivity challenges.

- *Asset Management and Insurance*. We offer solutions that help institutional investors, insurance companies, hedge funds, private equity firms, fund administrators and securities transfer agents improve both investment decision-making and operational efficiency, while managing risk and increasing transparency. Our asset management solutions support every stage of the investment process, from research and portfolio management, to valuation, risk management, compliance, investment accounting, transfer agency and client reporting. Our insurance solutions help support front-office and back-office functions including actuarial risk calculations, policy administration and financial and investment accounting and reporting for a variety of insurance lines, including life and health, annuities and pensions, property and casualty, reinsurance, and asset management.

- *Retail Banking and Payments Services.* Our GFS operations leverage existing applications and provide services for the specific business needs of our customers in targeted global markets. Services are delivered from our operation centers around the world. Our banking solution services include fully outsourced core bank processing arrangements, application management, software licensing and maintenance and facilities management. Our payment solution services include fully outsourced card-issuer services and customer support, payment processing (including real-time payments) and switching services, prepaid and debit card processing, software licensing and maintenance, outsourced ATM management and retail point-of-sale payment services.

- *Strategic Consulting Services.* We completed the sale of a majority stake in Capco, which comprised our Strategic Consulting Services, on July 31, 2017 (see Note 17 of the Notes to Consolidated Financial Statements).

Corporate and Other Segment

The Corporate and Other segment consists of corporate overhead expense, certain leveraged functions and miscellaneous expenses that are not included in the operating segments, as well as certain non-strategic businesses. The overhead and leveraged costs relate to marketing, corporate finance and accounting, human resources, legal, and amortization of acquisition-related intangibles and other costs that are not considered when management evaluates revenue generating segment performance, such as acquisition integration and severance costs. The business solutions in this segment include:

- *Global Commercial Services.* Our global commercial services include solutions, both onshore and offshore, designed to meet the technology challenges facing clients, large or small, including financial institutions and non-financial institutions. These solutions range in scope from operations support for a single application to full management of

information technology infrastructures. We also provide outsourcing teams to manage costs, improve operational efficiency and transform our clients' back-office and customer service processes.

- *Retail Check Processing.* Our check authorization business provides check risk management and related services to businesses accepting or cashing checks. Our services assess the likelihood (and often provide a guarantee) that a check will clear. Our check authorization system uses artificial intelligence modeling and other state-of-the-art technology to deliver accuracy, convenience and simplicity to retailers.

- *Public Sector and Education.* We completed the sale of our Public Sector and Education business to portfolio companies of Vista Equity Partners on February 1, 2017 (see Note 17 of the Notes to Consolidated Financial Statements).

Sales and Marketing

We have experienced sales personnel with expertise in particular services and markets, as well as in the needs of particular types of customers. We believe that focusing our expertise in specific markets (e.g., global financial institutions, North American financial institutions) and tailoring integrated solution sets of particular value to participants in those markets enables us to leverage opportunities to cross-sell and up-sell. We continue to realign our sales teams to better match our solution expertise with the market opportunity and customer demand. We target the majority of our potential customers via direct and/or indirect field sales, as well as inbound and outbound lead generation and telesales efforts.

Our global marketing strategy is to develop and lead the execution of the IFS and GFS strategic marketing plans in support of their revenue and profitability goals and the FIS brand. Key components include thought leadership, integrated programs with consistent message development, internal and external communications, client conference content management, web content creation and management, trade shows, demand generation campaigns and collateral development and management.

Patents, Copyrights, Trademarks and Other Intellectual Property

The Company owns intellectual property, including trademarks, trade names, copyrights and patents, which we believe is important to our future success. Although we acquired the trademarks and trade names used by SunGard, we note that following the split-off of the Availability Services (“AS”) business by SunGard in 2014, AS has the right to use the Sungard Availability Services name, which does not include the right to use the SunGard name or its derivatives.

We rely on a combination of contractual restrictions, internal security practices, patents, copyrights and applicable law to establish and protect our software, technology and expertise worldwide. We rely on trademark law to protect our rights in our brands. We intend to continue taking appropriate measures to protect our intellectual property rights, including by legal action when necessary and appropriate. In general, we own the proprietary rights necessary for the conduct of our business, although we do license certain items from third parties under arms-length agreements for varying terms, including some "open source" licenses.

Competition

The markets for our solutions and services are intensely competitive. Depending on the business line, in both our IFS and GFS segments, our primary competitors include internal technology departments within financial institutions, retailers, data processing or software development departments of large companies or large computer manufacturers, companies that deliver software and integrated services to the financial services industry, third-party payment processors, securities exchanges, asset managers, card associations, clearing networks or associations, trust companies, independent computer services firms, companies that develop and deploy software applications, companies owned by global banks selling new competitive solutions, companies that provide customized development, implementation and support services, disruptive technology innovators, and business process outsourcing companies. Many of these companies compete with us across multiple solutions, markets and geographies. Some of these competitors possess greater financial, sales and marketing resources than we do. Competitive factors impacting the success of our services across our segments include the quality of the technology-based application or service, application features and functions, ease of delivery and integration, the ability to maintain, enhance and support the applications or services, price and overall relationship management. We believe we compete favorably in each of these categories. In addition, we believe our financial services industry expertise, combined with our ability to offer multiple applications, services and integrated solutions to individual clients, enhances our competitiveness against companies with more limited offerings.

Research and Development

Our research and development activities have related primarily to the design and development of processing systems and related software applications and risk management platforms. We expect to continue our practice of investing an appropriate level of resources to maintain, enhance and extend the functionality of our proprietary systems and existing software applications, to develop new and innovative software applications and systems to address emerging technology trends in response to the needs of our clients and to enhance the capabilities of our outsourcing infrastructure. In addition, we intend to offer services compatible with new and emerging delivery channels.

As part of our research and development process, we evaluate current and emerging technology for compatibility with our existing and future software platforms. To this end, we engage with various hardware and software vendors in evaluation of various infrastructure components. Where appropriate, we use third-party technology components in the development of our software applications and service offerings. In the case of nearly all of our third-party software, enterprise license agreements exist for the third-party component and either alternative suppliers exist or transfer rights exist to ensure the continuity of supply. As a result, we are not materially dependent upon any third-party technology components. Third-party software may be used for highly specialized business functions, which we may not be able to develop internally within time and budget constraints. Additionally, third-party software may be used for commodity-type functions within a technology platform environment. We work with our clients to determine the appropriate timing and approach to introducing technology or infrastructure changes to our applications and services. During the years ended December 31, 2017, 2016 and 2015 approximately 2% to 5% of revenues were non-capitalizable research and development expense.

Government Regulation

Our services are subject to a broad range of complex federal, state, and foreign regulation and requirements, as well as requirements under the rules of self-regulatory organizations, including federal truth-in-lending and truth-in-savings rules, Regulation AA (Unfair or Deceptive Acts or Practices), data protection and privacy laws, usury laws, laws governing state trust charters, the Equal Credit Opportunity Act, the Electronic Funds Transfer Act, the Fair Credit Reporting Act, the Fair Debt Collection Practices Act, the Bank Secrecy Act, the USA Patriot Act, the Internal Revenue Code, the Employee Retirement Income Security Act, the Health Insurance Portability and Accountability Act, the Community Reinvestment Act and the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act"), the Securities Exchange Act of 1934 (the "1934 Act"), the Investment Advisors Act of 1940 (the "1940 Act"), the U.S. Foreign Corrupt Practices Act and UK Bribery Act, and the rules and regulations of the Financial Industry Regulatory Authority (“FINRA”), the Securities and Exchange Commission (“SEC”) and the Financial Conduct Authority in the U.K. (“FCA”). The compliance of our services and applications with these and other applicable laws and regulations depends on a variety of factors, including the manner in which our clients use them. In some cases, we are directly subject to regulatory oversight and examination. In other cases, our clients are contractually responsible for determining what is required of them under applicable laws and regulations so that we can assist them in their compliance efforts. In either case, the failure of our services to comply with applicable laws and regulations may result in restrictions on our ability to provide those services and/or the imposition of civil fines and/or criminal penalties. The principal areas of regulation impacting our business are:

- *Oversight by Banking Regulators.* As a provider of electronic data processing and back-office services to financial institutions, FIS is subject to regulatory oversight and examination by the Federal Banking Agencies ("FBA"), including the Federal Deposit Insurance Corporation ("FDIC"), the Office of the Comptroller of the Currency ("OCC"), the Board of Governors of the Federal Reserve System ("FRB"), the National Credit Union Administration ("NCUA") and the Consumer Financial Protection Bureau ("CFPB") as part of the Multi-Regional Data Processing Servicer Program ("MDPS"). The MDPS program includes technology suppliers that provide mission critical applications for a large number of financial institutions that are regulated by multiple regulatory agencies. Periodic information technology examination assessments are performed using FBA Interagency guidelines to identify potential risks that could adversely affect serviced financial institutions, determine compliance with applicable laws and regulations that affect the services provided to financial institutions and ensure the services we provide to financial institutions do not create systemic risk to the banking system or impact the safe and sound operation of the financial institutions we process. In addition, independent auditors annually review several of our operations to provide reports on internal controls for our clients’ auditors and regulators. We are also subject to review and examination by state and international regulatory authorities under state and foreign laws and rules that regulate many of the same activities that are described above, including electronic data processing, payments and back-office services for financial institutions and the use of consumer information.

  Our U.S.-based wealth and retirement business holds charters in the states of Georgia and Delaware, which makes us subject to the regulatory compliance requirements of the Georgia Department of Banking and Finance and the State of

Delaware Office of the State Bank Commissioner. As a result, we are also authorized to provide trust services in various additional states subject to additional applicable state regulations.

- *Oversight by Securities Regulators.* Our subsidiary that conducts our broker-dealer business in the U.S. is registered as a broker-dealer with the SEC, is a member of FINRA, and is registered as a broker-dealer in numerous states. Our broker-dealer is subject to regulation and oversight by the SEC. In addition, FINRA, a self-regulatory organization that is subject to oversight by the SEC, adopts and enforces rules governing the conduct, and examines the activities, of its member firms, including our broker-dealer. State securities regulators also have regulatory or oversight authority over our broker-dealer. Broker-dealers are subject to regulations that cover all aspects of the securities business, including sales methods, trade practices among broker-dealers, public and private securities offerings, use and safekeeping of customers' funds and securities, capital structure, record keeping, the financing of customers' purchases and the conduct and qualifications of directors, officers and employees. In particular, as a registered broker-dealer and member of a self-regulatory organization, we are subject to the SEC's uniform net capital rule, Rule 15c3-1. Rule 15c3-1 specifies the minimum level of net capital a broker-dealer must maintain and also requires that a significant part of a broker-dealer's assets be kept in relatively liquid form. The SEC and various self-regulatory organizations impose rules that require notification when net capital falls below certain predefined criteria, limit the ratio of subordinated debt to equity in the regulatory capital composition of a broker-dealer and constrain the ability of a broker-dealer to expand its business under certain circumstances. Additionally, the SEC's uniform net capital rule imposes certain requirements that may have the effect of prohibiting a broker-dealer from distributing or withdrawing capital and requiring prior notice to the SEC for certain withdrawals of capital.

  Our subsidiaries also include an SEC-registered investment adviser and SEC-registered transfer agent. Our registered investment adviser is subject to the fiduciary and other obligations imposed on investment advisors under the 1940 Act, and the rules and regulations promulgated thereunder, as well as various state securities laws. Our registered transfer agent is subject to the 1934 Act and the rules and regulations promulgated thereunder. These laws and regulations generally grant the SEC and other supervisory bodies broad administrative powers to address non-compliance with regulatory requirements. Sanctions that may be imposed for non-compliance with these requirements include the suspension of individual employees, limitations on engaging in certain activities for specified periods of time or for specified types of clients, the revocation of registrations, other censures and significant fines.

  Subsidiaries engaged in activities outside the U.S. are regulated by various government agencies in the particular jurisdiction where they are chartered, incorporated and/or conduct their business activity. For example, pursuant to the U.K. Financial Services and Markets Act 2000 ("FSMA"), certain of our subsidiaries are subject to regulations promulgated and administered by the FCA. The FSMA and rules promulgated thereunder govern all aspects of the U.K. investment business, including sales, research and trading practices, provision of investment advice, use and safekeeping of client funds and securities, regulatory capital, record keeping, margin practices and procedures, approval standards for individuals, anti-money laundering, periodic reporting and settlement procedures.

- *Privacy and Data Protection.* The Company is subject to a number of privacy and data protection laws, regulations and directives globally (referred to collectively as "Privacy Laws"), many of which place restrictions on the Company's ability to efficiently transfer, access and use personal data across its business. The legislative and regulatory landscape for privacy and data protection continues to evolve.

  Our financial institution clients operating in the United States are required to comply with privacy regulations imposed under the Gramm-Leach-Bliley Act (referred to as "GLBA"). GLBA places restrictions on the use of non-public personal information. All financial institutions must disclose detailed privacy policies to their customers and offer them the opportunity to direct the financial institution not to share information with third parties. The regulations under GLBA, however, permit financial institutions to share information with non-affiliated parties who perform services for the financial institutions. As a provider of services to financial institutions, we are required to comply with the privacy laws and are bound by the same limitations on disclosure of the information received from our clients as apply to the financial institutions themselves. A determination that there have been violations of privacy laws could expose us to significant damage awards, fines and other penalties that could, individually or in the aggregate, materially harm our business and reputation.

  In October 2015, the European Court of Justice ruled that the U.S.-EU Safe Harbor framework clauses, a compliance method by which we relied in portions of our business to transfer personal data regarding citizens of the EU to the U.S., could no longer be relied upon. The U.S. and EU authorities have agreed in principle on a replacement for Safe Harbor known as "Privacy Shield". The Privacy Shield approach has not been fully endorsed by all relevant parties and there have already been challenges to this initiative in the European justice system. While we have certified

certain lines of business under the Privacy Shield, we have chosen to adopt EU model clauses published by the European Commission as the primary basis for the export of data from the EU to the U.S.

The EU has recently adopted a comprehensive overhaul of its data protection regime from the current national legislative approach to a single European Economic Area Privacy Regulation, the General Data Protection Regulation ("GDPR"), which comes into effect on May 26, 2018. The proposed EU data protection regime imposes a strict data compliance regime and extends the scope of the EU data protection law to all foreign companies processing data of EU residents. Although the GDPR will apply across the EU without a need for local implementing legislation, as has been the case under the current data protection regime, local data protection authorities ("DPAs") will still have the ability to interpret the GDPR, which has the potential to create inconsistencies on a country-by-country basis. The Company has adopted a comprehensive global privacy program to assess and manage these evolving risks, including contract terms to comply with this new law.

- *Money Transfer.* Elements of our cash access and money transmission businesses are registered as a Money Services Business and are subject to the USA Patriot Act and reporting requirements of the Bank Secrecy Act and U.S. Treasury Regulations. These businesses may also be subject to certain state, local and licensing requirements. The Financial Crimes Enforcement Network, state attorneys general, and other agencies have enforcement responsibility over laws relating to money laundering, currency transmission, and licensing. In applicable states, we have obtained money transmitter licenses. However, changes to state money transmission laws and regulations, including changing interpretations and the implementation of new or varying regulatory requirements, may result in the need for additional money transmitter licenses or for the requirement that we change the way in which we deliver certain services.

  We are also subject to certain economic and trade sanctions programs that are administered by the U.S. Treasury's Office of Foreign Assets Control (referred to as "OFAC"), which prohibit or restrict transactions to or from or dealings with specified countries, their governments, and in certain circumstances, their nationals, and with individuals and entities that are specially-designated nationals of those countries, narcotics traffickers, and terrorists or terrorist organizations. Similar anti-money laundering laws apply to movements of currency and payments through electronic transactions and to dealings with persons specified in lists maintained by the country equivalents to OFAC in several other countries. We have implemented policies, procedures, and internal controls that are designed to comply with the regulations and economic sanctions programs administered by OFAC. Outside the U.S., applicable laws, rules and regulations similarly require designated types of financial institutions to implement anti-money laundering programs. We have implemented policies, procedures and internal controls that are designed to comply with all applicable anti-money laundering laws and regulations.

- *Consumer Reporting and Protection.* Our retail check authorization services (Certegy Check Services) and account opening services, including credit scoring analysis (ChexSystems), maintain databases of consumer information and, as a consequence, are subject to the Federal Fair Credit Reporting Act and similar state laws. Among other things, the Federal Fair Credit Reporting Act imposes requirements on us concerning data accuracy, and provides that consumers have the right to know the contents of their files, to dispute their accuracy, and to require verification or removal of disputed information. The Federal Trade Commission (FTC), as well as state attorneys general and other agencies, have enforcement responsibility over the collection laws, as well as the various credit reporting laws. In furtherance of our objectives of data accuracy, fair treatment of consumers, protection of consumers' personal information, and compliance with these laws, we strive to, and have made considerable investment to, maintain a high level of security for our computer systems in which consumer data resides, and we maintain consumer relations call centers to facilitate efficient handling of consumer requests for information and handling disputes. We also are focused on ensuring our operating environments safeguard and protect consumer's personal information in compliance with these laws.

  Our consumer reporting and facing businesses are subject to CFPB bulletin 2013-7 (an update to the former Regulation A- Unfair Deceptive Acts or Practices), which states the definition of Unfair, Deceptive or Abusive Acts or Practices (UDAAP). This specific bulletin states that UDAAPs can cause significant financial injury to consumers, erode consumer confidence, and undermine fair competition in the financial marketplace. Original creditors and other covered persons and service providers under the Dodd-Frank Act involved in collecting debt related to any consumer financial product or service are subject to the prohibition against UDAAPs in the Dodd-Frank Act.

- *Debt Collection.* Our collection services supporting our check, card and payment environments are subject to the Federal Fair Debt Collection Practices Act and various state collection laws and licensing requirements. The Federal Trade Commission, as well as state attorneys general and other agencies, have enforcement responsibility over the collection laws, as well as the various credit reporting laws.

- *Anti-Corruption*. FIS is subject to applicable anti-corruption laws, such as the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act, in the jurisdictions in which it operates. Anti-corruption laws generally prohibit offering, promising, giving, or authorizing others to give anything of value, either directly or indirectly, to a government official or private party in order to influence official action or otherwise gain an unfair business advantage, such as to obtain or retain business. FIS has implemented policies, procedures, and internal controls that are designed to comply with such laws, rules and regulations.

The foregoing list of laws and regulations to which our Company is subject is not exhaustive, and the regulatory framework governing our operations changes continuously. Enactment of new laws and regulations may increasingly affect the operations of our business, directly and indirectly, which could result in substantial regulatory compliance costs, litigation expense, adverse publicity, and/or loss of revenue.

Information Security

Globally, attacks on information technology systems continue to grow in frequency, complexity and sophistication. Such attacks have become a point of focus for individuals, businesses and governmental entities. The objectives of these attacks include, among other things, gaining unauthorized access to systems to facilitate financial fraud, disrupt operations, cause denial of service events, corrupt data, and steal non-public, sensitive information. As part of our business, we electronically receive, process, store and transmit a wide range of confidential information, including sensitive customer information and personal consumer data. We also operate payment, cash access and prepaid card systems.

FIS remains focused on making strategic investments in information security to protect our clients and our information systems. This includes both capital expenditures and operating expenses on hardware, software, personnel and consulting services. We also participate in industry and governmental initiatives to improve information security for our clients.

For more information on Information Security, see "Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*."

Employees

As of December 31, 2017, we had more than 53,000 employees, including approximately 34,000 employees principally employed outside of the U.S. None of our U.S. workforce currently is unionized. Approximately 12,000 of our employees, primarily in Brazil, Germany, Tunisia, France, Italy, and Chile, are represented by labor unions or works councils. We consider our relations with our employees to be good.

Available Information

Our internet website address is www.fisglobal.com. We make our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, and Current Reports on Form 8-K, and any amendments to those reports, available, free of charge, on that website as soon as reasonably practicable after we file or furnish them to the Securities and Exchange Commission. Our Corporate Governance Policy and Code of Business Conduct and Ethics are also available on our website and are available in print, free of charge, to any shareholder who mails a request to the Corporate Secretary, Fidelity National Information Services, Inc., 601 Riverside Avenue, Jacksonville, FL 32204 USA. Other corporate governance-related documents can be found at our website as well. However, the information found on our website is not a part of this or any other report.

PART I

Item 1A. *Risk Factors*

Note: The information contained in this Item has been updated to recast certain prior period financial information to reflect our retrospective application of the new revenue accounting standard ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)" ("ASU 2014-09"). The resulting changes are as follows:

- *The international operations revenue percentage for 2017 under the risk factor "Our business is subject to the risks of international operations, including movements in foreign currency exchange rates" has been recast to reflect our retrospective application of ASU No. 2014-09.*
- *Percent of total assets for goodwill, other indefinite-lived intangible assets and intangible assets with finite useful lives, as well as the amount of intangible assets with finite useful lives as of December 31, 2017 under the risk factor "We have substantial investments in recorded goodwill and other intangible assets as a result of prior acquisitions, and a severe or extended economic downturn could cause these investments to become impaired, requiring write-downs that would reduce our operating income" have been recast to reflect our retrospective application of ASU No. 2014-09.*
- *All references to footnotes are to the new audited consolidated financial statements included with this Form 8-K under "Exhibit 99.6".*

This Item has not been updated for any other changes since the filing of the 2017 Annual Report on Form 10-K ("2017 Annual Report") with the U.S. Securities and Exchange Commission ("SEC") on February 22, 2018. For developments since the filing of the 2017 Annual Report, refer to our Quarterly Report on Form 10-Q for the quarter ended March 31, 2018, and other filings by the Company with the SEC.

In addition to the normal risks of business, we are subject to significant risks and uncertainties, including those listed below and others described elsewhere in this Annual Report on Form 10-K. Any of the risks described herein could result in a significant adverse effect on our results of operations and financial condition.

Risks Related to Our Business and Operations

Security breaches or attacks, or our failure to comply with information security laws, or regulations or industry security requirements, could harm our business by disrupting our delivery of services and damaging our reputation and could result in a breach of one or more client contracts.

We electronically receive, process, store and transmit sensitive business information of our clients. In addition, we collect personal consumer data, such as names and addresses, social security numbers, driver's license numbers, cardholder data and payment history records. Such information is necessary to support our clients' transaction processing and to conduct our check authorization and collection businesses. The uninterrupted operation of our information systems, as well as the confidentiality of the customer/consumer information that resides on such systems, is critical to our successful operation. For that reason, cybersecurity is one of the principal operational risks we face as a provider of services to financial institutions. If we fail to maintain an adequate security infrastructure, adapt to emerging security threats, or implement sufficient security standards and technology to protect against security breaches, the confidentiality of the information we secure could be compromised. Unauthorized access to our computer systems or databases could result in the theft or publication of confidential information, the deletion or modification of records, damages from legal actions from clients and/or their customers, otherwise cause interruptions in our operations and damage to our reputation. These risks are greater with increased information transmission over the Internet and the increasing level of sophistication posed by cyber criminals.

As a provider of services to financial institutions and a provider of card processing services, we are bound by the same limitations on disclosure of the information we receive from our clients as apply to the clients themselves. If we fail to comply with these regulations and industry security requirements, we could be exposed to damages from legal actions from clients and/or their customers, governmental proceedings, governmental notice requirements, and the imposition of fines or prohibitions on card processing services. In addition, if more restrictive privacy laws, rules or industry security requirements are adopted in the future on the Federal or State level, or by a specific industry body, they could have an adverse impact on us through increased costs or restrictions on business processes. Any inability to prevent security or privacy breaches, or the perception that such breaches may occur, could cause our existing clients to lose confidence in our systems and terminate their agreements with us,

inhibit our ability to attract new clients, result in increasing regulation, or bring about other adverse consequences from the government agencies that regulate our business.

Entity mergers or consolidations and business failures in the banking and financial services industry could adversely affect our business by eliminating some of our existing and potential clients and making us more dependent on a more limited number of clients.

There has been and continues to be substantial consolidation activity in the banking and financial services industry. In addition, many financial institutions that experienced negative operating results, including some of our clients, have failed. These consolidations and failures reduce our number of potential clients and may reduce our number of existing clients, which could adversely affect our revenues, even if the events do not reduce the aggregate activities of the consolidated entities. Further, if our clients fail and/or merge with or are acquired by other entities that are not our clients, or that use fewer of our services, they may discontinue or reduce use of our services. It is also possible that larger financial institutions resulting from consolidations would have greater leverage in negotiating terms or could decide to perform in-house some or all of the services we currently provide or could provide. Any of these developments could have an adverse effect on our business, results of operations and financial condition.

If we fail to innovate or adapt our services to changes in technology or in the marketplace, or if our ongoing efforts to upgrade our technology are not successful, we could lose clients or our clients could lose customers and have difficulty attracting new clients for our services.

The markets for our services are characterized by constant technological changes, frequent introductions of new services and evolving industry standards. Our future success will be significantly affected by our ability to enhance our current solutions and develop and introduce new solutions and services that address the increasingly sophisticated needs of our clients and their customers. In addition, as more of our revenue and market demand shifts to SaaS, cloud, BPaaS and new disruptive technologies, the need to keep pace with rapid technology changes becomes more acute. These initiatives carry the risks associated with any new solution development effort, including cost overruns, delays in delivery, and performance issues. There can be no assurance that we will be successful in developing, marketing and selling new solutions that meet these changing demands, that we will not experience difficulties that could delay or prevent the successful development, introduction, and marketing of these solutions, or that our new solutions and their enhancements will adequately meet the demands of the marketplace and achieve market acceptance. Any of these developments could have an adverse impact on our future revenues and/or business prospects.

We operate in a competitive business environment and if we are unable to compete effectively our results of operations and financial condition may be adversely affected.

The market for our services is intensely competitive. Our competitors vary in size and in the scope and breadth of the solutions and services they offer. Some of our competitors have substantial resources. We face direct competition from third parties, and since many of our larger potential clients have historically developed their key applications in-house and therefore view their system requirements from a make-versus-buy perspective, we also often compete against our potential clients’ in-house capacities. In addition, the markets in which we compete have recently attracted increasing competition from smaller start-ups with disruptive technologies, which are receiving increasing investments, global banks (and businesses controlled by a combination of global banks) and global internet companies that are introducing competitive products and services into the marketplace, particularly in the payments area. Emerging technologies and increased competition may also have the effect of unbundling bank solutions and result in picking off solutions we are currently providing from our legacy systems. International competitors are also now targeting and entering the U.S. market with greater force. There can be no assurance that we will be able to compete successfully against current or future competitors or that the competitive pressures we face in the markets in which we operate will not materially adversely affect our business, financial condition, and results of operations. See "Item I. *Business. Competition*."

Global economic, political and other conditions, including business cycles and consumer confidence, may adversely affect our clients or trends in consumer spending, which may adversely impact the demand for our services and our revenue and profitability.

A significant portion of our revenue is derived from transaction processing fees. The global transaction processing industries depend heavily upon the overall level of consumer, business and government spending. Any change in economic factors, including a sustained deterioration in general economic conditions or consumer confidence, particularly in the United States, or increases in interest rates in key countries in which we operate may adversely affect consumer spending, including

related consumer debt, further reduce check writing and change credit and debit card usage, and as a result, adversely affect our financial performance by reducing the number or average purchase amount of transactions that we service.

When there is a slowdown or downturn in the economy, a drop in stock market levels or trading volumes, or an event that disrupts the financial markets, our business and financial results, particularly with respect to our capital markets businesses, may suffer for a number of reasons. Customers may react to worsening conditions by reducing their capital expenditures in general or by specifically reducing their information technology spending. In addition, customers may curtail or discontinue trading operations, delay or cancel information technology projects, or seek to lower their costs by renegotiating vendor contracts. Moreover, competitors may respond to market conditions by lowering prices and attempting to lure away our customers to lower cost solutions. Any more protective trade policies or actions taken by the U.S. may also result in other countries reducing or making more expensive services permitted to be provided by U.S. based companies. If any of these circumstances remain in effect for an extended period of time, there could be a material adverse effect on our financial results.

Constraints within global financial markets or international regulatory requirements could constrain our financial institution clients' ability to purchase our services, impacting our future growth and profitability.

A significant number of our clients and potential clients may hold sovereign debt of economically struggling nations or be subject to emerging international requirements such as Basel III, which could require changes in their capitalization and hence the amount of their working capital available to purchase our services. These potential constraints could alter the ability of clients or potential clients to purchase our services and thus could have a significant impact on our future growth and profitability.

The sales and implementation cycles for many of our software and service offerings can be lengthy and require significant investment from both our clients and FIS. If we fail to close sales or if a client chooses not to complete an installation after expending significant time and resources to do so, our business, financial condition, and results of operations may be adversely affected.

The sales and associated deployment of many of our software or service offerings often involve significant capital commitments by our clients and/or FIS. Potential clients generally commit significant resources to an evaluation of available software and services and require us to expend substantial time, effort, and money educating them prior to sales. Further, as part of the sale or deployment of our software and services, clients may also require FIS to perform significant related services to complete a proof of concept or custom development to meet their needs. All of the aforementioned activities may expend significant funds and management resources and, ultimately, the client may determine not to close the sale or complete the implementation. If we are unsuccessful in closing sales or if the client decides not to complete an implementation after we expend significant funds and management resources or we experience delays, it could have an adverse effect on our business, financial condition, and results of operations.

Our results may fluctuate from period to period because of the lengthy and unpredictable sales cycle for our software, changes in our mix of licenses and services, activity by competitors, and customer budgeting, operational requirements or renewal cycles.

Particularly with respect to GFS, our operating results may fluctuate from period to period and be difficult to predict in a particular period due to the timing and magnitude of software license sales and other factors. We offer a number of our software solutions on a license basis, which means that the customer has the right to run the software on its own computers. The customer usually makes a significant up-front payment to license software, which we generally recognize as revenue when the license contract is signed and the software is delivered. The size of the up-front payment often depends on a number of factors that are different for each customer, such as the number of customer locations, users or accounts. The sales cycle for a software license may be lengthy and take unexpected turns. Further, our customers' business models are shifting away from paying upfront license fees to paying periodic rental fees for services. Thus, it is difficult to predict when software sales will occur or how much revenue they will generate. Since there are few incremental costs associated with software sales, our operating results may fluctuate from quarter to quarter and year to year due to the timing and magnitude of software sales. Our results may also vary as a result of pricing pressures, increased cost of equipment, the evolving and unpredictable markets in which our solutions and services are sold, changes in accounting principles, and competitors' new solutions or services.

In addition, there are a number of other factors that could cause our sales and results of operation to fluctuate from period to period, including:

- customers periodically renew or upgrade their installed base of our solutions, which trigger buying cycles for current or new versions of our solutions and our revenue generally fluctuates with these refresh cycles as a result;

- the budgeting cycles and purchasing practices of customers, particularly large customers;
- changes in customer, distributor or reseller requirements or market needs;
- deferral of orders from customers in anticipation of new solutions or offerings announced by us or our competitors or otherwise anticipated by the market;
- our ability to successfully expand our business domestically and internationally; and
- insolvency or credit difficulties confronting our customers, which could adversely affect their ability to purchase or pay for our solutions.

Failure to obtain new clients or renew client contracts on favorable terms could adversely affect results of operations and financial condition.

We may face pricing pressure in obtaining and retaining our clients. Larger clients may be able to seek price reductions from us when they renew a contract, when a contract is extended, or when the client's business has significant volume changes. They may also reduce services if they decide to move services in-house. Further, our smaller and mid-size clients may also exert pricing pressure, particularly on renewal, due to pricing competition or other economic needs or pressures being experienced by the client. On some occasions, this pricing pressure results in lower revenue from a client than we had anticipated based on our previous agreement with that client. This reduction in revenue could result in an adverse effect on our business, operating results and financial condition.

Further, failure to renew client contracts on favorable terms could have an adverse effect on our business. Our contracts with clients generally run for several years and include liquidated damage provisions that provide for early termination fees. Terms are generally renegotiated prior to the end of a contract's term. If we are not successful in achieving a high rate of contract renewals on favorable terms, our results of operations and financial condition could be adversely affected.

Our business and operating results could be adversely affected if we experience business interruptions, errors or failure in connection with our or third-party information technology and communication systems and other software and hardware used in connection with our business, if we experience defects or design errors in the software solutions we offer, or more generally, if the third-party vendors we rely upon are unwilling or unable to provide the services we need to effectively operate our business.

Many of our services, including our transformation services, are based on sophisticated software and computing systems, and we may encounter delays when developing new technology solutions and services. Further, the technology solutions underlying our services have occasionally contained and may in the future contain undetected errors or defects when first introduced or when new versions are released. In addition, we may experience difficulties in installing or integrating our technologies on platforms used by our clients or our clients may cancel a project after we have expended significant effort and resources to complete an installation. Finally, our systems and operations could be exposed to damage or interruption from fire, natural disaster, power loss, telecommunications failure, unauthorized entry and computer viruses. Defects in our technology solutions, errors or delays in the processing of electronic transactions, or other difficulties could result in: (i) interruption of business operations; (ii) delay in market acceptance; (iii) additional development and remediation costs; (iv) diversion of technical and other resources; (v) loss of clients; (vi) negative publicity; or (vii) exposure to liability claims. Any one or more of the foregoing could have an adverse effect on our business, financial condition and results of operations. Although we attempt to limit our potential liability through controls, including system redundancies, security controls, application development and testing controls, and disclaimers and limitation-of-liability provisions in our license and client agreements, we cannot be certain that these measures will always be successful in preventing disruption or limiting our liability.

Further, most of the solutions we offer are very complex software systems that are regularly updated. No matter how careful the design and development, complex software often contains errors and defects when first introduced and when major new updates or enhancements are released. If errors or defects are discovered in current or future solutions, we may not be able to correct them in a timely manner, if at all. In our development of updates and enhancements to our software solutions, we may make a major design error that makes the solution operate incorrectly or less efficiently. The failure of software to properly perform could result in the Company and its clients being subjected to losses or liability, including censures, fines, or other sanctions by the applicable regulatory authorities, and we could be liable to parties who are financially harmed by those errors. In addition, such errors could cause the Company to lose revenues, lose clients or damage its reputation.

In addition, we generally depend on a number of third parties, both in the United States and internationally, to supply elements of our systems, computers, research and market data, connectivity, communication network infrastructure, other equipment and related support and maintenance. We cannot be certain that any of these third parties will be able to continue providing these services to effectively meet our evolving needs. If our vendors, or in certain cases vendors of our customers, fail to meet their obligations, provide poor or untimely service, or we are unable to make alternative arrangements for the

provision of these services, we may in turn fail to provide our services or to meet our obligations to our customers, and our business, financial condition and operating results could be materially harmed.

The Dodd-Frank Act may result in business changes for our clients that have or could have an adverse effect on our financial condition, revenues, results of operations, or prospects for future growth and overall business.

Our clients are required to comply with numerous regulations. The Dodd-Frank Act and associated Durbin Amendment were passed and signed into law in 2010. The Dodd-Frank Act represents a comprehensive overhaul of the regulations governing the financial services industry within the United States. The Dodd-Frank Act established the CFPB and requires this and other federal agencies to implement many new regulations, which have the potential to increase the amount and types of regulation on areas of our business that were not previously regulated.

Several regulations and rules have or will be written and implemented as directed by the Dodd-Frank Act. These rules and regulations have or will require our clients or potential clients to comply with requirements and could require us to directly comply with regulations. These requirements have or could result in the need for FIS to make capital investments to modify our solutions and services to facilitate our clients' and potential clients' compliance, as well as to deploy additional processes or reporting to comply with regulations. Further, requirements of the regulations have or could result in changes in our clients' business practices and those of other marketplace participants that may alter the delivery of services to consumers, which have or could impact the demand for our software and services as well as alter the type or volume of transactions that we process on behalf of our clients. As a result, these requirements have or could have an adverse impact on our financial condition, revenues, results of operations, prospects for future growth and overall business.

Many of our clients are subject to a regulatory environment and to industry standards that may change in a manner that reduces the types or volume of solutions or services we provide, or may reduce the type or number of transactions in which our clients engage, and therefore, reduces our revenues.

Our clients are subject to a number of government regulations and industry standards with which our services must comply. Our clients must ensure that our services and related solutions work within the extensive and evolving regulatory and industry requirements applicable to them. Federal, state, foreign or industry authorities could adopt laws, rules or regulations affecting our clients' businesses that could lead to increased operating costs and could reduce the convenience and functionality of our services, possibly resulting in reduced market acceptance. In addition, action by regulatory authorities relating to credit availability, data usage, privacy, or other related regulatory developments could have an adverse effect on our clients and, therefore, could have a material adverse effect on our financial condition, revenues, results of operations, prospects for future growth and overall business. Elimination of regulatory requirements could also adversely affect the sales of our solutions designed to help clients comply with complex regulatory environments.

Regulations enacted by the CFPB or state regulatory authorities, such as the New York State Department of Financial Services, may require FIS to adopt new business practices which may require capital investment and/or incremental expenses which could impact our future operating results.

The CFPB regulates financial and non-financial institutions and providers to those institutions. The CFPB continues to establish rules for regulating non-financial institution providers to ensure adequate protection of consumer privacy and to ensure consumers are not impacted by deceptive business practices. The New York Department of Financial Services has enacted new rules that require covered financial institutions to establish and maintain cyber security programs. The impact of these rules and any future rules may require FIS to be subject to additional regulation and adopt additional business practices that could require additional capital expenditures or impact our operating results. Changes to state money transmission laws and regulations, including changing interpretations and the implementation of new or varying regulatory requirements, may result in the need for additional money transmitter licenses. These changes could result in increased costs of compliance, as well as fines or penalties.

Our revenues from the sale of services to members of VISA, MasterCard, American Express, Discover and other similar organizations are dependent upon our continued certification and sponsorship, and the loss or suspension of certification or sponsorship could adversely affect our business.

In order to provide our card processing services, we must be certified (including applicable sponsorship) by VISA, MasterCard, American Express, Discover and other similar organizations. These certifications are dependent upon our continued adherence to the standards of the issuing bodies and sponsoring member banks. The member financial institutions, some of which are our competitors, set the standards with which we must comply. If we fail to comply with these standards we could be fined, our certifications could be suspended, or our registration could be terminated. The suspension or termination of

our certifications, or any changes in the rules and regulations governing VISA, MasterCard, American Express, Discover, or other similar organizations, could result in a reduction in revenue or increased costs of operation, which in turn could have a material adverse effect on our business.

Changes in card association and debit network fees or products could increase costs or otherwise limit our operations.

From time to time, card associations and debit networks increase the interchange fees that they charge. It is possible that competitive pressures will result in our absorption of a portion of such increases in the future, which would increase our operating costs, reduce our profit margin and adversely affect our business, financial condition, and results of operations. Furthermore, the rules and regulations of the various card associations and networks prescribe certain capital requirements. Any increase in the capital level required would further limit our use of capital for other purposes.

Interchange fees and related practices have been receiving significant legal and regulatory scrutiny worldwide. The resulting regulatory changes that could occur from proposed regulations could alter the fees charged by card associations and debit networks worldwide. Such changes could have an adverse impact on our business or financial condition due to reductions or changes in types of transactions processed on behalf of our clients.

Our securities brokerage operations are highly regulated and subject to risks that are not encountered in our other businesses.

One of our subsidiaries is an SEC registered broker-dealer in the U.S. and others are authorized by the FCA to conduct certain regulated business in the U.K. Domestic and foreign regulatory and self-regulatory organizations, such as the SEC, FINRA, and the FCA can, among other things, fine, censure, issue cease-and-desist orders against, and suspend or expel a broker-dealer or its officers or employees for failure to comply with the many laws and regulations that govern brokerage activities. Those laws and regulations derive from a variety of policy considerations and address a wide range of topics, including those designed to protect customers of broker-dealers, and the privacy of their information, and those designed to protect the integrity of the markets, such as laws and regulations requiring broker-dealers to report suspicious activity of customers. Sanctions for failure to comply with such laws and regulations may arise out of currently-conducted activities or those conducted in prior periods. Our ability to comply with these laws and regulations is largely dependent on our establishment, maintenance, and enforcement of an effective brokerage compliance program. Failure to establish, maintain, and enforce the required brokerage compliance procedures, even if unintentional, could subject us to significant losses, lead to disciplinary or other actions, and tarnish our reputation. Regulations affecting the brokerage industry may change, which could adversely affect our financial results.

We are exposed to certain risks relating to the execution services provided by our brokerage operations to our customers and counterparties, which include other broker-dealers, active traders, hedge funds, asset managers, and other institutional and non-institutional clients. These risks include, but are not limited to, customers or counterparties failing to pay for or deliver securities, trading errors, the inability or failure to settle trades, and trade execution system failures. As trading in the U.S. securities markets has become more automated, the potential impact of a trading error or a rapid series of errors caused by a computer or human error, or a malicious act has become greater. In our other businesses, we generally can disclaim liability for trading losses that may be caused by our software, but in our brokerage operations, we may not be able to limit our liability for trading losses or failed trades even when we are not at fault. As a result, we may suffer losses that are disproportionately large compared to the relatively modest profit contributions of our brokerage operations.

Privacy laws and regulations, such as the GDPR, require FIS to adopt new business practices and contractual provisions in existing and new contracts which may require transitional and incremental expenses which may impact our future operating results.

New privacy laws, such as the GDPR, continue to develop in ways we cannot predict. Privacy laws may be interpreted and applied inconsistently from country to country and impose inconsistent or conflicting requirements. Complying with varying jurisdictional requirements could increase the costs and complexity of compliance or require us to change our business practices in a manner adverse to our business and violations of privacy laws can result in significant penalties and damage to our brand and business.

Implementation of the GDPR will require changes to certain of our business practices, thereby increasing our costs. Failure to comply with the requirements of the GDPR could result in significant penalties and loss of business, among other things.

If we fail to comply with applicable regulations or to meet regulatory expectations, our business, results of operations or financial condition could be adversely impacted.

The majority of our data processing services for financial institutions are not directly subject to Federal or State regulations specifically applicable to financial institutions such as banks, thrifts and credit unions. However, as a provider of services to these financial institutions, our data processing operations are examined on a regular basis by various federal and state regulatory authorities and by international regulatory authorities, such as the FCA, in certain jurisdictions. If we fail to comply with any applicable regulations or guidelines for operations of a data services provider, we could be subject to regulatory actions or rating changes, may not meet contractual obligations, and may suffer harm to our client relationships or reputation. Failure to meet the aforementioned requirements or to adapt to new requirements at the Federal, State or international level could inhibit our ability to retain existing clients or obtain new clients, which could have an adverse impact on our business, results of operations and financial condition.

In addition to our data processing services described above, we also have business operations that store, process or transmit consumer information or have direct relationships with consumers that are obligated to comply with regulations, including, but not limited to, the Federal Fair Credit Reporting Act, the Federal Fair Debt Collection Practices Act and applicable privacy requirements. Further, our international businesses must comply with applicable laws such as the U.S. Foreign Corrupt Practices Act. Failure to maintain compliance with or adapt to changes in any of the aforementioned requirements could result in fines, penalties or regulatory actions that could have an adverse impact on our business, results of operations and financial condition.

High profile payment card industry or digital banking security breaches could impact consumer payment behavior patterns in the future and reduce our card payment transaction volumes.

We are unable to predict whether or when high profile card payment or digital banking security breaches will occur and if they occur, whether consumers will transact less on their payment cards or reduce their digital banking service. If consumers transact less on cards issued by our clients or reduce digital banking services and we are not able to adapt to offer our clients alternative technologies, it could have a significant adverse impact on our revenue and related earnings.

Misappropriation of our intellectual property and proprietary rights or a finding that our patents are invalid could impair our competitive position.

Our ability to compete depends in some part upon our proprietary solutions and technology. Despite our efforts to protect our proprietary rights, unauthorized parties may attempt to copy aspects of our services or to obtain and use information that we regard as proprietary or challenge the validity of our patents with governmental authorities. Policing unauthorized use of our proprietary rights is difficult. We cannot make any assurances that the steps we have taken will prevent misappropriation of technology or that the agreements entered into for that purpose will be enforceable. Effective patent, trademark, service mark, copyright, and trade secret protection may not be available in every country in which our applications and services are made available online. Misappropriation of our intellectual property or potential litigation concerning such matters could have an adverse effect on our results of operations or financial condition.

If our applications or services are found to infringe the proprietary rights of others, we may be required to change our business practices and may also become subject to significant costs and monetary penalties.

As our information technology applications and services develop, we are increasingly subject to infringement claims. Any claims, whether with or without merit, could: (i) be expensive and time-consuming to defend; (ii) result in an injunction or other equitable relief which could cause us to cease making, licensing or using applications that incorporate the challenged intellectual property; (iii) require us to redesign our applications, if feasible; (iv) divert management’s attention and resources; and (v) require us to enter into royalty or licensing agreements in order to obtain the right to use necessary technologies or pay damages resulting from any infringing use.

Some of our solutions contain “open source” software, and any failure to comply with the terms of one or more of these open source licenses could negatively affect our business.

We use a limited amount of software licensed by its authors or other third parties under so-called “open source” licenses and may continue to use such software in the future. Some of these licenses contain requirements that we make available source code for modifications or derivative works we create based upon the open source software, and that we license such modifications or derivative works under the terms of a particular open source license or other license granting third parties certain rights of further use. By the terms of certain open source licenses, we could be required to release the source code of our

proprietary software if we combine our proprietary software with open source software in a certain manner. Additionally, the terms of many open source licenses have not been interpreted by United States or other courts, and there is a risk that these licenses could be construed in a manner that could impose unanticipated conditions or restrictions on our ability to commercialize our solutions. In addition to risks related to license requirements, usage of open source software can lead to greater risks than use of third-party commercial software, as open source licensors generally do not provide warranties or controls on origin of the software. We have established processes to help alleviate these risks, including a review process for screening requests from our development organizations for the use of open source, but we cannot be sure that all open source is submitted for approval prior to use in our solutions. In addition, many of the risks associated with usage of open source cannot be eliminated, and could, if not properly addressed, negatively affect our business.

We face liability to our merchant clients if checks that we have guaranteed are dishonored by the check writer's bank.

If checks that we have guaranteed are dishonored by the check writers' banks, we must reimburse our merchant clients for the checks' face value and pursue collection from the check writers. In some cases, we recognize a liability to our merchant clients for estimated check returns and a receivable for amounts we estimate we will recover from the check writers, based on historical experience and other relevant factors. The estimated check returns and recovery amounts are subject to the risk that actual amounts returned may exceed our estimates and actual amounts recovered by us may be less than our estimates. Changes in economic conditions, the risk characteristics and composition of our clients and other factors could impact our actual and projected amounts.

Lack of system integrity, fraudulent payments, credit quality, and undetected errors related to funds settlement or the availability of clearing services could result in a financial loss.

We settle funds on behalf of financial institutions, other businesses and consumers and receive funds from clients, card issuers, payment networks and consumers on a daily basis for a variety of transaction types. Transactions facilitated by us include debit card, credit card, electronic bill payment transactions, banking payments and check clearing that supports consumers, financial institutions and other businesses. These payment activities rely upon the technology infrastructure that facilitates the verification of activity with counterparties, the facilitation of the payment as well as the detection or prevention of fraudulent payments. If our continuity of operations, integrity of processing, or ability to detect or prevent fraudulent payments were compromised, this could result in a financial loss to us. In addition, we rely on various financial institutions to provide ACH services in support of funds settlement for certain of our solutions. If we are unable to obtain such ACH services in the future, that could have a material adverse effect on our business, financial position and results of operations. In addition, we may issue credit to consumers, financial institutions or other businesses as part of the funds settlement. A default on this credit by a counterparty could result in a financial loss to us. Furthermore, if one of our clients for which we facilitate settlement suffers a fraudulent event due to an error of their controls, we may suffer a financial loss if the client does not have sufficient capital to cover the loss.

Failure to properly manage or mitigate risks in the operation of our wealth and retirement businesses in the U.S and the U.K could have adverse liability consequences.

We have wealth and retirement businesses in the U.S. and U.K. engaged in processing securities transactions on behalf of clients and serving as a custodian. Failure to properly manage or mitigate risks in those operations and increased volatility in the financial markets may increase the potential for and magnitude of resulting losses, including those that may arise from human errors or omissions, defects or interruptions in computer or communications systems or breakdowns in processes or in internal controls. Human errors or omissions may include failures to comply with applicable laws or corporate policies and procedures, theft, fraud or misappropriation of assets, whether arising from the intentional actions of internal personnel or external third parties. In addition, the U.S.-based business holds charters in the states of Georgia and Delaware which exposes us to further regulatory compliance requirements of the Georgia Department of Banking and Finance and the Office of the Commissioner of Banking in the State of Delaware. The U.S. wealth and retirement business is required to hold certain levels of regulatory capital as defined by the state banking regulators in the states in which they hold a bank or trust charter (Delaware and Georgia). In the U.K., our Platform Securities and broker dealer businesses are regulated by the FCA and are subject to further regulatory capital requirements. We also have registered investment advisor and transfer agent businesses regulated by the SEC and subject to further regulatory requirements.

Our business is subject to the risks of international operations, including movements in foreign currency exchange rates.

The international operations of FIS represented approximately 27% of our total 2017 revenues, and are largely conducted in currencies other than the U.S. Dollar, including the British Pound, Brazilian Real, Euro and Indian Rupee. Our business and financial results could be adversely affected due to a variety of factors, including:

- changes in a specific country or region's political and cultural climate or economic condition, including change in governmental regime;
- unexpected or unfavorable changes in foreign laws, regulatory requirements and related interpretations;
- difficulty of effective enforcement of contractual provisions in local jurisdictions;
- inadequate intellectual property protection in foreign countries;
- trade-protection measures, import or export licensing requirements such as Export Administration Regulations promulgated by the U.S. Department of Commerce and fines, penalties or suspension or revocation of export privileges;
- trade sanctions imposed by the United States or other governments with jurisdictional authority over our business operations;
- the effects of applicable and potentially adverse foreign tax law changes;
- significant adverse changes in foreign currency exchange rates;
- longer accounts receivable cycles;
- managing a geographically dispersed workforce; and
- compliance with the U.S. Foreign Corrupt Practices Act, or FCPA, and the Office of Foreign Assets Control regulations, particularly in emerging markets.

In foreign countries, particularly in those with developing economies, certain business practices may exist that are prohibited by laws and regulations applicable to us, such as the U.S. Foreign Corrupt Practices Act, the U.K. Bribery Act and other anti-corruption laws. Although our policies and procedures require compliance with these laws and are designed to facilitate compliance with these laws, our employees, contractors and agents may take actions in violation of applicable laws or our policies. Any such violation, even if prohibited by our policies, could have a material adverse effect on our business and reputation.

As we expand our international operations, more of our clients may pay us in foreign currencies. Conducting business in currencies other than U.S. Dollars subjects us to fluctuations in currency exchange rates that can negatively impact our results, period to period, including relative to analyst estimates or guidance. Our primary exposure to movements in foreign currency exchange rates relates to foreign currencies in Brazil, Europe, including the United Kingdom, Australia and parts of Asia. The U.S. Dollar value of our net investments in foreign operations, the periodic conversion of foreign-denominated earnings to the U.S. Dollar (our reporting currency), and our results of operations and, in some cases, cash flows, could be adversely affected in a material manner by movements in foreign currency exchange rates. These risks could cause an adverse effect on the business, financial position and results of operations of the Company.

The Referendum on the United Kingdom's Membership in the European Union could cause disruption to and create uncertainty surrounding our business.

The referendum on the United Kingdom's (the U.K.) membership in the European Union (the E.U.) (referred to as "Brexit"), approving the exit of the United Kingdom from the European Union could cause disruptions to and create uncertainty surrounding our business, including affecting our relationships with our existing and future clients, suppliers and employees, which could have an adverse effect on our business, financial results and operations. The U.K. Government has commenced negotiations to determine the future terms of the U.K.'s relationship with the E.U., including the terms of trade between the U.K. and the E.U. and other nations. The effects of Brexit will depend on any agreements the U.K. makes to retain access to E.U. markets either during a transitional period or more permanently. In addition, because the terms of trade between the U.K. and jurisdictions other than the E.U. may be currently governed by trade agreements between the E.U. and such other jurisdictions, the U.K. may be required to negotiate new terms of trade with such other jurisdictions. These potential measures could disrupt the markets we serve and the tax jurisdictions in which we operate and adversely change tax benefits or liabilities in these or other jurisdictions, and may cause us to lose clients, suppliers, and employees. In addition, Brexit could lead to legal uncertainty and potentially divergent national laws and regulations as the U.K. determines which E.U. laws to replace or replicate.

Actions to implement Brexit may also create global economic uncertainty, which may cause our clients to closely monitor their costs and reduce their spending on our solutions and services.

Any of these effects of Brexit, among others, could materially adversely affect our business, business opportunities, results of operations, financial condition and cash flows.

We have businesses in emerging markets that may experience significant economic volatility.

We have operations in emerging markets, primarily in Brazil, India, Southeast Asia, the Middle East and Africa. These emerging market economies tend to be more volatile than the more established markets we serve in North America and Europe, which could add volatility to our future revenues and earnings.

Failure to attract and retain skilled technical employees or senior management personnel could harm our ability to grow.

Our future success depends upon our ability to attract and retain highly-skilled technical personnel. Because the development of our solutions and services requires knowledge of computer hardware, operating system software, system management software and application software, our technical personnel must be proficient in a number of disciplines. Competition for such technical personnel is intense, and our failure to hire and retain talented personnel could have a material adverse effect on our business, operating results and financial condition.

Our future growth will also require sales and marketing, financial and administrative personnel to develop and support new solutions and services, to enhance and support current solutions and services and to expand operational and financial systems. There can be no assurance that we will be able to attract and retain the necessary personnel to accomplish our growth strategies and we may experience constraints that could adversely affect our ability to satisfy client demand in a timely fashion.

Our ability to maintain compliance with applicable laws, rules and regulations and to manage and monitor the risks facing our business relies upon the ability to maintain skilled compliance, security, risk and audit professionals. Competition for such skillsets is intense, and our failure to hire and retain talented personnel could have an adverse effect on our internal control environment and impact our operating results.

Our senior management team has significant experience in the financial services industry and the loss of this leadership could have an adverse effect on our business, operating results and financial condition. Further, the loss of this leadership may have an adverse impact on senior management's ability to provide effective oversight and strategic direction for all key functions within the Company, which could impact our future business, operating results and financial condition.

We are the subject of various legal proceedings that could have a material adverse effect on our revenue and profitability.

We are involved in various litigation matters, including in some cases class-action and patent infringement litigation. If we are unsuccessful in our defense of litigation matters, we may be forced to pay damages and/or change our business practices, any of which could have a material adverse effect on our business and results of operations.

Unfavorable resolution of tax contingencies or unfavorable future tax law changes could adversely affect our tax expense.

Our tax returns and positions are subject to review and audit by Federal, state, local and international taxing authorities. An unfavorable outcome to a tax audit could result in higher tax expense, and could negatively impact our effective tax rate, financial position, results of operations and cash flows in the current and/or future periods. The U.S. recently enacted significant tax reform and certain provisions of the new law could have an adverse impact to us. Unfavorable future tax law changes could also result in negative impacts. In addition, tax-law amendments in the United States and other jurisdictions could significantly impact how United States multinational corporations are taxed. Although we cannot predict whether or in what form such legislation will pass, if enacted it could have a material adverse effect on our business and financial results.

A material weakness in our internal controls could have a material adverse effect on us.

Effective internal controls are necessary for us to provide reasonable assurance with respect to our financial reports and to adequately mitigate risk of fraud. If we cannot provide reasonable assurance with respect to our financial reports and adequately mitigate risk of fraud, our reputation and operating results could be harmed. Internal control over financial reporting may not prevent or detect misstatements because of its inherent limitations, including the possibility of human error, the circumvention or overriding of controls, or fraud. Therefore, even effective internal controls can provide only reasonable assurance with respect to the preparation and fair presentation of financial statements. In addition, projections of any evaluation of effectiveness of internal control over financial reporting to future periods are subject to the risk that the control may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. A material weakness in our internal control over financial reporting could adversely impact our ability to provide timely and accurate financial information. If we are unable to report financial information timely and accurately or to maintain effective disclosure controls and procedures, we could be subject to, among other things, regulatory or enforcement actions by the SEC, any one of which could adversely affect our business prospects.

Risks Related to Business Combinations and Ventures

We continue to incur substantial expenses related to the SunGard acquisition, which was completed on November 30, 2015, and the integration of SunGard.

We continue to incur substantial expenses in connection with the integration of SunGard. We continue to integrate a large number of processes, policies, procedures, operations, technologies and systems, including information technology, data centers, purchasing, accounting and finance, sales, billing, information security, risk, legal, marketing and human resources, including payroll and employee benefits. While we have attempted to estimate the after-tax integration and restructuring costs and other costs incurred to execute the transaction following completion of the SunGard acquisition, many of the expenses that will be incurred are, by their nature, difficult to estimate accurately. Although we expect that the realization of efficiencies related to the integration of the businesses will offset incremental transaction, merger-related and restructuring costs over time, we cannot give any assurance that this net benefit will be achieved in the near term, or at all.

There could be significant liability for us if all or part of the AS Split-Off were determined to be taxable for U.S. federal or state income tax purposes.

On March 31, 2014, SunGard completed the split-off of its Availability Services ("AS") business to its existing stockholders, including its private equity owners, on a tax-free and pro-rata basis (the "AS Split-Off"). At the time SunGard received opinions from outside tax counsel to the effect that the AS Split-Off should qualify for tax-free treatment as transactions described in Section 355 and related provisions of the Internal Revenue Code, as amended (the "Code"). In addition, actions taken following the AS Split-Off, including the SunGard acquisition and certain 50 percent or greater changes by vote or value of the stock ownership of the new entity conducting the AS business, may cause the AS Split-Off to be taxable to FIS. In connection with the SunGard acquisition, we and SunGard received opinions of outside tax counsel to the effect that the SunGard acquisition should not cause the AS Split-off to fail to so qualify.

Notwithstanding the receipt of tax opinions, the tax-free treatment of the AS Split-off is not free from doubt, and there is a risk that the Internal Revenue Service (the "IRS"), a state taxing authority or a court could conclude to the contrary that the separation of the AS business from SunGard may not qualify as tax-free transactions. An opinion of tax counsel is not binding on the IRS, state taxing authorities or any court and as a result there can be no assurance that a tax authority will not challenge the tax-free treatment of all or part of the AS Split-Off or that, if litigated, a court would not agree with the IRS or a state taxing authority. Further, these tax opinions rely on certain facts, assumptions, representations, warranties and covenants from SunGard, the new entity conducting the AS business and from some of SunGard's stockholders regarding the past and future conduct of the companies' respective businesses, share ownership and other matters. If any of the facts, assumptions, representations, warranties and covenants on which the opinions rely is inaccurate or incomplete or not satisfied, the opinions may no longer be valid. Moreover, the IRS or state taxing authority could determine on audit that the AS Split-Off is taxable if it determines that any of these facts, assumptions, representations, warranties or covenants are not correct or have been violated or if it disagrees with one or more conclusions in the opinions or for other reasons.

If the AS Split-Off is determined to be taxable, we and possibly our stockholders could incur significant income tax liabilities. These tax liabilities could have a material adverse effect on our business, financial condition, results of operations and cash flows.

Actions taken by Sungard Availability Services Capital, Inc. or its stockholders could cause the AS Split-Off to fail to qualify as a tax-free transaction, and Sungard Availability Services Capital, Inc. may be unable to fully indemnify SunGard for the resulting significant tax liabilities.

Pursuant to the Tax Sharing and Disaffiliation Agreement ("Tax Sharing Agreement") that SunGard entered into with Sungard Availability Services Capital, Inc. ("SpinCo"), SpinCo is required to indemnify SunGard for certain taxes relating to the AS Split-Off that result from (i) any breach of the representations or the covenants made by SpinCo regarding the preservation of the intended tax-free treatment of the AS Split-Off, (ii) any action or omission that is inconsistent with the representations, statements, warranties and covenants provided to tax counsel in connection with their delivery of tax opinions to SunGard with respect to the

AS Split-Off, and (iii) any other action or omission that was likely to give rise to such taxes when taken, in each case, by SpinCo or any of its subsidiaries. Conversely, if any such taxes are the result of such a breach or certain other actions or omissions by SunGard, SunGard would be wholly responsible for such taxes. In addition, if any part of the AS Split-Off fails to qualify for the intended tax-free treatment for reasons other than those for which SunGard or SpinCo would be wholly responsible pursuant to the provisions described above, SpinCo will be obligated to indemnify SunGard for 23% of the liability for taxes imposed in respect of the AS Split-Off and SunGard would bear the remainder of such taxes. If SpinCo is required to indemnify SunGard for any of the foregoing reasons, SpinCo's indemnification liabilities could potentially exceed its net asset value and SpinCo may be unable to fully reimburse or indemnify SunGard for its significant tax liabilities arising from the AS Split-Off as provided by the Tax Sharing Agreement.

We have a substantial investment in our Brazilian Venture and obtain significant revenue through that venture that would be lost and result in significant termination costs if our venture partner were to terminate the agreement, to the extent not replaced by further commercial agreements.

Brazilian Venture revenue attributable to our Brazilian Venture partner, Banco Bradesco, was $317 million in 2017. The contract that we have with our Brazilian Venture partner allows for the termination or partial termination of the contract, which ends September 30, 2020, at any point during the 10-year term if minimum targets are met. Minimum targets under the Brazilian Venture agreement have been met and the parties have begun negotiations to determine their future business relationship. During these negotiations, the Brazilian Venture agreement remains in effect. Depending on the results of these negotiations, our future revenue and earnings growth in Brazil could be adversely impacted. For further detail on our Brazilian Venture see Note 19 of the Notes to Consolidated Financial Statements.

Additionally, the Brazilian Venture employs approximately 11,000 employees in Brazil who would have the ability to file labor claims if their employment is terminated. If our Brazilian Venture partner were to terminate the agreement, we, and they, may be subject to labor claims filed by employees of the Brazilian Venture. These claims, if realized, could result in a significant cost and impact to our earnings.

We have substantial investments in recorded goodwill and other intangible assets as a result of prior acquisitions, and a severe or extended economic downturn could cause these investments to become impaired, requiring write-downs that would reduce our operating income.

As of December 31, 2017, goodwill aggregated to $13.7 billion, or 56.0% of total assets, and other indefinite-lived intangible assets aggregated to $48 million, or 0.2% of total assets. Current accounting rules require goodwill and other indefinite-lived intangible assets to be assessed for impairment at least annually or whenever changes in circumstances indicate potential impairment. Factors that may be considered a change in circumstance include significant underperformance relative to historical or projected future operating results, a significant decline in our stock price and market capitalization, and negative industry or economic trends. The results of our 2017 annual assessment of the recoverability of goodwill indicated that the fair values of the Company's reporting units were in excess of the carrying values of those reporting units, and thus no goodwill impairment existed as of December 31, 2017. Likewise, the fair value of indefinite-lived intangible assets was also in excess of the carrying value of those assets as of December 31, 2017. However, if worldwide or United States economic conditions decline significantly with negative impacts to bank spending and consumer behavior, or if other business or market changes impact our outlook, the carrying amount of our goodwill and other indefinite-lived intangible assets may no longer be recoverable and we may be required to record an impairment charge, which would have a negative impact on our results of operations.

As of December 31, 2017, intangible assets with finite useful lives aggregated to $3,837 million, or 15.6% of total assets. Current accounting rules require intangible assets with finite useful lives to be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Factors that may be considered a change in circumstance include significant under-performance relative to historical or projected future operating results, a significant decline in our stock price and market capitalization, and negative industry or economic trends.

We will continue to monitor the fair value of our intangible assets as well as our market capitalization and the impact of any economic downturn on our business to determine if there is an impairment in future periods.

Risks Related to our Indebtedness

Our existing debt levels and future levels under existing facilities and debt service requirements may adversely affect our financial condition or operational flexibility and prevent us from fulfilling our obligations under our outstanding indebtedness.

As of December 31, 2017, we had total debt of approximately $8.8 billion. This level of debt or any increase in our debt level could have adverse consequences for our business, financial condition, operating results and operational flexibility, including the following: (i) the debt level may cause us to have difficulty borrowing money in the future for working capital, capital expenditures, acquisitions or other purposes; (ii) our debt level may limit operational flexibility and our ability to pursue business opportunities and implement certain business strategies; (iii) some of our debt has a variable rate of interest, which exposes us to the risk of increased interest rates; (iv) we have a higher level of debt than some of our competitors or potential competitors, which may cause a competitive disadvantage and may reduce flexibility in responding to changing business and economic conditions, including increased competition and vulnerability to general adverse economic and industry conditions; (v) there are significant maturities on our debt that we may not be able to repay at maturity or that may be refinanced at higher rates; and (vi) if we fail to satisfy our obligations under our outstanding debt or fail to comply with the financial or other restrictive covenants contained in the indenture governing our senior notes, or our credit facility, an event of default could result that could cause all of our debt to become due and payable.

Statement Regarding Forward-Looking Information

The statements contained in this Form 10-K or in our other documents or in oral presentations or other statements made by our management that are not purely historical are forward-looking statements within the meaning of the U.S. federal securities laws. Statements that are not historical facts, including statements about anticipated financial outcomes, including any earnings guidance of the Company, business and market conditions, outlook, foreign currency exchange rates, expected dividends and share repurchases, the Company's sales pipeline and anticipated profitability and growth, as well as other statements about our expectations, beliefs, intentions, or strategies regarding the future are forward-looking statements. These statements relate to future events and our future results and involve a number of risks and uncertainties. Forward-looking statements are based on management's beliefs, as well as assumptions made by, and information currently available to, management. Any statements that refer to beliefs, expectations, projections or other characterizations of future events or circumstances and other statements that are not historical facts are forward-looking statements. In many cases, you can identify forward-looking statements by terminology such as "may," "will," "should," "expect," "plan," "anticipate," "believe," "estimate," "predict," "potential," or "continue," or the negative of these terms and other comparable terminology. Actual results, performance or achievement could differ materially from those contained in these forward-looking statements. The risks and uncertainties that forward-looking statements are subject to include without limitation:

- the risk that acquired businesses will not be integrated successfully, or that the integration will be more costly or more time-consuming and complex than anticipated;
- the risk that cost savings and other synergies anticipated to be realized from acquisitions may not be fully realized or may take longer to realize than expected;
- the risk of doing business internationally;
- changes in general economic, business and political conditions, including the possibility of intensified international hostilities, acts of terrorism, changes in either or both the United States and international lending, capital and financial markets and currency fluctuations;
- the effect of legislative initiatives or proposals, statutory changes, governmental or other applicable regulations and/or changes in industry requirements, including privacy and cybersecurity laws and regulations;
- the risks of reduction in revenue from the elimination of existing and potential customers due to consolidation in, or new laws or regulations affecting, the banking, retail and financial services industries or due to financial failures or other setbacks suffered by firms in those industries;
- changes in the growth rates of the markets for our solutions;
- failures to adapt our solutions to changes in technology or in the marketplace;
- internal or external security breaches of our systems, including those relating to unauthorized access, theft, corruption or loss of personal information and computer viruses and other malware affecting our software or platforms, and the reactions of customers, card associations, government regulators and others to any such events;
- the risk that implementation of software (including software updates) for customers or at customer locations may result in the corruption or loss of data or customer information, interruption of business operations, exposure to liability claims or loss of customers;
- the reaction of current and potential customers to communications from us or regulators regarding information security, risk management, internal audit or other matters;

- competitive pressures on pricing related to the decreasing number of community banks in the U.S., the development of new disruptive technologies competing with one or more of our solutions, increasing presence of international competitors in the U.S. market and the entry into the market by global banks and global companies with respect to certain competitive solutions, each of which may have the impact of unbundling individual solutions from a comprehensive suite of solutions we provide to many of our customers;
- the failure to innovate in order to keep up with new emerging technologies could impact our solutions, including the ability to attract new, or retain existing, customers;
- an operational or natural disaster at one of our major operations centers; and
- other risks detailed elsewhere in this Risk Factors section and in our other filings with the Securities and Exchange Commission.

Other unknown or unpredictable factors also could have a material adverse effect on our business, financial condition, results of operations and prospects. Accordingly, readers should not place undue reliance on these forward-looking statements. These forward-looking statements are inherently subject to uncertainties, risks and changes in circumstances that are difficult to predict. Except as required by applicable law or regulation, we do not undertake (and expressly disclaim) any obligation and do not intend to publicly update or review any of these forward-looking statements, whether as a result of new information, future events or otherwise. You should carefully consider the possibility that actual results may differ materially from our forward-looking statements.

Exhibit 99.3

PART II

Item 6. *Selected Financial Data*

Note: The information contained in this Item has been updated to recast certain prior period financial information to reflect our retrospective application of the new revenue accounting standard ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)" ("ASU 2014-09"). The resulting changes are as follows:

- *The amounts under the caption "Statement of Earnings Data" for the years ended December 31, 2017, 2016 and 2015 have been recast to reflect our retrospective application of ASU No. 2014-09.*
- *The amounts under the caption "Balance Sheet Data" as of December 31, 2017, 2016 and 2015 have been recast to reflect our retrospective application of ASU No. 2014-09.*
- *The amounts under the caption "Selected Quarterly Financial Data" for all periods presented have been recast to reflect our retrospective application of ASU No. 2014-09.*
- *All references to footnotes are to the new audited consolidated financial statements included with this Form 8-K under "Exhibit 99.6".*

This Item has not been updated for any other changes since the filing of the 2017 Annual Report on Form 10-K (“2017 Annual Report”) with the U.S. Securities and Exchange Commission ("SEC") on February 22, 2018. For developments since the filing of the 2017 Annual Report, refer to our Quarterly Report on Form 10-Q for the quarter ended March 31, 2018, and other filings by the Company with the SEC.

The selected financial data set forth below constitutes historical financial data of FIS and should be read in conjunction with "Item 7, *Management's Discussion and Analysis of Financial Condition and Results of Operations,*" and "Item 8, *Financial Statements and Supplementary Data,*" included elsewhere in this report.

On July 31, 2017, FIS closed on the sale of a majority ownership stake in its Capco consulting business and risk and compliance consulting business to Clayton, Dubilier & Rice L.P., by and through certain funds that it manages ("CD&R"), for cash proceeds of approximately $469 million, resulting in a pre-tax loss of $41 million. The divestiture is consistent with our strategy to focus on our IP-led businesses. CD&R acquired preferred units convertible into 60% of the common units of the venture, Cardinal Holdings, L.P. ("Cardinal") and FIS obtained common units representing the remaining 40%, in each case before equity is issued to management. The preferred units are entitled to a quarterly dividend at an annual rate of 12%, payable in cash (if available) or additional preferred units at FIS' option. The businesses sold were included within the GFS and IFS segments. The sale did not meet the standard necessary to be reported as discontinued operations; therefore, the pre-tax loss and related prior period earnings remain reported within earnings from continuing operations.

FIS' 40% ownership in Cardinal was initially valued at $172 million and was recorded as an equity method investment included within other noncurrent assets on the Consolidated Balance Sheet. After the sale on July 31, 2017, FIS began to recognize the earnings in after-tax equity method investment earnings outside of operating income and segment Adjusted EBITDA. For periods prior to July 31, 2017, the Capco consulting business and risk and compliance consulting business were included within operating income and segment Adjusted EBITDA.

On February 1, 2017, FIS completed the sale of the SunGard Public Sector and Education ("PS&E") business for $850 million, resulting in a pre-tax gain of $85 million. The transaction included all PS&E solutions, which provided a comprehensive set of technology solutions to address public safety and public administration needs of government entities as well as the needs of K-12 school districts. The divestiture is consistent with our strategy to serve the financial services markets. Cash proceeds were used to reduce outstanding debt (see Note 12 of the Notes to Consolidated Financial Statements). Net cash proceeds, after payment of taxes and transaction-related expenses, were approximately $500 million. The PS&E business was included in the Corporate and Other segment. The sale did not meet the standard necessary to be reported as discontinued operations; therefore, the pre-tax gain and related prior period earnings remain reported within earnings from continuing operations.

On November 30, 2015, we completed the SunGard acquisition. The results of operations and financial position of SunGard are included in the Consolidated Financial Statements since the date of acquisition.

During the second quarter of 2015, we sold certain assets associated with our gaming industry check warranty business, resulting in a pre-tax gain of $139 million, which is included in Other income (expense), net. The sale did not meet the

standard necessary to be reported as discontinued operations; therefore, the gain and related prior period earnings remain reported within earnings from continuing operations.

The purchase price for our 2010 acquisition of Capco included future contingent consideration in addition to cash paid at closing. The liability for the earn-out provisions and for an employee incentive plan established in conjunction with the acquisition were adjusted in 2013 as a result of amendments based on management's outlook and increased projections of Capco's future results.

As discussed in Note 17 of the Notes to Consolidated Financial Statements, we have sold a number of businesses and certain of those businesses have been classified as discontinued for all periods presented.

PART II

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations*

Note: The information contained in this Item has been updated to recast certain prior period financial information to reflect our retrospective application of the new revenue accounting standard ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)" ("ASU 2014-09"). The resulting changes are as follows:

- *The "Revenue Recognition" section under the caption "Critical Accounting Polices" has been updated to reflect our retrospective application of ASU No. 2014-09.*
- *The financial data and related analysis under the captions "Consolidated Results of Operations" and "Segment Results of Operations" have been recast to reflect our retrospective application of ASU No. 2014-09.*
- *ASU 2014-09 has been moved under "Recently Adopted Accounting Guidance" under the caption "Recent Accounting Pronouncements" and amounts have been updated to reflect actual results from the retrospective application of ASU No. 2014-09.*
- *All references to footnotes are to the new audited consolidated financial statements included with this Form 8-K under "Exhibit 99.6".*

This Item has not been updated for any other changes since the filing of the 2017 Annual Report on Form 10-K ("2017 Annual Report") with the U.S. Securities and Exchange Commission ("SEC") on February 22, 2018. For developments since the filing of the 2017 Annual Report, refer to our Quarterly Report on Form 10-Q for the quarter ended March 31, 2018, and other filings by the Company with the SEC.

The following section discusses management's view of the financial condition and results of operations of FIS and its consolidated subsidiaries as of December 31, 2017 and 2016 and for the years ended December 31, 2017, 2016 and 2015.

This section should be read in conjunction with the audited Consolidated Financial Statements and related Notes of FIS included elsewhere in this Annual Report. Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements. See "Forward-Looking Statements" and "Risk Factors" for a discussion of the uncertainties, risks and assumptions associated with these forward-looking statements that could cause future results to differ materially from those reflected in this section.

Overview

FIS is a global leader in financial services technology with a focus on retail and institutional banking, payments, asset management and wealth and retirement, risk and compliance and outsourcing solutions. Through the depth and breadth of our solutions portfolio, global capabilities and domain expertise, FIS serves more than 20,000 clients in over 130 countries. Headquartered in Jacksonville, Florida, FIS employs more than 53,000 people worldwide and holds leadership positions in payment processing, financial software and banking solutions. Providing software, services and outsourcing of the technology that empowers the financial world, FIS is a Fortune 500 company and is a member of the Standard & Poor's 500® Index.

We have grown organically as well as through acquisitions, which have contributed critical applications and services that complement or enhance our existing offerings, diversifying our revenues by customer, geography and service offering. The completion of the SunGard acquisition on November 30, 2015 increased our existing portfolio to include solutions that automate a wide range of complex business processes for financial services institutions and corporate and government treasury departments.

In 2015, FIS finalized a reorganization and began reporting its financial performance based on three segments: Integrated Financial Solutions ("IFS"), Global Financial Solutions ("GFS") and Corporate and Other. We recast all previous periods to
conform to the new segment presentation. Following our November 30, 2015 acquisition of SunGard, the SunGard business was included within the GFS segment as its economic characteristics, international business model, and various
other factors largely aligned with those of our GFS segment. As we further integrated the acquired SunGard businesses through March 31, 2016, we reclassified certain SunGard businesses (corporate liquidity and wealth and retirement) that are
oriented more to the retail banking and payments activities of IFS into that segment. Certain other businesses from both SunGard (public sector and education businesses, which were divested in February 2017), and legacy FIS (global commercial services and retail check processing) were reclassified to the Corporate and Other segment, as were SunGard administrative expenses. Prior periods were reclassified to conform to the current segment presentation. A description of these segments is

included in Note 21 of the Notes to Consolidated Financial Statements. Revenues by segment and the results of operations of our segments are discussed below in Segment Results of Operations.

Business Trends and Conditions

Our revenue is primarily derived from a combination of recurring technology and processing services, professional services and software license fees. The majority of our revenue has historically been recurring, and has been provided under multi-year contracts that contribute relative stability to our revenue stream. These services, in general, are considered critical to our clients' operations. A considerable portion of these recurring revenues is derived from transaction processing fees that fluctuate with the level of accounts and card transactions, among other variable measures, associated with consumer, commercial and capital markets activity. Professional services revenues are typically non-recurring, and sales of software licenses are less predictable, a portion of which can be regarded as discretionary spending by our clients.

The SunGard acquisition broadened our solution portfolio, enabling us to expand beyond our traditional banking and payments markets into the institutional and wholesale side of financial institutions as well as other capital markets organizations. It also significantly expanded our existing solutions and client base in wealth and retirement, treasury and corporate payments. These solutions are in demand among our regional and community financial institution clients as they look for ways to replace highly regulated fee revenues. The combination also favorably impacted our revenue mix, with a greater concentration of license revenues and higher margin services. Through the integration of SunGard into our existing operations, we achieved significant cost savings around administration and technology expenses, and exited 2017 with a cost synergy run-rate savings exceeding $325 million.

We are actively migrating many financial institutions to outsourced integrated technology solutions to improve their profitability and address increasing and on-going regulatory requirements. As a provider of outsourcing solutions, we benefit from multi-year recurring revenue streams, which help moderate the effects of broader year-to-year economic and market changes that otherwise might have a larger impact on our results of operations. We believe our integrated solutions and outsourced services are well positioned to address this outsourcing trend across the markets we serve.

Consumer preference continues to shift from traditional branch banking services to digital banking solutions, and our clients seek to provide a single integrated banking experience through their branch, mobile, internet and voice banking channels. We are focused on enabling our clients to deliver this experience to their customers through our integrated solutions and services. We continue to innovate and invest in these integrated solutions and services to assist clients as they address this market demand. This is an area of on-going competition from global banks, international providers, and disruptive technology innovators.

We continue to see demand for innovative solutions in the payments market that will deliver faster, more convenient payment solutions in mobile channels, internet applications and cards. We believe digital payments will grow and partially replace existing payment tender volumes over time as consumers and merchants embrace the convenience, incremental services and benefits. Digital payment volume is growing significantly but does not yet represent a meaningful amount of the payments market. Additionally, new formidable non-traditional payments competitors and large merchants are investing in and innovating digital payment technologies to address the emerging market opportunity, and it is unclear the extent to which particular technologies or services will succeed. We believe the growth of digital payments continues to present both an opportunity and a risk to us as the market develops. Although we cannot predict which digital payment technologies or solutions will be successful, we cautiously believe our client relationships, payments infrastructure and experience, adapted solutions and emerging solutions are well positioned to maintain or grow our clients' existing payment volumes, which is our focus.

High profile North American merchant payment card information security breaches have pushed the payment card industry towards EMV integrated circuit cards as financial institutions, card networks and merchants seek to improve information security and reduce fraud costs. We invested in our card management solutions and card manufacturing and processing capabilities to accommodate EMV integrated circuit cards so we can continue to guide our clients through this technology transition, and grow our card driven businesses. A large portion of the migration to EMV is complete. The remaining migration will continue as financial institutions issue replacement cards.

We anticipate consolidation within the banking industry will continue, primarily in the form of merger and acquisition activity, which we believe as a whole is detrimental to our business. However, consolidation resulting from specific merger and acquisition transactions may be beneficial to our business. When consolidations of financial institutions occur, merger partners often operate systems obtained from competing service providers. The newly formed entity generally makes a determination to migrate its core and payments systems to a single platform. When a financial institution processing client is involved in a

consolidation, we may benefit by their expanding the use of our services if such services are chosen to survive the consolidation and support the newly combined entity. Conversely, we may lose revenue if we are providing services to both entities, or if a client of ours is involved in a consolidation and our services are not chosen to survive the consolidation and support the newly combined entity. It is also possible that larger financial institutions resulting from consolidation may have greater leverage in negotiating terms or could decide to perform in-house some or all of the services that we currently provide or could provide. We seek to mitigate the risks of consolidations by offering other competitive services to take advantage of specific opportunities at the surviving company.

Notwithstanding challenging global economic conditions, our on-going international business continued to experience growth on a constant currency basis. Demand for our solutions may also continue to be driven in developing countries by government-led financial inclusion policies aiming to reduce the unbanked population and by growth in the middle classes in these markets driving the need for more sophisticated banking solutions. The majority of our European revenue is generated by clients in the United Kingdom, France and Germany. In 2017, we have experienced minimal foreign currency impacts.

Brazilian Venture revenue attributable to our Brazilian Venture partner, Banco Bradesco, was $317 million in 2017. The contract that we have with our Brazilian Venture partner allows for the termination or partial termination of the contract, which ends September 30, 2020, at any point during the 10-year term if minimum targets are met. Minimum targets under the Brazilian Venture agreement have been met and the parties have begun negotiations to determine their future business relationship. During these negotiations, the Brazilian Venture agreement remains in effect. Depending on the results of these negotiations, our future revenue and earnings growth in Brazil could be adversely impacted. For further detail on our Brazilian Venture see Note 19 of the Notes to Consolidated Financial Statements.

Globally, attacks on information technology systems continue to grow in frequency, complexity and sophistication. This is a trend we expect to continue. Such attacks have become a point of focus for individuals, businesses and governmental entities. The objectives of these attacks include, among other things, gaining unauthorized access to systems to facilitate financial fraud, disrupt operations, cause denial of service events, corrupt data, and steal non-public information. These circumstances present both a threat and an opportunity for FIS. As part of our business, we electronically receive, process, store and transmit a wide range of confidential information, including sensitive customer information and personal consumer data. We also operate payment, cash access and prepaid card systems.

FIS remains focused on making strategic investments in information security to protect our clients and our information systems. This includes both capital expenditures and operating expense on hardware, software, personnel and consulting services. We also participate in industry and governmental initiatives to improve information security for our clients. Through the expertise we have gained with this ongoing focus and involvement, we have developed fraud, security, risk management and compliance solutions to target this growth opportunity in the financial services industry.

As described in Note 17 of the Notes to Consolidated Financial Statements, on July 31, 2017, we sold a majority interest in certain of our consulting businesses to affiliates of CD&R. These businesses had lower margins than many of our other businesses. The consulting businesses sold were included within the GFS and IFS segments. Also, on Feburary 1, 2017, we sold our PS&E business, which had been included in our Corporate and Other segment.

Critical Accounting Policies

The accounting policies described below are those we consider critical in preparing our Consolidated Financial Statements. These policies require management to make estimates, judgments and assumptions that affect the reported amounts of assets and liabilities and disclosures with respect to contingent liabilities and assets at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses during the reporting periods. Actual amounts could differ from those estimates. See Note 2 of the Notes to Consolidated Financial Statements for a more detailed description of the significant accounting policies that have been followed in preparing our Consolidated Financial Statements.

Revenue Recognition

The Company generates revenues in a number of ways, including from the delivery of account- or transaction-based processing, professional services, software licensing, software as a service ("SaaS"), business process as a service ("BPaaS"), cloud revenue and software related services. We are frequently a party to multiple concurrent contracts with the same client. These situations require judgment to determine whether the individual contracts should be combined or evaluated separately for purposes of revenue recognition. In making this determination, we consider the timing of negotiating and executing the contracts, whether the different elements of the contracts are negotiated as a package with a single commercial objective, whether the solutions or services promised in the contracts are a single performance obligation, and whether any of the

payment terms of the contracts are interrelated. Our individual contracts also frequently include multiple promised solutions or services. At contract inception, we assess the solutions and services promised in our contracts with customers and identify a performance obligation for each promise to transfer to the customer a solution or service (or bundle of solutions or services) that is distinct - i.e., if a solution or service is separately identifiable from other items in the bundled package and if a customer can benefit from it on its own or with other resources that are readily available to the customer. We must apply judgment in these circumstances in determining whether individual promised solutions or services can be considered distinct or should instead be combined with other promised solutions or services in the contract. We recognize revenue when or as we satisfy a performance obligation by transferring control of a solution or service to a customer. We must use judgment to determine the appropriate measure of progress for performance obligations satisfied over time and the timing of when the customer obtains control for performance obligations satisfied at a point in time. Judgment is also required in estimating and allocating variable consideration to one or more, but not all, performance obligations in a contract, determining the standalone selling prices of each performance obligation, and allocating the transaction price to each distinct performance obligation in a contract.

Due to the large number, broad nature and average size of individual contracts we are party to, the impact of judgments and assumptions that we apply in recognizing revenue for any single contract is not likely to have a material effect on our consolidated operations or financial position. However, the broader accounting policy assumptions that we apply across similar contracts or classes of clients could significantly influence the timing and amount of revenue recognized in our historical and future results of operations or financial position. Additional information about our revenue recognition policies is included in Note 2 to the Consolidated Financial Statements.

Computer Software

Computer software includes the fair value of software acquired in business combinations, purchased software and capitalized software development costs. Purchased software is recorded at cost and amortized using the straight-line method over its estimated useful life, which is generally three to five years. Software acquired in business combinations is recorded at its fair value and amortized using straight-line or accelerated methods over its estimated useful life, which is three to ten years (as discussed below in the Critical Accounting Policy section Purchase Accounting). As of December 31, 2017 and December 31, 2016, computer software, net of accumulated amortization, was $1.7 billion and $1.6 billion, respectively, and amortization of computer software was $436 million, $396 million, and $229 million for the years ended December 31, 2017, 2016, and 2015, respectively. Balances related to acquired software represent a significant portion of these balances, particularly for the periods after the acquisition of SunGard, which resulted in acquired software of $674 million.

The capitalization of software development costs is governed by FASB ASC Subtopic 985-20 if the software is to be sold, leased or otherwise marketed, or by FASB ASC Subtopic 350-40 if the software is for internal use. After the technological feasibility of the software has been established (for software to be marketed), or at the beginning of application development (for internal-use software), software development costs, which include primarily salaries and related payroll costs and costs of independent contractors incurred during development, are capitalized. Research and development costs incurred prior to the establishment of technological feasibility (for software to be marketed), or prior to application development (for internal-use software), are expensed as incurred. Evaluating whether technological feasibility has been achieved requires the use of management judgment.

Software development costs are amortized on a product-by-product basis commencing on the date of general release of the solutions (for software to be marketed) or the date placed in service (for internal-use software). Software development costs for software to be marketed are amortized using the greater of (1) the straight-line method over its estimated useful life, which ranges from three to 10 years, or (2) the ratio of current revenues to total anticipated revenues over its useful life.

In determining useful lives, management considers historical results and technological trends that may influence the estimate. Useful lives for all computer software range from three to 10 years.

We also assess the recorded value of computer software for impairment on a regular basis by comparing the carrying value to the estimated future cash flows to be generated by the underlying software asset (for software to be marketed). There are inherent uncertainties in determining the expected useful life or cash flows to be generated from computer software. For the years ended December 31, 2017, 2016, and 2015, respectively, we have not had more than minimal charges for impairments of software. While we have not historically experienced significant changes in these balances due to changes in estimates, our results of operations could be subject to such changes in the future.

Purchase Accounting

We are required to allocate the purchase price of acquired businesses to the assets acquired and liabilities assumed in the transaction at their estimated fair values. The estimates used to determine the fair value of long-lived assets, such as intangible assets or computer software, are complex and require a significant amount of management judgment. We generally engage independent valuation specialists to assist us in making fair value determinations.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, we are required to record provisional amounts in the financial statements for the items for which the accounting is incomplete. Adjustments to provisional amounts initially recorded that are identified during the measurement period are recognized in the reporting period in which the adjustment amounts are determined. This includes any effect on earnings of changes in depreciation, amortization, or other income effects as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. During the measurement period, we are also required to recognize additional assets or liabilities if new information is obtained about facts and circumstances that existed as of the acquisition date that, if known, would have resulted in the recognition of those assets and liabilities as of that date. The measurement period ends the sooner of one year from the combination date or when we receive the information we were seeking about facts and circumstances that existed as of the acquisition date or we learn that more information is not obtainable.

We are also required to estimate the useful lives of intangible assets to determine the amount of acquisition-related intangible asset amortization expense to record in future periods. We periodically review the estimated useful lives assigned to our finite-lived intangible assets to determine whether such estimated useful lives continue to be appropriate. Additionally, we review our indefinite-lived intangible assets to determine if there is any change in circumstances that may indicate the asset’s useful life is no longer indefinite.

We had no significant business combinations during the 2016 and 2017 periods.

Goodwill and Other Intangible Assets

Goodwill represents the excess of cost over the fair value of identifiable assets acquired and liabilities assumed in business combinations. Goodwill and other intangible assets with indefinite useful lives should not be amortized, but shall be tested for impairment annually, or more frequently if circumstances indicate potential impairment. FASB ASC Topic 350 allows an entity first to assess qualitatively whether it is more likely than not that a reporting unit's carrying amount exceeds its fair value, referred to in the guidance as "step zero." If an entity concludes that it is more likely than not that a reporting unit's fair value is less than its carrying amount (that is, a likelihood of more than 50 percent), the "step one" quantitative assessment must be performed for that reporting unit. ASC Topic 350 provides examples of events and circumstances that should be considered in performing the "step zero" qualitative assessment, including macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, events affecting a reporting unit or the entity as a whole and a sustained decrease in share price.

In applying the quantitative analysis, we determine the fair value of our reporting units based on a weighted average of multiple valuation techniques, principally a combination of an income approach and a market approach. The income approach calculates a value based upon the present value of estimated future cash flows, while the market approach uses earnings multiples of similarly situated guideline public companies. If the fair value of a reporting unit exceeds the carrying value of the reporting unit’s net assets, goodwill is not impaired and further testing is not required.

We assess goodwill for impairment on an annual basis during the fourth quarter using a September 30 measurement date unless circumstances require a more frequent measurement. For each of 2017 and 2016, we began our annual impairment test with the step zero qualitative analysis. In performing the step zero qualitative analysis for each year, examining those factors most likely to affect our valuations, we concluded that it remained more likely than not that the fair value of each of our reporting units continued to exceed their carrying amounts. Consequently, we did not perform a step one quantitative analysis specifically for the purpose of our annual impairment test in any year presented in these financial statements.

We also estimate the fair value of acquired intangible assets with indefinite lives and compare this amount to the underlying carrying value annually. Similar to the ASC Topic 350 guidance for goodwill, ASC Section 360-10-35 allows an organization to first perform a qualitative assessment of whether it is more likely than not that an indefinite-lived intangible asset has been impaired.

We engaged independent specialists to perform a valuation of our indefinite-lived intangible assets in 2016 and 2015, using a form of income approach valuation known as the relief-from-royalty method. For 2017, we began our assessment of

indefinite lived intangibles with the step zero qualitative analysis because there was a substantial excess of fair value over carrying value for each of our indefinite-lived intangible assets based on the 2016 and 2015 independent valuations. Based upon the results of these assessments, there were no indications of impairment.

Determining the fair value of a reporting unit or acquired intangible assets with indefinite-lives involves judgment and the use of significant estimates and assumptions, which include assumptions regarding forecasted revenue growth rates, operating margins, capital expenditures, tax rates, and other factors used to calculate estimated future cash flows. In addition, risk-adjusted discount rates and future economic and market conditions and other assumptions are applied. Goodwill was $13.7 billion and $14.2 billion as of December 31, 2017 and 2016, respectively, and indefinite-lived intangibles was $48 million and $80 million as of December 31, 2017 and 2016, respectively. As a result, a meaningful change in one or more of the underlying forecasts, estimates, or assumptions used in testing these assets for impairment could result in a material impact on the Company's results of operations and financial position. However, because there was a substantial excess of fair value over carrying value in each of our previous independent valuations, we believe the likelihood of obtaining materially different results based on a change of assumptions is low.

Accounting for Income Taxes

As part of the process of preparing the Consolidated Financial Statements, we are required to determine income taxes in each of the jurisdictions in which we operate. This process involves estimating actual current tax expense together with assessing temporary differences resulting from differing recognition of items for income tax and financial reporting purposes. These differences result in deferred income tax assets and liabilities, which are included within the Consolidated Balance Sheets. Management uses bests estimates and assumptions available during this process.

We must then assess the likelihood that deferred income tax assets will be recovered from future taxable income and, to the extent we believe that recovery is not likely, establish a valuation allowance. To the extent we establish a valuation allowance or increase or decrease this allowance in a period, we must reflect this increase or decrease as an expense or benefit within income tax expense in the Consolidated Statements of Earnings. We consider history of losses, forecasted earnings, statutory usage limitations of the deferred tax asset and possible tax planning strategies in determining whether or not we believe a valuation allowance is necessary.

Determination of the income tax expense requires estimates and can involve complex issues that may require an extended period to resolve. Further, changes in the geographic mix of revenues or in the estimated level of annual pre-tax income can cause the overall effective income tax rate to vary from period to period. We also receive periodic assessments from taxing authorities challenging our positions that must be taken into consideration in determining our tax reserves. Resolving these assessments, which may or may not result in additional taxes due, may also require an extended period of time. We believe our tax positions comply with applicable tax law and we adequately account for any known tax contingencies. We reserve for uncertain tax positions using a two-step process. First we determine if the tax position meets the more likely than not recognition threshold based on all available evidence and second, we estimate the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement. We believe the estimates and assumptions used to support our evaluation of tax benefit realization are reasonable. However, final determination of prior-year tax liabilities, either by settlement with tax authorities or expiration of statutes of limitations, could be materially different than estimates reflected in assets and liabilities and historical income tax provisions. The outcome of these final determinations could have a material effect on our income tax provision, net income or cash flows in the period that a determination is made.

Related Party Transactions

We are a party to certain historical related party agreements as discussed in Note 19 of the Notes to Consolidated Financial Statements included in Item 8 of Part II of this Annual Report.

Factors Affecting Comparability

Our Consolidated Financial Statements included in this report, which presents our financial position and results of operations, reflect the following significant transactions:

- On November 30, 2015, we completed the SunGard acquisition for consideration of approximately 41.8 million shares of common stock of FIS and approximately $2,335 million in cash. In addition, we issued restricted stock units ("RSUs") to SunGard employees covering approximately 2.4 million shares of FIS common stock in exchange for unvested SunGard RSUs. FIS also repaid approximately $4.7 billion in aggregate principal amount of SunGard debt. We funded the cash portion of the merger consideration, the pay-off of the indebtedness of SunGard and the payment

of transaction-related expenses through a combination of available cash-on-hand and proceeds from debt financings, including proceeds from an issuance in October 2015 of $4.5 billion aggregate principal amount of senior unsecured notes of FIS. SunGard's results of operations and financial position have been included in the Consolidated Financial Statements from and after the date of acquisition. See Note 5 of the Notes to Consolidated Financial Statements included in Item 8 of Part II of this Annual Report.

- On July 31, 2017, FIS closed on the sale of a majority ownership stake in its Capco consulting business and risk and compliance consulting business to CD&R, for cash proceeds of approximately $469 million, resulting in a pre-tax loss of $41 million. The divestiture is consistent with our strategy to focus on our IP-led businesses. CD&R acquired preferred units convertible into 60% of the common units of the venture, Cardinal, and FIS obtained common units representing the remaining 40%, in each case before equity is issued to management. The preferred units are entitled to a quarterly dividend at an annual rate of 12%, payable in cash (if available) or additional preferred units at FIS' option. The businesses sold were included within the GFS and IFS segments. The sale did not meet the standard necessary to be reported as discontinued operations; therefore, the pre-tax loss and related prior period earnings remain reported within earnings from continuing operations.

  FIS' 40% ownership in Cardinal was initially valued at $172 million and was recorded as an equity method investment included within other noncurrent assets on the Consolidated Balance Sheet. After the sale on July 31, 2017, FIS began to recognize the earnings in after-tax equity method investment earnings outside of operating income and segment Adjusted EBITDA. For periods prior to July 31, 2017, the Capco consulting business and risk and compliance consulting business were included within operating income and segment Adjusted EBITDA.

- On February 1, 2017, the Company closed on the sale of PS&E business for $850 million, resulting in a pre-tax gain of $85 million. The transaction included all PS&E solutions, which provided a comprehensive set of technology solutions to address public safety and public administration needs of government entities as well as the needs of K-12 school districts. The divestiture is consistent with our strategy to serve the financial services markets. Cash proceeds were used to reduce outstanding debt (see Note 12 of the Notes to Consolidated Financial Statements). Net cash proceeds after payment of taxes and transaction-related expenses were approximately $500 million. The PS&E business was included in the Corporate and Other segment. The sale did not meet the standard necessary to be reported as discontinued operations; therefore, the gain and related prior period earnings remain reported within earnings from continuing operations.

- We have engaged in share repurchases in prior periods presented. In 2017 and 2015, we repurchased a total of approximately 1.0 million shares for $105.0 million and 5 million shares for $300 million, respectively. There were no share repurchases in 2016.

- The effective tax rate for the 2017 period included a net benefit of $761 million related to tax reform items and a net benefit of $65 million related to the recognition of excess tax benefit for stock compensation pursuant to the adoption of ASU 2016-19.

As a result of the above transactions, our financial position, results of operations, earnings per share and cash flows in the periods covered by the Consolidated Financial Statements may not be directly comparable.

Consolidated Results of Operations
(in millions, except per share amounts)

	2017	2016	2015
Revenues	$ 8,668	$ 8,831	$ 6,260
Cost of revenues	5,794	5,895	4,071
Gross profit	2,874	2,936	2,189

Amounts attributable to FIS common stockholders:			
Earnings from continuing operations, net of tax	$ 1,261	$ 524	$ 631
Earnings (loss) from discontinued operations, net of tax	—	1	(7)
Net earnings attributable to FIS	$ 1,261	$ 525	$ 624

* Amounts may not sum due to rounding.

Revenues

Revenues for 2017 decreased $163 million, or 1.8%, due to the reduction in revenue from the sale of the PS&E business during the first quarter of 2017 and the sale of the Capco consulting business and the risk and compliance consulting business during the third quarter of 2017. These decreases were partially offset by: (1) increased demand in banking and wealth solutions excluding the effects of the risk and compliance consulting business sale; (2) volume growth in payment solutions in Brazil; (3) continued growth with our existing customers for our post-trade derivative solutions; and (4) growth in corporate and digital solutions. The 2017 period also benefited from a lower purchase accounting adjustment, as compared to the 2016 period, to reduce SunGard acquired deferred revenue to fair value and a $16 million favorable foreign currency impact

primarily resulting from a stronger Brazilian Real versus the U.S. Dollar, partially offset by a weaker Pound Sterling. See "Segment Results of Operations" for more detailed explanation.

Revenues for 2016 increased $2,571 million, or 41.1%, due to incremental revenues from the SunGard acquisition, as well as growth in our consulting business, increased demand for output solutions, increased card processing volumes in Brazil, card production activities associated with the roll-out of EMV cards across the industry, volume growth in debit payments and demand for regulatory and compliance solutions. The revenue increase was partially offset by $192 million of purchase accounting impact on deferred revenue (all of which was recorded as a contra-revenue item) and $100 million of unfavorable foreign currency impact primarily resulting from a stronger U.S. Dollar versus the Pound Sterling and Brazilian Real.

Cost of Revenues and Gross Profit

Cost of revenues totaled $5,794 million, $5,895 million and $4,071 million during 2017, 2016 and 2015, respectively, resulting in gross profit of $2,874 million, $2,936 million and $2,189 million, respectively. Gross profit as a percentage of revenues (“gross margin”) was 33.2%, 33.2% and 35.0% in 2017, 2016 and 2015, respectively. The decrease in gross profit for 2017 as compared to 2016 primarily resulted from the revenue variances noted above. The gross profit percentage for 2017 as compared to 2016 was negatively impacted by higher acquired intangible asset amortization expense resulting from the SunGard acquisition, partially offset by higher margin software licenses and the realization of ongoing expense synergies. The gross profit for 2016 as compared to 2015 was negatively impacted by higher acquired intangible asset amortization expense and higher incentive compensation during 2016. This negative impact was partially offset by the addition of higher margin revenues from SunGard, as well as on-going operating leverage in key markets outside of North America.

Selling, General and Administrative Expenses

Selling, general and administrative expenses for 2017 decreased $265 million, or 15.5%. The year-over-year decrease is primarily driven by the sale of PS&E during the first quarter of 2017, the sale of the Capco consulting business and risk and compliance consulting business during the third quarter of 2017 and integration and cost management initiatives.

Selling, general and administrative expenses for 2016 increased $605 million, or 54.9%, primarily resulting from incremental expenses associated with the SunGard acquisition and transaction costs, severance and costs of integration activities relating to acquisitions totaling $281 million.

Operating Income

Operating income totaled $1,432 million, $1,229 million and $1,087 million for 2017, 2016 and 2015, respectively. Operating income as a percentage of revenue (“operating margin”) was 16.5%, 13.9% and 17.4% for 2017, 2016 and 2015, respectively. The annual changes in operating income resulted from the revenue and cost variances addressed above. The increase in operating margin resulted primarily from integration and cost management initiatives and revenue from higher margin item processing solutions.

Total Other Income (Expense)

Interest expense is typically the primary component of total other income (expense), however, during 2017, other income (expense) was also a significant component.

The decrease of $44 million in interest expense in 2017 as compared to 2016 is primarily due to lower outstanding debt and lower weighted average interest rate on the outstanding debt.

The increase of $204 million in interest expense in 2016 as compared to 2015 is primarily due to higher outstanding debt associated with financing the SunGard acquisition, partially offset by lower borrowing rates as the result of the debt refinancing activity undertaken during 2016.

Other income (expense) net for 2017, includes: (1) a pre-tax charge of $171 million in tender premiums and the write-off of previously capitalized debt issuance costs on the repurchase of approximately $2,000 million in aggregate principal of debt securities; (2) a net pre-tax loss of $29 million on the sale of the Capco consulting and risk and compliance business and other divestitures; (3) a pre-tax charge of approximately $25 million due to the redemption of the Senior Notes due March 2022 and the pay down of the 2018 Term Loans, consisting of the call premium on the Senior Notes due March 2022 and the write-off of previously capitalized debt issuance costs; partially offset by (4) a pre-tax gain of $85 million on the sale of the PS&E business, an $8 million pre-tax gain on an investment sale and a $12 million foreign currency gain.

During 2016, FIS paid down the 2017 Term Loans and partially paid down the 2018 Term Loans resulting in a pre-tax charge upon extinguishment of approximately $2 million due to the write-off associated with previously capitalized debt issue costs. Additionally in 2016 as a result of these debt pay downs, FIS terminated interest rate swaps with a notional amount totaling $1,250 million resulting in a pre-tax loss of $2 million due to the release of fair value changes from other comprehensive earnings. Both of the charges were included in Other income (expense), net.

During the second quarter of 2015, we sold certain assets associated with our gaming industry check warranty business, resulting in proceeds of $238 million and a pre-tax gain of $139 million, which is included in Other income (expense), net. Other income expense, net for 2015 also includes financing costs of $17 million relating to the SunGard acquisition.

Provision (Benefit) for Income Taxes

Income tax (benefit) expense from continuing operations totaled $(321) million, $291 million and $375 million for 2017, 2016 and 2015, respectively. This resulted in an effective tax rate on continuing operations of (32.9)%, 34.8% and 36.6% for 2017, 2016 and 2015, respectively. The effective tax rate for the 2017 period included a net benefit of $761 million related to tax reform items including $48 million of tax credits due to tax planning strategies implemented in the fourth quarter, a net benefit of $65 million related to the recognition of excess tax benefit for stock compensation pursuant to the adoption of ASU 2016-19, and a net detriment of $180 million due to the book basis in excess of the tax basis of certain businesses sold during the year. The effective tax rate for the 2015 period included a $90 million write-off of goodwill with no tax basis in connection with the sale of our gaming industry check warranty business, resulting in a book gain on sale lower than the tax gain.

Equity Method Investment Earnings

On July 31, 2017, FIS obtained a 40% equity interest in Cardinal as further described in Note 17 of the Notes to Consolidated Financial Statements. As a result, we recorded a $3 million equity method investment loss from July 31, 2017 through the end of the year.

Earnings (Loss) from Discontinued Operations

During 2017, 2016 and 2015, certain operations are classified as discontinued, as discussed in Note 17 of the Notes to Consolidated Financial Statements. Reporting for discontinued operations classifies revenues and expenses as one line item, net of tax, in the Consolidated Statements of Earnings. The table below outlines the components of discontinued operations for 2017, 2016 and 2015, net of tax (in millions):

Earnings (loss), net of tax	**2017**	**2016**	**2015**
eCas business line	$ —	$ —	$ (4)
Participacoes operations	—	1	(3)
Total discontinued operations	$ —	$ 1	$ (7)

During the second quarter of 2014, the Company committed to a plan to sell our business operation that provides eCas core banking software solutions to small financial institutions in China because it did not align with our strategic plans. We entered into a purchase agreement in January 2015 to sell this business and the transaction closed during the second quarter of 2015.

Participacoes, our former item processing and remittance services business in Brazil, had no revenue in 2017, 2016 and 2015. Participacoes' processing volume was transitioned to other vendors or back to its clients during the second quarter of 2011. Participacoes had earnings (losses) before taxes of $0 million, $2 million and $(5) million during the years ended December 31, 2017, 2016 and 2015, respectively. The shut-down activities involved the transfer and termination of approximately 2,600 employees, which was completed in 2011. Former employees generally had up to two years from the date of terminations, extended through April 2013, to file labor claims and a number of them did file labor claims. As of December 31, 2017, there were approximately 320 active claims remaining. Consequently, we have continued exposure on these active claims, which were not transferred with other assets and liabilities in the disposal.

Net (Earnings) Loss Attributable to Noncontrolling Interest

Net (earnings) loss attributable to noncontrolling interest predominantly relates to the joint venture in Brazil (see Note 19 of the Notes to Consolidated Financial Statements) and totaled $(33) million, $(22) million and $(19) million for 2017, 2016 and 2015, respectively.

Earnings from Continuing Operations, Net of Tax, Attributable to FIS Common Stockholders

Earnings from continuing operations, net of tax, attributable to FIS common stockholders totaled $1,261 million, $524 million and $631 million for 2017, 2016 and 2015, respectively, or $3.75, $1.59 and $2.18 per diluted share, respectively, due to the factors described above coupled with the impact of our share repurchase initiatives.

Segment Results of Operations

Adjusted EBITDA is defined as EBITDA (defined as net income (loss) before net interest expense, income tax provision (benefit) and depreciation and amortization, including amortization of purchased intangibles), plus certain non-operating items. This measure is reported to the chief operating decision maker for purposes of making decisions about allocating resources to the segments and assessing their performance. For this reason, Adjusted EBITDA, as it relates to our segments, is presented in conformity with Accounting Standards Codification Topic 280, "Segment Reporting". The non-operating items affecting the segment profit measure generally include acquisition accounting adjustments, acquisition, integration and severance costs, and restructuring expenses. For consolidated reporting purposes, these costs and adjustments are recorded in the Corporate and Other segment for the periods discussed below. Adjusted EBITDA for the respective segments excludes the foregoing costs and adjustments. Financial information, including details of our adjustments to EBITDA, for each of our segments is set forth in Note 21 of the Notes to Consolidated Financial Statements included in Part II of this Annual Report.

Integrated Financial Solutions

	2017	2016	2015
		(In millions)	
Revenues	$ 4,260	$ 4,178	$ 3,485
Adjusted EBITDA	$ 1,874	$ 1,792	$ 1,554

Year ended December 31, 2017:

Revenues increased $82 million, or 2.0%, due to: (1) increased demand in banking and wealth solutions excluding the effects of the risk and compliance consulting business sale contributing 2.9%; (2) growth in payment solutions excluding the card production business contributing 0.7%; (3) growth in corporate and digital solutions contributing 0.9%; partially offset by (4) the decline and sale of the risk and compliance consulting business contributing (1.4%); and (5) the slow-down in card production activities associated with the roll-out of EMV contributing (1.2%).

Adjusted EBITDA increased $82 million, or 4.6%, primarily resulting from the revenue variances noted above. Adjusted EBITDA margin increased 110 basis points to 44.0% primarily resulting from the favorable revenue mix shift and continued cost management.

Year ended December 31, 2016:

Revenues increased $693 million, or 19.9%, due to incremental revenues from our 2015 SunGard acquisition contributing 14.2%, demand for output solutions contributing 1.7%, card production activities associated with the roll-out of EMV across the industry contributing 1.1%, demand for regulatory and compliance solutions and IT solutions contributing 1.2%, volume growth in card payments and related fraud services demand contributing 0.6%, and growth in mobile banking and internet solutions contributing 0.7%.

Adjusted EBITDA increased $238 million, or 15.3%, primarily resulting from the revenue variances noted above. Adjusted EBITDA margin decreased 170 basis points to 42.9% primarily resulting from the revenue mix and higher incentive compensation in 2016.

Global Financial Solutions

	2017	2016	2015
		(In millions)	
Revenues	$ 4,050	$ 4,183	$ 2,349
Adjusted EBITDA	$ 1,323	$ 1,211	$ 541

Year ended December 31, 2017:

Revenues decreased $133 million, or (3.2)%, primarily due to the sale of the Capco consulting business contributing (5.4%), partially offset by continued growth in our post-trade derivatives utility contributing 0.6%, volume growth in payment solutions in Brazil contributing 0.9% and a favorable currency impact contributing 0.4% primarily resulting from a stronger Brazilian Real versus the U.S. Dollar, partially offset by a weaker Pound Sterling.

Adjusted EBITDA increased $112 million, or 9.2%, primarily resulting from higher margin revenues and the realization of ongoing expense synergies. Adjusted EBITDA margins increased 370 basis points to 32.7%, primarily resulting from growth in higher margin licenses, the divestiture of the Capco consulting business, as well as realization of ongoing expense synergies.

Year ended December 31, 2016:

Revenues increased $1,834 million, or 78.1%, including approximately $92 million of unfavorable foreign currency impact, primarily resulting from a stronger U.S. Dollar versus the Pound Sterling and Brazilian Real. Excluding the foreign currency impact, revenue increases were primarily attributable to: (1) incremental revenue from the SunGard acquisition contributing 77.7%; (2) increased card processing volumes in Brazil contributing 1.7%; (3) growth in our consulting business contributing 1.4%; and (4) growth in payment processing in the Asia Pacific region contributing 0.9%.

Adjusted EBITDA increased $670 million, or 123.8%, primarily resulting from the revenue variances noted above. Adjusted EBITDA margins increased 600 basis points to 29.0% primarily resulting from the addition of higher margin revenues from SunGard and the execution of our integration plans contributing to margin expansion in the GFS segment.

Corporate and Other

	2017	2016	2015
		(In millions)	
Revenues	$ 358	$ 470	$ 426
Adjusted EBITDA	$ (213)	$ (148)	$ (88)

The Corporate and Other segment results consist of selling, general and administrative expenses and depreciation and intangible asset amortization not otherwise allocated to the reportable segments. Corporate and Other also includes operations from non-strategic businesses, including commercial services, PS&E (which was divested on February 1, 2017), and check processing.

Year ended December 31, 2017:

Revenues decreased $112 million, or 23.8%, and was primarily due to the sale of the PS&E business during the first quarter of 2017 and a decline in the commercial services business, partially offset by lower 2017 SunGard purchase accounting impact on deferred revenue (all of which was recorded as a contra-revenue item in the Corporate and Other segment).

Adjusted EBITDA decreased $65 million, or 43.9%, primarily resulting from the reduction in revenue from the sale of the PS&E business during the first quarter of 2017, partially offset by integration and cost management initiatives.

Year ended December 31, 2016:

Revenues increased $44 million, or 10.3%, and was primarily attributable to the additions of the businesses from the SunGard acquisition contributing 56.1%, partially offset by a $192 million purchase accounting impact on deferred revenue (all of which was recorded as a contra-revenue item in the Corporate and Other segment).

Adjusted EBITDA decreased $60 million, or 68.2%, primarily resulting from the timing of incentives and incremental expenses of acquired companies, partially offset by the revenue variances noted above.

Liquidity and Capital Resources

Cash Requirements

Our ongoing cash requirements include operating expenses, income taxes, mandatory debt service payments, capital expenditures, stockholder dividends, working capital and timing differences in settlement-related assets and liabilities, and may include discretionary debt repayments, share repurchases and business acquisitions. Our cash requirements also include payments for labor claims related to FIS' former item processing and remittance operations in Brazil (see Note 17 of the Notes to Consolidated Financial Statements). Our principal sources of funds are cash generated by operations and borrowings, including the capacity under our Revolving Loan described in Note 12 of the Notes to Consolidated Financial Statements.

As of December 31, 2017, we had cash and cash equivalents of $665 million and debt of $8,763 million, including the current portion, net of capitalized debt issuance costs. Of the $665 million cash and cash equivalents, approximately $415 million is held by our foreign entities. The majority of our domestic cash and cash equivalents represents net deposits-in-transit at the balance sheet dates and relates to daily settlement activity. We expect that cash and cash equivalents plus cash flows from operations over the next twelve months will be sufficient to fund our operating cash requirements, capital expenditures and mandatory debt service.

We currently expect to continue to pay quarterly dividends. However, the amount, declaration and payment of future dividends is at the discretion of the Board of Directors and depends on, among other things, our investment opportunities, results of operations, financial condition, cash requirements, future prospects, and other factors that may be considered relevant by our Board of Directors, including legal and contractual restrictions. Additionally, the payment of cash dividends may be limited by covenants in certain debt agreements. A regular quarterly dividend of $0.32 per common share is payable on March 30, 2018 to shareholders of record as of the close of business on March 16, 2018.

Cash Flows from Operations

Cash flows from operations were $1,741 million, $1,925 million and $1,131 million in 2017, 2016 and 2015 respectively. Our net cash provided by operating activities consists primarily of net earnings, adjusted to add back depreciation and amortization. Cash flows from operations decreased $184 million in 2017 and increased $794 million in 2016. The 2017 decrease in cash flows from operations is primarily due to increased trade receivables resulting from timing differences in billing and collections and increased deferred contract costs. The 2016 increase in cash flows from operations is primarily due to increased net earnings, after the add back of non-cash depreciation and amortization, as a result of SunGard operations being included for the full year.

Capital Expenditures and Other Investing Activities

Our principal capital expenditures are for computer software (purchased and internally developed) and additions to property and equipment. We invested approximately $613 million, $616 million and $415 million in capital expenditures during 2017, 2016 and 2015, respectively. We expect to invest approximately 7% of 2018 revenue in capital expenditures.

In 2017, cash provided by net proceeds from sale of businesses relates to the sale of PS&E and the Capco consulting and risk and compliance businesses. In 2016 and 2015, we used $0 million and $1,720 million of cash, respectively, for acquisitions and other equity investments. See Note 5 of the Notes to Consolidated Financial Statements for a discussion of the more significant items. Cash provided by net proceeds from sale of assets in 2015 relates principally to the sale of check warranty contracts and other assets in the gaming industry discussed in Note 17 of the Notes to Consolidated Financial Statements.

Financing

For information regarding the Company's long-term debt and financing activity, see Note 12 of the Notes to Consolidated Financial Statements.

Contractual Obligations

FIS' long-term contractual obligations generally include its long-term debt, interest on long-term debt, lease payments on certain of its property and equipment and payments for data processing and maintenance. For information regarding the Company's long-term debt, see Note 12 of the Notes to Consolidated Financial Statements. The following table summarizes FIS' significant contractual obligations and commitments as of December 31, 2017 (in millions):

		Payments Due in			
Type of Obligations	**Total**	**Less than 1 Year**	**1-3 Years**	**3-5 Years**	**More than 5 Years**
Long-term debt (1)	$ 8,846	$ 1,045	$ 1,201	$ 2,251	$ 4,349
Interest (2)	877	186	325	210	156
Operating leases	344	87	141	74	42
Data processing and maintenance	420	198	177	36	9
Other contractual obligations (3)	37	9	18	10	—
Total	$ 10,524	$ 1,525	$ 1,862	$ 2,581	$ 4,556

(1) The principal amounts assume no changes in currency rates for our foreign notes relating to EUR and GBP.
(2) The calculations above assume that: (a) applicable margins and commitment fees remain constant; (b) all variable rate debt is priced at the one-month LIBOR rate in effect as of December 31, 2017; (c) no refinancing occurs at debt maturity; (d) only mandatory debt repayments are made; (e) no new hedging transactions are effected; and (f) there are no currency effects.
(3) Amount primarily includes the estimated payment for labor claims related to FIS' former item processing and remittance operations in Brazil (see Note 17 of the Notes to Consolidated Financial Statements), amounts due to the Brazilian venture partner and other contractual obligations.

FIS believes that its existing cash balances and cash flows from operations will provide adequate sources of liquidity and capital resources to meet FIS' expected liquidity needs for the operations of its business and expected capital spending for the next 12 months.

Off-Balance Sheet Arrangements

FIS does not have any off-balance sheet arrangements.

Recent Accounting Pronouncements

Recently Adopted Accounting Guidance

In September 2015, the FASB issued ASU No. 2015-16, "Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments" ("ASU 2015-16"). ASU 2015-16 requires adjustments to provisional amounts initially recorded in a business combination that are identified during the measurement period to be recognized in the reporting period in which the adjustment amounts are determined. This includes any effect on earnings of changes in depreciation, amortization, or other income effects as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. ASU 2015-16 also requires an entity to present separately on the face of the income statement or disclose in the notes the portion of the amount recorded in current-period earnings by line item that would have been recorded in previous reporting periods if the adjustment to the provisional amounts had been recognized as of the acquisition date. Prior to the issuance of the standard, entities were required to retrospectively apply adjustments made to provisional amounts recognized in a business combination. The guidance is effective for the fiscal years and interim periods within those years beginning after December 15, 2015. This guidance requires FIS to record and disclose any measurement-period adjustments for the SunGard acquisition or other future business combinations as current period adjustments as opposed to retroactive adjustments to the opening balance sheet of the acquired entity.

In November 2015, the FASB issued ASU No. 2015-17 ("ASU 2015-17"), "Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes". The amendment is intended to simplify the presentation of deferred taxes on the balance sheet. Under the new guidance, deferred tax assets and liabilities are to be classified as non-current assets and liabilities. This replaces the current guidance, which requires the deferred tax assets and liabilities to be presented as current and non-current. For public companies, the amendments are effective for annual periods beginning after December 15, 2016, and interim periods

within those annual periods. Thus, ASU 2015-17 was effective for FIS as of January 1, 2017. FIS applied prospectively the recording of deferred tax assets and liabilities as non-current and therefore, prior periods have not been adjusted.

On March 30, 2016, the FASB issued ASU No. 2016-09 ("ASU 2016-09"), "Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting." The amendments were intended to simplify and improve the accounting for employee share-based payments. Under the new guidance, all excess tax benefits and tax deficiencies over/under compensation expense recognized will be reflected in the income statement as they occur. This will replace the prior guidance, which required tax benefits that exceed compensation expense (windfalls) to be recognized in equity. It also eliminates the need to maintain a "windfall pool," and removes the requirement to delay recognizing a windfall until it reduces current taxes payable. The new guidance also changes the cash flow presentation of excess tax benefits, classifying them as operating inflows, consistent with other cash flows related to income taxes. Under prior guidance, windfalls were classified as financing activities. These changes may result in more volatile net earnings. Similarly, effective tax rates are subject to more variability since the new guidance reflects all tax benefit excesses and deficiencies in tax expense. Under prior practice, stock compensation generally did not impact the effective tax rate since any difference between compensation expense and the ultimate tax deduction was reflected in additional paid in capital. Also under the new guidance, excess tax benefits are no longer to be included in assumed proceeds from applying the treasury stock method when computing diluted earnings per share since they no longer are recognized in additional paid in capital. Consequently, the reduction to common stock equivalents for assumed purchases from proceeds are lower and the impact of common stock equivalents are more dilutive. For public companies, the amendments are effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. Thus, ASU 2016-09 was effective for FIS as of January 1, 2017. FIS applied prospectively the recording of excess tax benefits as income tax expense and the presentation of those benefits as an operating activity within the statement of cash flows and, therefore, prior periods have not been adjusted. During 2016 and 2015, we recorded $32 million and $29 million, respectively, to consolidated equity as excess tax benefits from our stock plans.

On August 26, 2016, the FASB issued ASU No. 2016-15 ("ASU 2016-15"), "Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments." The amendments are meant to reduce the diversity in how certain cash receipts and cash payments are presented in the statement of cash flows. ASU 2016-15 provides guidance as to the presentation on the statement of cash flows for eight specific cash flow issues, which are 1) debt prepayment for debt extinguishment costs, 2) settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing, 3) contingent consideration payments made after a business combination, 4) proceeds for the settlement of insurance claims, 5) proceeds from the settlement of corporate-owned life insurance policies, including bank-owned life insurance policies, 6) distributions received from equity method investees, 7) beneficial interests in securitization transactions, and 8) separately identifiable cash flows and application of the predominance principle. For public companies, the amendments are effective for annual periods beginning after December 15, 2018, and interim periods within those annual periods beginning after December 15, 2019. Early adoption is permitted for any organization in any interim or annual period. FIS elected to adopt this standard in the third quarter of 2017. FIS has applied the presentation guidance above to its statements of cash flows and all adjustments have been reflected on a retrospecive basis. The primary impact of adopting the new guidance is our 2017 presentation of debt prepayment and related costs being reflected in financing activities rather than operating activities. This adoption impacts 2017 cash flows but had no impact on 2016 or 2015.

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)" ("ASU 2014-09"). ASU 2014-09 amends substantially all authoritative literature for revenue recognition, including industry-specific requirements, and converges the guidance under this topic with that of the International Financial Reporting Standards. It also includes guidance on accounting for the incremental costs of obtaining and costs incurred to fulfill a contract with a customer. The ASU implements a five-step process for customer contract revenue recognition that focuses on transfer of control, as opposed to transfer of risk and rewards. The amendment also requires enhanced disclosures regarding the nature, amount, timing and uncertainty of revenues and cash flows from contracts with customers. The FASB has issued several amendments to Topic 606, including further guidance on principal versus agent consideration, clarification on identifying performance obligations and accounting for licenses of intellectual property.

The effective date of the standard was postponed to reporting periods beginning after December 15, 2017, with early adoption allowed for reporting periods beginning after December 15, 2016. We adopted the new standard effective January 1, 2018.

Entities can transition to the standard with retrospective application to the earliest years presented in their financial statements, retrospectively using certain practical expedients, or with a cumulative-effect adjustment as of the date of adoption. We adopted the new standard using the retrospective method with the application of certain practical expedients.

The largest impacts from the adoption of Topic 606 on our revenue recognition are related to the following areas:

- Certain revenues, particularly those related to interchange and third-party network fees associated with our payment processing business, previously recorded on a gross basis as a principal are now recorded on a net basis as an agent to the extent the Company does not control the good or service before it is transferred to the customer.
- Recognition of certain term license early renewals are now deferred until the conclusion of the term in effect at the time of renewal. Previously, term license early renewals were generally recognized upon execution of the renewal agreement.
- We now recognize the license portion of software rental fees in certain of our global trading, asset management, and securities processing businesses upon delivery. Previously, software license rental fees were recognized ratably over the rental period as the payments became due and payable.

Impacts related to other changes introduced by the standard were substantially less significant than those listed above.

Upon retrospective application of Topic 606, our revenues decreased by approximately $455 million, $410 million and $336 million and net earnings decreased approximately $58 million, $43 million and $8 million for the years ended December 31, 2017, 2016, and 2015, respectively. For the year ended December 31, 2017, the net earnings decrease included additional tax expense of approximately $21 million due to the re-measurement of deferred tax assets. We recorded a net reduction to opening retained earnings of approximately $15 million as of January 1, 2015 due to the cumulative impact of adopting the standard. The impact of Topic 606 on our 2017, 2016 and 2015 operating results may or may not be representative of the impact on subsequent years' results.

Recent Accounting Guidance Not Yet Adopted

On February 25, 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)" ("ASU 2016-02"). Under the new guidance, lessees will be required to recognize the following for all leases (with the exception of leases with a term of twelve months or less) at the commencement date: (a) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (b) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Under the new guidance, lessor accounting is largely unchanged. The pronouncement requires a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements. The modified retrospective approach would not require any transition accounting for leases that expire before the earliest comparative period presented. A full retrospective transition approach is not permitted. Public business entities should apply the amendments in ASU 2016-02 for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. Early adoption is permitted. We are currently assessing the impact the adoption of ASU 2016-02 will have on our financial position and results of operations.

On June 16, 2016, the FASB issued ASU No. 2016-13 ("ASU 2016-13"), "Financial Instrument - Credit Losses (Topic 326): Measurements on Credit Losses of Financial Instruments." This ASU's primary objectives are to implement new methodology for calculating credit losses on financial instruments (e.g., trade receivables) based on expected credit losses and broadens the types of information companies must use when calculating the estimated losses. Under current guidance, the credit losses are calculated based on multiple credit impairment objectives and recognition is delayed until the loss is probable to occur. Under the new guidance, financial assets measured at amortized cost basis must now be shown as the net amount expected to be collected. The credit loss allowance is a contra-valuation account. Available-for-sale securities should continue to be recognized in a similar manner to current GAAP; however, the allowance should be presented as an allowance instead of a write-down of the basis of the asset. For public companies that are SEC filers, the amendments are effective for annual periods beginning after December 15, 2019, and interim periods within those annual periods. Early adoption is permitted for any organization in any interim or annual period beginning after December 15, 2018. We do not plan to early adopt and expect that the new guidance will not have a material impact on our financial statement presentation, financial position, or results of operations.

PART II

Item 7A. ***Quantitative and Qualitative Disclosure About Market Risks***

Note: The information contained in this Item has been updated to recast certain prior period financial information to reflect our retrospective application of the new revenue accounting standard ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)" ("ASU 2014-09"). The resulting changes are as follows:

- *The financial data under the caption "Foreign Currency Risk" has been recast to reflect our retrospective application of ASU No. 2014-09.*
- *All references to footnotes are to the new audited consolidated financial statements included with this Form 8-K under "Exhibit 99.6".*

This Item has not been updated for any other changes since the filing of the 2017 Annual Report on Form 10-K (“2017 Annual Report”) with the U.S. Securities and Exchange Commission ("SEC") on February 22, 2018. For developments since the filing of the 2017 Annual Report, refer to our Quarterly Report on Form 10-Q for the quarter ended March 31, 2018, and other filings by the Company with the SEC.

Market Risk

We are exposed to market risks primarily from changes in interest rates and foreign currency exchange rates. We periodically use certain derivative financial instruments, including interest rate swaps and foreign currency forward contracts, to manage interest rate and foreign currency risk. We do not use derivatives for trading purposes, to generate income or to engage in speculative activity.

Interest Rate Risk

In addition to existing cash balances and cash provided by operating activities, we use fixed rate and variable rate debt to finance our operations. We are exposed to interest rate risk on these debt obligations and related interest rate swaps, if any.

The senior notes (as described in Note 12 of the Notes to Consolidated Financial Statements) represent substantially all of our fixed-rate long-term debt obligations as of December 31, 2017. The carrying value of the senior notes was $8,553 million as of December 31, 2017. The fair value of the senior notes was approximately $8,709 million as of December 31, 2017. The potential reduction in fair value of the senior notes from a hypothetical 10 percent increase in market interest rates would not be material to the overall fair value of the debt.

Our floating rate long-term debt obligations principally relate to borrowings under the FIS Credit Agreement (as defined in Note 12 of the Notes to Consolidated Financial Statements). An increase of 100 basis points in the LIBOR rate would increase our annual debt service under the FIS Credit Agreement by approximately $2 million (based on principal amounts outstanding as of December 31, 2017). We performed the foregoing sensitivity analysis based on the principal amount of our floating rate debt as of December 31, 2017. This sensitivity analysis is based solely on the principal amount of such debt as of December 31, 2017, and does not take into account any changes that occurred in the prior 12 months or that may take place in the next 12 months in the amount of our outstanding debt. Further, in this sensitivity analysis the change in interest rates is assumed to be applicable for an entire year. For comparison purposes, based on principal amounts of floating rate debt outstanding as of December 31, 2016, and calculated in the same manner as set forth above, an increase of 100 basis points in the LIBOR rate would have increased our annual interest expense by approximately $1 million.

As of December 31, 2017, we had no outstanding interest rate swaps.

In September 2015, the Company entered into treasury lock hedges with a total notional amount of $1.0 billion, reducing the risk of changes in the benchmark index component of the 10-year treasury yield. The Company designated these derivatives as cash flow hedges. On October 13, 2015, in conjunction with the pricing of the $4.5 billion senior notes, the Company terminated these treasury lock contracts for a cash settlement payment of $16 million, which was recorded as a component of Other Comprehensive Earnings and will be reclassified as an adjustment to interest expense over the ten years during which the related interest payments that were hedged will be recognized in income.

Foreign Currency Risk

We are exposed to foreign currency risks that arise from normal business operations. These risks include the translation of local currency balances of foreign subsidiaries, transaction gains and losses associated with intercompany loans with foreign subsidiaries and transactions denominated in currencies other than a location's functional currency. We manage the exposure to these risks through a combination of normal operating activities and the use of foreign currency forward contracts and non-derivative investment hedges. Contracts are denominated in currencies of major industrial countries.

Our exposure to foreign currency exchange risks generally arises from our non-U.S. operations, to the extent they are conducted in local currency. Changes in foreign currency exchange rates affect translations of revenues denominated in currencies other than the U.S. Dollar. During the years ended December 31, 2017, 2016 and 2015, we generated approximately $1,821 million, $1,908 million and $1,350 million, respectively, in revenues denominated in currencies other than the U.S. Dollar. The major currencies to which our revenues are exposed are the Brazilian Real, the Euro, the British Pound Sterling and the Indian Rupee. A 10% move in average exchange rates for these currencies (assuming a simultaneous and immediate 10% change in all of such rates for the relevant period) would have resulted in the following increase or (decrease) in our reported revenues for the years ended December 31, 2017, 2016 and 2015 (in millions):

Currency	2017	2016	2015
Pound Sterling	$ 41	$ 44	$ 35
Euro	33	38	32
Real	39	34	27
Indian Rupee	14	12	10
Total increase or decrease	$ 127	$ 128	$ 104

While our results of operations have been impacted by the effects of currency fluctuations, our international operations' revenues and expenses are generally denominated in local currency, which reduces our economic exposure to foreign exchange risk in those jurisdictions.

Revenues included $16 million favorable and $100 million unfavorable and net earnings included $2 million favorable and $11 million unfavorable, respectively, of foreign currency impact during 2017 and 2016 resulting from changes in the U.S. Dollar during these years compared to the preceding year. In 2018, we expect minimal foreign currency impact on our earnings.

Our foreign exchange risk management policy permits the use of derivative instruments, such as forward contracts and options, to reduce volatility in our results of operations and/or cash flows resulting from foreign exchange rate fluctuations. We do not enter into foreign currency derivative instruments for trading purposes or to engage in speculative activity. We do periodically enter into foreign currency forward exchange contracts to hedge foreign currency exposure to intercompany loans. We did not have any of these derivatives as of December 31, 2017. The Company also utilizes non-derivative net investment hedges in order to reduce the volatility in the income statement caused by the changes in foreign currency exchange rates (see Note 13 of the Notes to Consolidated Financial Statements).

Exhibit 99.6

PART II

Item 8. Financial Statements and Supplementary Data

Note: The information contained in this Item has been updated to recast certain prior period consolidated financial information to reflect our retrospective application of the new revenue accounting standard ASU No. 2014-09 "Revenue from Contracts with Customers (Topic 606)" ("ASU 2014-09"). The resulting changes are as follows:

- *The Report of Independent Registered Public Accounting Firm has been updated as of May 9, 2018.*
- *The consolidated balance sheets as of December 31, 2017 and 2016, and statements of earnings, comprehensive earnings, equity, and cash flows for each of the years in the three-year period ended December 31, 2017 have been recast to reflect our retrospective application of ASU No. 2014-09.*
- *The following notes to the consolidated financial statements have been recast to reflect our retrospective application of ASU No. 2014-09: (2) Basis of Presentation- (e) Trade Receivables, (k) Deferred Contract Costs, (n) Revenue Recognition, and (s) Net Earnings per Share; (3) Changes in Accounting Policies; (4) Revenue Recognition; (5) Acquisitions; (8) Intangible Assets; (10) Deferred Contract Costs; (14) Income Taxes; (19) Related Party Transactions; and (21) Segment Information.*

This Item has not been updated for any other changes since the filing of the 2017 Annual Report on Form 10-K (“2017 Annual Report”) with the U.S. Securities and Exchange Commission ("SEC") on February 22, 2018. For developments since the filing of the 2017 Annual Report, refer to our Quarterly Report on Form 10-Q for the quarter ended March 31, 2018, and other filings by the Company with the SEC.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the stockholders and board of directors
Fidelity National Information Services, Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheets of Fidelity National Information Services, Inc. and subsidiaries (the “Company”) as of December 31, 2017 and 2016, the related consolidated statements of earnings, comprehensive earnings, equity, and cash flows for each of the years in the three-year period ended December 31, 2017, and the related notes (collectively, the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2017 and 2016, and the results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2017, in conformity with U.S. generally accepted accounting principles.

Change in Accounting Principles

As discussed in Note 3 to the consolidated financial statements, the Company has changed its method of accounting for revenue in response to the adoption of Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers*, and the consolidated financial statements have been retrospectively adjusted to reflect this adoption.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (“ PCAOB”) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ KPMG LLP

We have served as the Company's auditor since 2004.

Cash paid for interest	$ 354	$ 351	$ 142
Cash paid for income taxes	$ 545	$ 341	$ 355

The accompanying notes are an integral part of these consolidated financial statements.

Unless stated otherwise or the context otherwise requires, all references to "FIS," "we," the "Company" or the "registrant" are to Fidelity National Information Services, Inc., a Georgia corporation, and its subsidiaries.

(1) Basis of Presentation

FIS is a global leader in financial services technology with a focus on retail and institutional banking, payments, asset and wealth management, risk and compliance, consulting and outsourcing solutions.

On August 12, 2015, FIS and certain of its wholly owned subsidiaries entered into an Agreement and Plan of Merger with SunGard and SunGard Capital Corp. II (collectively "SunGard") pursuant to which, through a series of mergers, FIS acquired SunGard (collectively the "SunGard acquisition"). FIS completed the SunGard acquisition on November 30, 2015, and SunGard's results of operations and financial position are included in the Consolidated Financial Statements from and after the date of acquisition.

We report the results of our operations in three reporting segments: Integrated Financial Solutions ("IFS"), Global Financial Solutions ("GFS") and Corporate and Other (Note 21).

(2) Summary of Significant Accounting Policies

The following describes the significant accounting policies of the Company used in preparing the accompanying Consolidated Financial Statements.

(a) *Principles of Consolidation*

The Consolidated Financial Statements include the accounts of FIS, its wholly-owned subsidiaries and subsidiaries that are majority-owned. All significant intercompany profits, transactions and balances have been eliminated in consolidation.

(b) *Cash and Cash Equivalents*

The Company considers all cash on hand, money market funds and other highly liquid investments with original maturities of three months or less to be cash and cash equivalents. As part of the Company's payment processing business, the Company provides cash settlement services to financial institutions and state and local governments. These services involve the movement of funds between the various parties associated with automated teller machines ("ATM"), point-of-sale or electronic benefit transactions ("EBT") and this activity results in a balance due to the Company at the end of each business day that it recoups over the next few business days. The in-transit balances due to the Company are included in cash and cash equivalents. The carrying amounts reported in the Consolidated Balance Sheets for these instruments approximate their fair value. As of December 31, 2017, we had cash and cash equivalents of $665 million of which approximately $415 million is held by our foreign entities.

(c) *Fair Value Measurements*

Fair Value of Assets Acquired and Liabilities Assumed in Business Combinations

ASC Topic 805, *Business Combinations*, requires an acquirer to recognize, separately from goodwill, the identifiable assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree, and to measure these items generally at their acquisition date fair values. Goodwill is recorded as the residual amount by which the purchase price exceeds the fair value of the net assets acquired. Fair values are determined using the framework outlined below under *Fair Value Hierarchy* and the methodologies addressed in the individual subheadings. If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, we are required to report provisional amounts in the financial statements for the items for which the accounting is incomplete. Adjustments to provisional amounts initially recorded that are identified during the measurement period are recognized in the reporting period in which the adjustment amounts are determined. This includes any effect on earnings of changes in depreciation, amortization, or other income effects as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date. During the measurement period, we are also required to recognize additional assets or liabilities if new information is obtained

about facts and circumstances that existed as of the acquisition date that, if known, would have resulted in the recognition of those assets and liabilities as of that date. The measurement period ends the sooner of one year from the combination date or when we receive the information we were seeking about facts and circumstances that existed as of the acquisition date or learn that more information is not obtainable.

Fair Value of Financial Instruments

The carrying amounts reported in the Consolidated Balance Sheets for receivables and accounts payable approximate their fair values because of their immediate or short-term maturities. The fair value of the Company's long-term debt is estimated to be approximately $156 million and $183 million higher than the carrying value as of December 31, 2017 and 2016, respectively. These estimates are based on values of trades of our debt in close proximity to year end, which are considered Level 2-type measurements, as discussed below. These estimates are subjective in nature and involve uncertainties and significant judgment in the interpretation of current market data. Therefore, the values presented are not necessarily indicative of amounts the Company could realize or settle currently. The Company holds, or has held, certain derivative instruments, specifically interest rate swaps and foreign exchange forward contracts. Derivative instruments are valued using Level 2-type measurements.

Fair Value Hierarchy

The authoritative accounting literature defines fair value, establishes a framework for measuring fair value, and establishes a fair value hierarchy based on the quality of inputs used to measure fair value.

The fair value hierarchy includes three levels that are based on the priority of the inputs to the valuation technique. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). If the inputs used to measure the fair value fall within different levels of the hierarchy, the categorization is based on the lowest level input that is significant to the fair value measurement of the asset or liability. The three levels of the fair value hierarchy are described below:

Level 1. Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2. Inputs to the valuation methodology include:

- Quoted prices for similar assets or liabilities in active markets;
- Quoted prices for identical or similar assets or liabilities in inactive markets;
- Inputs other than quoted prices that are observable for the asset or liability;
- Inputs that are derived principally from or corroborated by observable market data by correlation or other means.

If the asset or liability has a specified (contractual) term, the Level 2 input must be observable for substantially the full term of the asset or liability.

Level 3. Inputs to the valuation methodology are unobservable and significant to the fair value measurement. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances.

Fair Value Measurements

Generally accepted accounting principles require that, subsequent to their initial recognition, certain assets be reviewed for impairment on a nonrecurring basis by comparison to their fair value. As more fully discussed in their respective subheadings below, this includes goodwill, long-lived assets, intangible assets, computer software and investments. There were no significant fair value measurement impairments for 2017, 2016 or 2015.

Contingent consideration liabilities recorded in connection with business acquisitions must also be adjusted for changes in fair value until settled.

(d) ***Derivative Financial Instruments***

The Company accounts for derivative financial instruments in accordance with Financial Accounting Standards Board Accounting Standards Codification ("FASB ASC") Topic 815, *Derivatives and Hedging*. During 2017, 2016 and 2015, the Company engaged in hedging activities relating to its variable rate debt through the use of interest rate swaps. The Company designates these interest rate swaps as cash flow hedges. The estimated fair values of the cash flow hedges are determined using Level 2 type measurements. They are recorded as an asset or liability of the Company and are included in the accompanying Consolidated Balance Sheets in prepaid expenses and other current assets, other non-current assets, accounts payable and accrued liabilities or other long-term liabilities, as appropriate, and as a component of accumulated other comprehensive earnings, net of deferred taxes. A portion of the amount included in accumulated other comprehensive earnings is recorded in interest expense as a yield adjustment as interest payments are made on the Company's Term and Revolving Loans (Note 12).

The Company's foreign exchange risk management policy permits the use of derivative instruments, such as forward contracts and options, to reduce volatility in the Company's results of operations and/or cash flows resulting from foreign exchange rate fluctuations. During 2017 and 2016, the Company entered into foreign currency forward exchange contracts to hedge foreign currency exposure to intercompany loans. As of December 31, 2017 and 2016, the notional amount of these derivatives was approximately $0 million and $143 million, respectively, and the fair value was nominal. These derivatives have not been designated as hedges for accounting purposes.

The Company also utilizes derivative and non-derivative net investment hedges in order to reduce the volatility in the income statement caused by the impact of changes in foreign currency exchange rates on the investment in foreign denominated operations. The change in fair value of the net investment hedges due to remeasurement of the effective portion, net of tax, is recorded in other comprehensive income (loss). The ineffective portion of these hedging instruments impacts net income when the ineffectiveness occurs.

We also have used currency forward contracts to manage our exposure to fluctuations in costs caused by variations in Indian Rupee ("INR") exchange rates, however, we terminated those contracts in 2017. These INR forward contracts were designated as cash flow hedges. The fair value of these currency forward contracts was determined using currency exchange market rates, obtained from reliable, independent, third party banks, at the balance sheet date. The fair value of forward contracts was subject to changes in currency exchange rates. The Company had no ineffectiveness related to its use of currency forward contracts in connection with INR cash flow hedges.

In September 2015, the Company entered into treasury lock hedges with a total notional amount of $1.0 billion, reducing the risk of changes in the benchmark index component of the 10-year treasury yield. The Company designated these derivatives as cash flow hedges. On October 13, 2015, in conjunction with the pricing of the $4.5 billion senior notes, the Company terminated these treasury lock contracts for a cash settlement payment of $16 million, which was recorded as a component of Other Comprehensive Earnings and will be reclassified as an adjustment to interest expense over the ten years during which the related interest payments that were hedged will be recognized in income.

(e) ***Trade Receivables***

A summary of trade receivables, net, as of December 31, 2017 and 2016 is as follows (in millions):

	2017	2016
Trade receivables	1,687	1,591
Allowance for doubtful accounts	(63)	(41)
Total trade receivables, net	$ 1,624	$ 1,550

When evaluating the adequacy of the allowance for doubtful accounts, the Company considers historical bad debts, customer creditworthiness, current economic trends, changes in customer payment terms and collection trends. Any change in the assumptions used may result in an additional allowance for doubtful accounts being recognized in the period in which the change occurs.

A summary roll forward of the allowance for doubtful accounts for 2017, 2016 and 2015 is as follows (in millions):

Allowance for doubtful accounts as of December 31, 2014	$	(16)
Bad debt expense		(10)
Write-offs, net of recoveries		10
Allowance for doubtful accounts as of December 31, 2015		(16)
Bad debt expense		(29)
Write-offs, net of recoveries		4
Allowance for doubtful accounts as of December 31, 2016		(41)
Bad debt expense		(26)
Write-offs, net of recoveries		4
Allowance for doubtful accounts as of December 31, 2017	$	(63)

(f) ***Settlement Deposits, Receivables and Payables***

We manage certain integrated electronic payment services and programs and wealth management processes for our clients that require us to hold and manage client cash balances used to fund their daily settlement activity. Settlement deposits represent funds we hold that were drawn from our clients to facilitate settlement activities. Settlement receivables represent amounts funded by us. Settlement payables consist of settlement deposits from clients, settlement payables to third parties and outstanding checks related to our settlement activities for which the right of offset does not exist or we do not intend to exercise our right of offset. Our accounting policy for such outstanding checks is to include them in settlement payables on the Consolidated Balance Sheets and operating cash flows on the Consolidated Statements of Cash Flows. The payment solution services that give rise to these settlement balances are separate and distinct from those settlement activities referred to under *(b) Cash and Cash Equivalents*, where the services we provide primarily facilitate the movement of funds.

(g) ***Goodwill***

Goodwill represents the excess of cost over the fair value of identifiable assets acquired and liabilities assumed in business combinations. FASB ASC Topic 350, *Intangibles — Goodwill and Other,* requires that goodwill and other intangible assets with indefinite useful lives not be amortized, but rather be tested for impairment annually, or more frequently if circumstances indicate potential impairment. The guidance allows an entity first to assess qualitatively whether it is more likely than not that a reporting unit's carrying amount exceeds its fair value, referred to as "step zero." If an entity concludes that it is more likely than not that a reporting unit's fair value is less than its carrying amount (that is, a likelihood of more than 50 percent), the "step one" quantitative assessment must be performed for that reporting unit. ASC Topic 350 provides examples of events and circumstances that should be considered in performing the "step zero" qualitative assessment, including macroeconomic conditions, industry and market considerations, cost factors, overall financial performance, events affecting a reporting unit or the entity as a whole and a sustained decrease in share price.

In applying the quantitative analysis, we determine the fair value of our reporting units based on a weighted average of multiple valuation techniques, principally a combination of an income approach and a market approach, which are Level 3 and Level 2 type measurements. The income approach calculates a value based upon the present value of estimated future cash flows, while the market approach uses earnings multiples of similarly situated guideline public companies. If the fair value of a reporting unit exceeds the carrying value of the reporting unit’s net assets, goodwill is not impaired and further testing is not required. We engaged independent specialists to perform valuations of our reporting units effective January 1, 2015 in conjunction with our re-segmentation. There was a substantial excess of fair value over carrying value for our reporting units in the 2015 independent valuations.

In conjunction with the organizational modifications in the first quarter of 2016, we reallocated goodwill associated with the reclassified businesses based on relative fair values as of January 1, 2016. We refreshed our step zero qualitative analysis identifying no indications of impairment for any of our reporting units.

The Company assesses goodwill for impairment on an annual basis during the fourth quarter using a September 30 measurement date unless circumstances require a more frequent measurement. For each of 2017, 2016, and 2015, we began

our assessment with the step zero qualitative analysis. In performing the step zero qualitative analysis for each year, examining those factors most likely to affect our valuations, we concluded that it remained more likely than not that the fair value of each of our reporting units continued to exceed their carrying amounts. Consequently, we did not perform a step one quantitative analysis specifically for the purpose of our annual impairment test in any year presented in these financial statements.

(h) ***Long-Lived Assets***

Long-lived assets and intangible assets with finite useful lives are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by comparison of the carrying amount of an asset to estimated undiscounted future cash flows expected to be generated by the asset, which are Level 3-type measurements. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized in the amount by which the carrying amount of the asset exceeds the fair value of the asset.

(i) ***Intangible Assets***

The Company has intangible assets that consist primarily of customer relationships and trademarks that are recorded in connection with acquisitions at their fair value based on the results of valuation analyses. Customer relationships are amortized over their estimated useful lives using an accelerated method that takes into consideration expected customer attrition rates up to a 10-year period. Intangible assets with finite lives (principally customer relationships and certain trademarks) are reviewed for impairment in accordance with FASB ASC Section 360-10-35, *Impairment or Disposal of Long-Lived Assets*, while certain trademarks determined to have indefinite lives are reviewed for impairment at least annually in accordance with FASB ASC Topic 350. Similar to the guidance for goodwill, ASC Topic 350 allows an organization to first perform a qualitative assessment of whether it is more likely than not that an asset has been impaired.

We engaged independent specialists to perform a valuation of our indefinite lived intangible assets in 2016 and 2015, using a form of income approach valuation known as the relief-from-royalty method, which is a Level 3-type measurement. For 2017, we began our assessment of indefinite lived intangibles with the step zero qualitative analysis because there was a substantial excess of fair value over carrying value for each of our indefinite-lived intangible assets based on the 2016 and 2015 independent valuations. Based upon the results of these assessments, there were no indications of impairment.

(j) ***Computer Software***

Computer software includes software acquired in business combinations, purchased software and capitalized software development costs. Software acquired in business combinations is generally valued using the relief-from-royalty method, a Level 3-type measurement. Purchased software is recorded at cost and amortized using the straight-line method over its estimated useful life and software acquired in business combinations is recorded at its fair value and amortized using straight-line or accelerated methods over its estimated useful life, ranging from five to 10 years.

The capitalization of software development costs is governed by FASB ASC Subtopic 985-20 if the software is to be sold, leased or otherwise marketed, or by FASB ASC Subtopic 350-40 if the software is for internal use. After the technological feasibility of the software has been established (for software to be marketed) or at the beginning of application development (for internal-use software), software development costs, which primarily include salaries and related payroll costs and costs of independent contractors incurred during development, are capitalized. Research and development costs incurred prior to the establishment of technological feasibility (for software to be marketed) or prior to application development (for internal-use software), are expensed as incurred. Software development costs are amortized on a product-by-product basis commencing on the date of general release (for software to be marketed) or the date placed in service (for internal-use software). Software development costs for software to be marketed are amortized using the greater of (1) the straight-line method over its estimated useful life, which ranges from three to 10 years, or (2) the ratio of current revenues to total anticipated revenues over its useful life.

(k) ***Deferred Contract Costs***

The Company incurs costs as a result of both the origination and fulfillment of our contracts with customers. Origination costs relate primarily to the payment of sales commissions that are directly related to sales transactions. Fulfillment costs include the cost of implementation services related to SaaS and other cloud-based arrangements when the implementation

service is not distinct from the ongoing service. When origination costs and fulfillment costs that will be used to satisfy future performance obligations are directly related to the execution of our contracts with customers, and the costs are recoverable under the contract, the costs are capitalized as a deferred contract cost.

Origination costs for contracts that contain a distinct software license recognized at a point in time are allocated between the license and all other performance obligations of the contract and amortized according to the pattern of performance for the respective obligations. Otherwise, origination costs are capitalized as a single asset for each contract and amortized using an appropriate single measure of performance considering all of the performance obligations in the contract. The Company amortizes origination costs over the expected benefit period to which the deferred contract cost relates. Origination costs related to initial contracts with a customer are amortized over the lesser of the useful life of the solution or the expected customer relationship period. Commissions paid on renewals are amortized over the renewal period. Capitalized fulfillment costs are amortized over the lesser of the useful life of the solution or the expected customer relationship period.

(l) ***Property and Equipment***

Property and equipment is recorded at cost, less accumulated depreciation and amortization. Depreciation and amortization are computed primarily using the straight-line method based on the estimated useful lives of the related assets: 30 years for buildings and three to seven years for furniture, fixtures and computer equipment. Leasehold improvements are amortized using the straight-line method over the lesser of the initial term of the applicable lease or the estimated useful lives of such assets.

(m) ***Income Taxes***

The Company recognizes deferred income tax assets and liabilities for temporary differences between the financial reporting basis and the tax basis of the Company’s assets and liabilities and expected benefits of using net operating loss and credit carryforwards. Deferred income tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The impact on deferred income taxes of changes in tax rates and laws, if any, is reflected in the Consolidated Financial Statements in the period enacted. A valuation allowance is established for any portion of a deferred income tax asset for which management believes it is more likely than not that the Company will not be able to realize the benefits of all or a portion of that deferred income tax asset.

(n) ***Revenue Recognition***

The Company generates revenues in a number of ways, including from the delivery of account or transaction based processing, professional services, software licensing, software as a service ("SaaS"), business process as a service ("BPaaS"), cloud revenue and software related services.

The Company enters into arrangements with customers to provide services, software and software-related services such as maintenance and implementation and training either individually or as part of an integrated offering of multiple services. At contract inception, the Company assesses the solutions and services promised in its contracts with customers and identifies a performance obligation for each promise to transfer to the customer a solution or service (or bundle of solutions or services) that is distinct - i.e., if a solution or service is separately identifiable from other items in the bundled package and if a customer can benefit from it on its own or with other resources that are readily available to the customer. To identify its performance obligations, the Company considers all of the solutions or services promised in the contract regardless of whether they are explicitly stated or are implied by customary business practices. The Company recognizes revenue when or as it satisfies a performance obligation by transferring control of a solution or service to a customer.

Revenue is measured based on the consideration that the Company expects to receive in a contract with a customer. The Company’s contracts with its customers frequently contain variable consideration. Variable consideration exists when the amount which the Company expects to receive in a contract is based on the occurrence or non-occurrence of future events, such as processing services performed under usage-based pricing arrangements or professional services billed on a time and materials basis. Variable consideration is also present in certain transactions in the form of discounts, credits, price concessions, penalties, and similar items. If the amount of a discount or rebate in a contract is fixed and not contingent, that discount or rebate is not variable consideration. The Company estimates variable consideration in its contracts primarily using the expected value method. In some contracts, the Company applies the most likely amount method by considering the single most likely

amount in a limited range of possible consideration amounts. The Company develops estimates of variable consideration on the basis of both historical information and current trends. Variable consideration included in the transaction price is constrained such that a significant revenue reversal is not probable.

Taxes collected from customers and remitted to governmental authorities are not included in revenue. Postage costs associated with print and mail services are accounted for as a fulfillment cost and are included in cost of revenues.

Technology or service components from third parties are frequently embedded in or combined with our applications or service offerings. We are often responsible for billing the client in these arrangements and transmitting the applicable fees to the third party. The Company determines whether it is responsible for providing the actual solution or service as a principal, or for arranging for the solution or service to be provided by the third party as an agent. Judgment is applied to determine whether we are the principal or the agent by evaluating whether the Company has control of the solution or service prior to it being transferred to the customer. The principal versus agent assessment is performed at the performance obligation level. Indicators that the Company considers in determining if it has control include whether the Company is primarily responsible for fulfilling the promise to provide the specified solution or service to the customer, the Company has inventory risk and the Company has discretion in establishing the price the customer ultimately pays for the solution or service. Depending upon the level of our contractual responsibilities and obligations for delivering solutions to end customers, we have arrangements where we are the principal and recognize the gross amount billed to the customer and other arrangements where we are the agent and recognize the net amount retained.

Once the Company has determined the transaction price, the total transaction price is allocated to each performance obligation in a manner depicting the amount of consideration to which the Company expects to be entitled in exchange for transferring the solution(s) or service(s) to the customer (the “allocation objective”). If the allocation objective is met at contractual prices, no allocations are made. Otherwise, the Company allocates the transaction price to each performance obligation identified in the contract on a relative standalone selling price basis, except when the criteria are met for allocating variable consideration or a discount to one or more, but not all, performance obligations in the contract. The Company allocates variable consideration to one or more, but not all performance obligations when the terms of the variable payment relate specifically to the Company’s efforts to satisfy the performance obligation (or transfer the distinct solution or service) and when such allocation is consistent with the allocation objective when considering all performance obligations in the contract. Determining whether the criteria for allocating variable consideration to one or more, but not all, performance obligations in the contract requires significant judgment and may affect the timing and amount of revenue recognized. The Company does not typically meet the requirements to allocate discounts to one or more, but not all, performance obligations in a contract.

In order to determine the standalone selling price of its promised solutions or services, the Company conducts a regular analysis to determine whether various solutions or services have an observable standalone selling price. If the Company does not have an observable standalone selling price for a particular solution or service, then standalone selling price for that particular solution or service is estimated using all information that is reasonably available and maximizing observable inputs with approaches including historical pricing, cost plus a margin, adjusted market assessment, and residual approach.

The following describes the nature of the Company’s primary types of revenues and the revenue recognition policies and significant payment terms as they pertain to the types of transactions the Company enters into with its customers.

Processing Services Revenues

Processing services are primarily comprised of data processing and application management, including our SaaS, BPaaS and cloud offerings. Revenues from processing services are typically volume- or activity-based depending on factors such as the number of accounts processed, transactions or trades processed, users, number of hours of services or computer resources used. The payment terms may include tiered pricing structures with the base tier representing a minimum monthly usage fee. Pricing within the tiers typically resets on a monthly basis and minimum monthly volumes are generally met or exceeded. Contract lengths for processing services typically span multiple years. Payment is generally due in advance or in arrears on a monthly or quarterly basis and may include fixed or variable payment amounts depending on the specific payment terms and activity in the period.

For processing services revenues, the nature of the Company’s promise to the customer is to stand ready to provide continuous access to the Company’s processing platforms and perform an unspecified quantity of outsourced and transaction-processing services for a specified term or terms. Accordingly, processing services are generally viewed as a stand-ready

performance obligation comprised of a series of distinct daily services. The Company typically satisfies its processing services performance obligations over time as the services are provided. A time-elapsed output method is used to measure progress because the Company's efforts are expended evenly throughout the period given the nature of the promise is a stand-ready service. The Company has evaluated its variable payment terms related to its processing services revenues accounted for as a series of distinct days of service and concluded that they generally meet the criteria for allocating variable consideration entirely to one or more, but not all, performance obligations in a contract. Accordingly, when the criteria are met, variable amounts based on the number and type of services performed during a period are allocated to and recognized on the day in which the Company performs the related services. Fixed fees for processing services are generally recognized ratably over the contract period.

Professional Services Revenues

Professional services revenues are comprised of implementation, conversion, and programming services associated with the Company's data processing and application management agreements, implementation or installation services related to licensed software, and other consulting services. A significant portion of our professional services revenues are derived from contracts for dedicated personnel resources who are often working full-time at a client site and under the client's direction. These revenues generally re-occur as contracts are renewed. Payment terms for professional services may be based on an upfront fixed fee, fixed upon the achievement of milestones, or on a time and materials basis.

In assessing whether implementation services provided on data processing, application management or software agreements are a distinct performance obligation, the Company considers whether the services are both capable of being distinct (i.e., can the customer benefit from the services alone or in combination with other resources that are readily available to the customer) and distinct within the context of the contract (i.e., separately identifiable from the other performance obligations in the contract). Implementation services and other professional services are typically considered distinct performance obligations. However, when these services involve significant customization or modification of an underlying solution or offering, or if the services are complex and not available from a third-party provider and must be completed prior to a customer having the ability to benefit from a solution or offering, then such services and the underlying solution or offering will be accounted for as a combined performance obligation.

The Company's professional services that are accounted for as distinct performance obligations and that are billed on a fixed fee basis are typically satisfied as services are rendered; thus, the Company uses a cost-based input method, such as cost-to-cost or efforts expended (labor hours), to provide a faithful depiction of the transfer of those services. For professional services that are distinct and billed on a time and materials basis, revenue is generally recognized using an output method that corresponds with the time and materials billed and delivered, which is reflective of the transfer of the services to the customer. Professional services that are not distinct from an associated solution or offering are recognized over the common measure of progress for the overall performance obligation (typically a time-elapsed output measure that corresponds to the period over which the solution or offering is made available to the customer).

License and Software Related Revenues

The Company's software licenses generally have significant stand-alone functionality to the customer upon delivery and are considered to be functional intellectual property ("IP"). Additionally, the nature of the Company's promise in granting these software licenses to a customer is typically to provide the customer a right to use the Company's intellectual property. The Company's software licenses are generally considered distinct performance obligations, and revenue allocated to the software license is typically recognized at a point in time upon delivery of the license.

In conjunction with software licenses, the Company commonly provides the customer with additional services such as maintenance as well as associated implementation and other professional services related to the software license. Payments for maintenance are typically due annually, quarterly, or monthly in advance. Maintenance is typically comprised of technical support and unspecified updates and upgrades. The Company generally satisfies these performance obligations evenly using a time-elapsed output method over the contract term given there is no discernible pattern of performance. When a software license contract also includes professional services that provide significant modification or customization of the software license, the Company combines the software license and professional services into a single performance obligation, and revenue for the combined performance obligation is recognized as the professional services are provided consistent with the methods described above for professional services revenues.

The Company has contracts where the licensed software is offered in conjunction with hosting services. The licensed software may be considered a separate performance obligation from the hosting services if the customer can take possession of the software during the contractual term without incurring a significant penalty and if it is feasible for the customer to run the software on its own infrastructure or hire a third party to host the software. If the licensed software and hosting services are separately identifiable, license revenues are recognized when the hosting services commence and it is within the customer's control to obtain a copy of the software, and hosting revenues are recognized using the time-elapsed output method as the service is provided. If the software license is not separately identifiable from the hosting service, then the related revenues for the combined performance obligation are recognized ratably over the hosting period.

Occasionally, the Company offers extended payment terms on its license transactions and evaluates whether any potential significant financing components exist. For certain of its business units, the Company will provide a software license through a rental model for customers who would prefer a periodic fee instead of a larger up-front payment. Revenue recognition under these arrangements follow the same recognition pattern as the arrangements outlined above; however, the customer generally pays for the software license and maintenance in monthly or quarterly installments as opposed to an upfront software license fee. Judgment is required to determine whether these arrangements contain a significant financing component. The Company evaluates whether there is a significant difference between the amount of promised consideration over the rental term and the cash selling price of the software license, and the overall impact of the time value of money on the transaction. Rental software license arrangements that include a significant financing component are adjusted for the time value of money at the Company’s incremental borrowing rate by recording a contract asset and interest income. The Company does not adjust the promised amount of consideration for the effects of the time value of money if it is expected, at contract inception, that the period between when the Company transfers a promised solution or service to a customer and when the customer pays for that solution or service will be one year or less.

Hardware and Other Revenues

Hardware and other miscellaneous revenues are generally recognized at a point in time upon delivery. The Company typically does not stock in inventory the hardware solutions sold but arranges for delivery of hardware from third-party suppliers. The Company determines whether hardware delivered from third-party suppliers should be recognized on a gross or net basis by evaluating whether the Company has control of the solution or service prior to it being transferred to the customer.

Material Rights

Some of the Company’s contracts with customers include options for the customer to acquire additional solutions or services in the future, including options to renew existing services. Options may represent a material right to acquire solutions or services if the discount is incremental to the range of discounts typically given for those solutions or services to that class of customer in that geographical area or market, and the customer would not have obtained the option without entering into the contract. If deemed to be a material right, the Company will account for the material right as a separate performance obligation and determine the standalone selling price based on directly observable prices when available. If the standalone selling price is not directly observable, then the Company estimates the standalone selling price to be equal to the discount that the customer would obtain by exercising the option, as adjusted for any discount that the customer would receive without exercising the option and for the likelihood that the option will be exercised.

(o) ***Cost of Revenue and Selling, General and Administrative Expenses***

Cost of revenue includes payroll, employee benefits, occupancy costs and other costs associated with personnel employed in customer service and service delivery roles, including program design and development and professional services. Cost of revenue also includes data processing costs, amortization of software, customer relationship intangible assets and depreciation on operating assets.

Selling, general and administrative expenses include payroll, employee benefits, occupancy and other costs associated with personnel employed in sales, marketing, human resources, finance, risk management and other administrative roles. Selling, general and administrative expenses also include depreciation on non-operating corporate assets, advertising costs and other marketing-related programs.

AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS - (Continued)

(p) ***Stock-Based Compensation Plans***

The Company accounts for stock-based compensation plans using the fair value method. Thus, compensation cost is measured based on the fair value of the award at the grant date and is recognized over the service period. Certain of our stock awards also contain performance conditions. In those circumstances, compensation cost is recognized over the service period when it is probable the outcome of that performance condition will be achieved. If the Company concludes at any point prior to completion of the requisite service period that it is not probable that the performance condition will be met, any previously recorded expense would be reversed.

(q) ***Foreign Currency Translation***

The functional currency for the foreign operations of the Company is either the U.S. Dollar or the local foreign currency. For foreign operations where the local currency is the functional currency, the translation into U.S. Dollars for consolidation is performed for balance sheet accounts using exchange rates in effect at the balance sheet date and for revenue and expense accounts using the average exchange rate during the period. The adjustments resulting from the translation are included in accumulated other comprehensive earnings (loss) in the Consolidated Statements of Equity and Consolidated Statements of Comprehensive Earnings and are excluded from net earnings.

Gains or losses resulting from foreign currency transactions are included in other income.

(r) ***Management Estimates***

The preparation of these Consolidated Financial Statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Consolidated Financial Statements and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

(s) ***Net Earnings per Share***

The basic weighted average shares and common stock equivalents for the years ended December 31, 2017, 2016 and 2015 are computed using the treasury stock method.

Net earnings and earnings per share for the years ended December 31, 2017, 2016 and 2015 are as follows (in millions, except per share data):

	Year ended December 31,		
	2017	2016	2015
Earnings from continuing operations attributable to FIS, net of tax	$ 1,261	$ 524	$ 631
Earnings (loss) from discontinued operations attributable to FIS, net of tax	—	1	(7)
Net earnings attributable to FIS common stockholders	$ 1,261	$ 525	$ 624
Weighted average shares outstanding — basic	330	326	285
Plus: Common stock equivalent shares	6	4	4
Weighted average shares outstanding — diluted	336	330	289
Net earnings per share — basic from continuing operations attributable to FIS common stockholders	$ 3.82	$ 1.61	$ 2.21
Net earnings (loss) per share — basic from discontinued operations attributable to FIS common stockholders	—	—	(0.03)
Net earnings per share — basic attributable to FIS common stockholders *	$ 3.82	$ 1.61	$ 2.19
Net earnings per share — diluted from continuing operations attributable to FIS common stockholders	$ 3.75	$ 1.59	$ 2.18
Net earnings (loss) per share — diluted from discontinued operations attributable to FIS common stockholders	—	—	(0.03)
Net earnings per share — diluted attributable to FIS common stockholders *	$ 3.75	$ 1.59	$ 2.16

* Amounts may not sum due to rounding.

Options to purchase approximately 4 million, 3 million and 4 million shares of our common stock for the years ended December 31, 2017, 2016 and 2015, respectively, were not included in the computation of diluted earnings per share because they were anti-dilutive.

(t) *Certain Reclassifications*

Certain reclassifications have been made in the 2016 and 2015 Consolidated Financial Statements to conform to the classifications used in 2017.

(3) Changes in Accounting Policies

The Company adopted Topic 606, *Revenue from Contracts with Customers,* with a date of initial application of January 1, 2018. As a result, the Company has changed its accounting policy for revenue recognition. As a result of the adoption of Topic 606, these Consolidated Financial Statements and certain disclosures herein have been retrospectively recast. The details of the significant changes and quantitative impact of the changes are disclosed below.

The Company applied Topic 606 retrospectively using certain practical expedients in paragraph 606-10-65-1(f). For completed contracts that have variable consideration, the Company uses the transaction price at the date the contract was completed rather than estimating variable consideration amounts in the comparative reporting periods. Further, the Company does not disclose the amount of consideration allocated to the remaining performance obligations or an explanation of when the Company expects to recognize that amount as revenue for the 2016 and 2015 reporting periods presented before the date of the initial application. Lastly, the Company did not retrospectively restate contracts modified before the beginning of the earliest reporting period presented but reflects the aggregate effect of all modifications that occurred before the beginning of the earliest period presented.

Principal vs. Agent Considerations

In customer transactions that also involve third parties, the Company determines whether it is responsible for providing the ultimate solution or service as a principal, or whether it is merely arranging for the solution or service to be provided by the third party as an agent. When the Company is acting as a principal in a transaction, the Company recognizes the gross amounts billed as revenue. When the Company is acting as an agent in a transaction, the Company recognizes the net amount retained as revenue. Previously, the Company followed the guidance of Topic 605, which lists eight specific indicators that are determinative in evaluating whether a contract is recorded on a gross or a net basis. Under Topic 606, the determination is based on whether an entity obtains control of goods or services prior to transfer to a customer. The Company determined interchange and third-party network fees associated with certain parts of the payment processing business were significantly impacted by the adoption of Topic 606. Previously, gross accounting applied to certain types of these transactions, depending on the specific facts and circumstances. However, under Topic 606 revenues from these arrangements will be presented on a net basis because the Company has concluded that it is acting as an agent in the transaction.

Software License Rentals

The Company previously recognized revenue for initial license fees only when a contract existed, the fee was fixed or determinable, software delivery had occurred, collection was deemed probable, and vendor specific objective evidence of fair value had been established for any undelivered elements in the arrangement. If those criteria were not met, the initial license revenue was either deferred or recognized over time depending on the specific facts and circumstances. Software license rentals typically include payments that are delayed for a period of time, causing the Company to conclude that some portion of the license fee was not fixed or determinable. In these arrangements, license revenue would be deferred until payments become due and payable. Under Topic 606, the Company’s software licenses are generally considered distinct performance obligations, and revenue allocated to the software license is typically recognized at a point in time upon delivery of the license. Software license revenue is also typically recognized at a point in time upon delivery of the license under Topic 606 even if it is sold in a rental model or with extended payment terms, provided collectability is probable. Accordingly, a larger portion of software license revenue is recognized upfront for such transactions under Topic 606 than under Topic 605.

Term License Early Renewals

The Company previously recognized revenue for term software license renewals upon execution of a license renewal contract, provided all other revenue recognition requirements were met. Under Topic 606, revenue attributable to software term license renewals is now recognized at a later date than it would have been recognized under the previous accounting policy.

Impacts on Financial Statements

The following tables summarize the impacts of Topic 606 adoption on the Company's consolidated financial statements.

Consolidated Balance Sheet as of December 31, 2017:

	As Previously Reported	Adjustments	As Adjusted
ASSETS			
Current assets:			
Cash and cash equivalents	$ 665	$ —	$ 665

Contract Balances

The following table provides information about trade receivables, contract assets, and deferred revenues from contracts with customers (in millions).

	As Adjusted	
	As of December 31,	
	2017	2016
Trade receivables	$ 1,624	$ 1,550
Contract assets (current)	108	168
Contract assets (non-current), included in other noncurrent assets	118	135
Deferred revenue (current)	776	741
Deferred revenue (non-current)	106	58

The payment terms and conditions in our customer contracts may vary. In some cases, customers pay in advance of our delivery of solutions or services; in other cases, payment is due as services are performed or in arrears following the delivery of the solutions or services. Differences in timing between revenue recognition and invoicing result in accrued trade receivables, contract assets, or deferred revenue on our Consolidated Balance Sheet. Receivables are accrued when revenue is recognized prior to invoicing but the right to payment is unconditional (i.e., only the passage of time is required). This occurs most commonly when software term licenses recognized at a point in time are paid for periodically over the license term. Contract assets result when amounts allocated to distinct performance obligations are recognized when or as control of a solution or service is transferred to the customer but invoicing is contingent on performance of other performance obligations or on completion of contractual milestones. Contract assets are transferred to receivables when the rights become unconditional, typically upon invoicing of the related performance obligations in the contract or upon achieving the requisite project milestone. Deferred revenue results from customer payments in advance of our satisfaction of the associated performance obligation(s) and relates primarily to prepaid maintenance or other recurring services. Deferred revenues are relieved as revenue is recognized. Contract assets and deferred revenues are reported on a contract-by-contract basis at the end of each reporting period. Changes in the contract asset and deferred revenue balances during the years ended December 31, 2017, 2016, and 2015 were not materially impacted by any factors other than those described above, aside from the disposition of the public sector and education businesses, which reduced the December 31, 2017 contract asset balance by $2 million and the deferred revenue balance by $105 million.

During the years ended December 31, 2017, 2016, and 2015, the Company recognized revenue of $741 million, $718 million and $297 million, respectively, that was included in the corresponding deferred revenue balance at the beginning of the periods.

During the years ended December 31, 2017, 2016, and 2015, respectively, amounts recognized from performance obligations satisfied (or partially satisfied) in prior periods were insignificant.

Transaction Price Allocated to the Remaining Performance Obligations

As of December 31, 2017, approximately $19.5 billion of revenue is estimated to be recognized in the future from the Company’s remaining unfulfilled performance obligations, which are primarily comprised of recurring account- and volume-based processing services. This excludes the amount of anticipated recurring renewals not yet contractually obligated. The Company expects to recognize approximately 35% of our remaining performance obligations over the next 12 months, approximately another 25% over the next 13 to 24 months, and the balance thereafter.

(5) Acquisitions

SunGard

FIS completed the SunGard acquisition on November 30, 2015, and SunGard's results of operations and financial position are included in the Consolidated Financial Statements from and after the date of acquisition. The SunGard acquisition increased our existing portfolio of solutions to automate a wide range of complex business processes for financial services institutions and corporate and government treasury departments, adding trading, securities operations, administering investment portfolios, accounting for investment assets, and managing risk and compliance requirements.

Through a series of mergers, FIS acquired 100 percent of the equity of SunGard, for a total purchase price as follows (in millions):

Cash consideration, including SunGard transaction fees paid at closing	$	2,335
Value of stock and vested equity awards exchanged for FIS shares		2,697
Value of vested portion of SunGard stock awards exchanged for FIS awards		47
	$	5,079

As of December 31, 2015, we recorded a preliminary allocation of the purchase price to SunGard tangible and identifiable intangible assets acquired and liabilities assumed based on their estimated fair values as of November 30, 2015. The provisional amounts for intangible assets were based on independent third-party valuations performed. Land and building valuations were based on appraisals performed by certified property appraisers. Goodwill was recorded as the residual amount by which the purchase price exceeded the provisional fair value of the net assets acquired. Land and building valuations based on appraisals performed by certified property appraisers were underway as of December 31, 2015 and were completed during 2016. Our evaluations of the facts and circumstances available as of November 30, 2015 to assign fair values to other assets acquired and liabilities assumed was completed as of December 31, 2016, as are our assessments of the economic characteristics of the acquired software and other intangibles.

In accordance with ASU 2015-16, *Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments*, the financial statements were not retrospectively adjusted for any measurement-period adjustments that occurred in subsequent periods. Rather, any adjustments to provisional amounts that were identified during the measurement period are recorded in the reporting period in which the adjustment was determined. During the year ended December 31, 2016, adjustments were recorded to increase the fair values assigned to intangible assets, deferred taxes, other liabilities and property and equipment and to reduce the value assigned to goodwill. We are also required to record, in the same period’s financial statements in which adjustments are recorded, the effect on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of any change to the provisional amounts, calculated as if the accounting adjustment had been completed at the acquisition date. Additional depreciation and amortization of $5 million that would have been recognized in 2015 was recorded during the year ended December 31, 2016 related to the changes in provisional values of intangible assets made during 2016.

The purchase price allocation as adjusted for measurement period adjustments recorded through December 31, 2016 is as follows (in millions):

Cash	$	631
Trade receivables		526
Other receivables		57
Property and equipment		145
Computer software		674
Intangible assets		4,560
Other assets		67
Goodwill		5,800
Liabilities assumed and noncontrolling interest		(7,381)
	$	5,079

The following table summarizes the liabilities assumed in the SunGard acquisition (in millions):

Long-term debt (subsequently retired)	$	4,738
Deferred income taxes		1,772
Deferred revenue		278
Other liabilities and noncontrolling interest		593
	$	7,381

The gross contractual amount of trade receivables acquired was approximately $546 million. The difference between that total and the amount reflected above represents our best estimate at the acquisition date of the contractual cash flows not expected to be collected. This difference was derived using SunGard's historical bad debts, sales allowances and collection trends.

In connection with the SunGard acquisition, we also granted approximately 2 million restricted stock units in replacement of similar outstanding unvested awards held by SunGard employees. The amounts attributable to services already rendered were included as an adjustment to the purchase price and the amounts attributable to future services will be expensed over the remaining vesting period based on a valuation as of the date of closing.

(6) Property and Equipment

Property and equipment as of December 31, 2017 and 2016 consists of the following (in millions):

		2017		2016
Land	$	31	$	31
Buildings		228		204
Leasehold improvements		158		137
Computer equipment		1,073		909
Furniture, fixtures, and other equipment		167		207
		1,657		1,488
Accumulated depreciation and amortization		(1,047)		(862)
	$	610	$	626

During the years ended December 31, 2017 and 2016, the Company entered into capital lease and other financing obligations of $84 million and $43 million, respectively, for certain computer hardware and software. The assets are included in property and equipment and computer software and the remaining capital lease obligation is classified as long-term debt on

our Consolidated Balance Sheets as of December 31, 2017. Periodic payments are included in repayment of borrowings on the Consolidated Statements of Cash Flows.

Depreciation and amortization expense on property and equipment, including that recorded under capital leases, amounted to $180 million, $185 million and $139 million for the years ended December 31, 2017, 2016 and 2015, respectively.

(7) Goodwill

Changes in goodwill during the years ended December 31, 2017 and 2016 are summarized as follows (in millions):

	IFS	GFS	Corporate & Other	Total
Balance, December 31, 2015	$ 7,676	$ 6,605	$ 464	$ 14,745
Purchase price and foreign currency adjustments	—	(273)	65	(208)
Goodwill relating to PS&E included in assets held for sale	—	—	(359)	(359)
Balance, December 31, 2016	7,676	6,332	170	14,178
Purchase price and foreign currency adjustments	—	39	—	39
Goodwill distributed through sale of businesses	(14)	(473)	—	(487)
Balance, December 31, 2017	$ 7,662	$ 5,898	$ 170	$ 13,730

During 2017, foreign currency adjustments includes an immaterial prior period adjustment related to the allocation of goodwill to the appropriate foreign currency at the time of multi-currency entity acquisitions, with the related offset to accumulated other comprehensive earnings (loss).

In conjunction with the organizational modifications in the first quarter of 2016, we reallocated goodwill associated with the reclassified businesses based on relative fair value as of January 1, 2016. We refreshed our step zero qualitative analysis, identifying no indications of impairment for any of our reporting units. In performing the step zero qualitative analysis for 2016 and 2017, examining those factors most likely to affect our valuations, we concluded that it remained more likely than not that the fair value of each of our reporting units continued to exceed their carrying amounts. As a result, no reporting units were at risk of impairment as of the September 30, 2016 and 2017 measurement dates (see Note 2 (g)).

(8) Intangible Assets

Customer relationships and other intangible assets are obtained as part of acquired businesses and are amortized over their estimated useful lives, generally five to 10 years, using accelerated methods. Trademarks determined to have indefinite lives are not amortized. Certain other trademarks are amortized over periods ranging up to 15 years. As of December 31, 2017 and 2016, trademarks carried at $48 million and $80 million, respectively, were classified as indefinite-lived.

Intangible assets as of December 31, 2017 consist of the following (in millions):

	Cost	Accumulated Amortization	Net
Customer relationships and other	$ 6,220	$ (2,427)	$ 3,793
Trademarks	149	(57)	92
	$ 6,369	$ (2,484)	$ 3,885

Intangible assets as of December 31, 2016 consist of the following (in millions):

	Cost	Accumulated Amortization	Net
Customer relationships and other	$ 6,288	$ (1,835)	$ 4,453
Trademarks	180	(43)	137
	$ 6,468	$ (1,878)	$ 4,590

Amortization expense for intangible assets with finite lives, including the contract intangible in our Brazilian Venture, which is amortized as a reduction of revenue, was $670 million, $518 million and $245 million for the years ended December 31, 2017, 2016 and 2015, respectively.

Estimated amortization of intangibles, including the contract intangible in our Brazilian Venture, which is amortized as a reduction in revenue, for the next five years is as follows (in millions):

2018	$	666
2019		655
2020		478
2021		447
2022		429

(9) Computer Software

Computer software as of December 31, 2017 and 2016 consists of the following (in millions):

	2017	2016
Software from business acquisitions	$ 1,130	$ 1,138
Capitalized software development costs	1,422	1,066
Purchased software	310	172
Computer software	2,862	2,376
Accumulated amortization	(1,134)	(768)
Computer software, net of accumulated amortization	$ 1,728	$ 1,608

Amortization expense for computer software was $436 million, $396 million and $229 million for the years ended December 31, 2017, 2016 and 2015, respectively.

(10) Deferred Contract Costs

Origination and fulfillment costs from contracts with customers capitalized as of December 31, 2017 and 2016 consisted of the following (in millions):

	2017	2016
Installations and conversions in progress	104	87
Incremental contract origination costs completed, net	127	96
Costs to fulfill a contract, net	123	117
Total deferred contract costs, net	$ 354	$ 300

For the years ended December 31, 2017, 2016 and 2015, amortization of deferred contract costs was $102 million, $71 million and $58 million, respectively, and there were no impairment losses in relation to the costs capitalized for periods presented.

(11) Accounts Payable and Accrued Liabilities

Accounts payable and accrued liabilities as of December 31, 2017 and 2016 consists of the following (in millions):

	2017	2016
Salaries and incentives	$ 265	$ 379
Accrued benefits and payroll taxes	71	98
Trade accounts payable and other accrued liabilities	776	512
Accrued interest payable	70	89
Taxes other than income tax	59	62
Capco acquisition related liabilities	—	6
Total accounts payable and accrued liabilities	$ 1,241	$ 1,146

(12) Long-Term Debt

Long-term debt as of December 31, 2017 and 2016 consisted of the following (in millions):

	2017	2016
2018 Term Loans (1)	$ —	$ 550
Senior Notes due June 2017, interest payable semi-annually at 1.450%	—	300
Senior Notes due April 2018, interest payable semi-annually at 2.000%	250	250
Senior Notes due October 2018, interest payable semi-annually at 2.850%	750	750
Senior Notes due October 2020, interest payable semi-annually at 3.625%	1,150	1,750
Senior Euro Notes due January 2021, interest payable annually at 0.400%	599	—
Senior Notes due August 2021, interest payable semi-annually at 2.250%	750	750
Senior Notes due March 2022, interest payable semi-annually at 5.000%	—	700
Senior GBP Notes due June 2022, interest payable annually at 1.700%	405	—
Senior Notes due October 2022, interest payable semi-annually at 4.500%	300	500
Senior Notes due April 2023, interest payable semi-annually at 3.500%	700	1,000
Senior Notes due June 2024, interest payable semi-annually at 3.875%	400	700
Senior Euro Notes due July 2024, interest payable annually at 1.100%	599	—
Senior Notes due October 2025, interest payable semi-annually at 5.000%	900	1,500
Senior Notes due August 2026, interest payable semi-annually at 3.000%	1,250	1,250
Senior Notes due August 2046, interest payable semi-annually at 4.500%	500	500
Revolving Loan, (2)	195	36
Other	15	(58)
	8,763	10,478
Current portion	(1,045)	(332)
Long-term debt, excluding current portion	$ 7,718	$ 10,146

(1) Interest on the 2018 Term Loans was generally payable at LIBOR plus an applicable margin of up to 1.75% based upon the Company's corporate credit ratings. The outstanding balance on the 2018 Term Loans was repaid in full prior to December 31, 2017.

(2) Interest on the Revolving Loan is generally payable at LIBOR plus an applicable margin of up to 1.75% plus an unused commitment fee of up to 0.25%, each based upon the Company's corporate credit ratings. As of December 31, 2017, the weighted average interest rate on the Revolving Loan, excluding fees, was 2.64%.

FIS has a syndicated credit agreement (the “FIS Credit Agreement”) that provides total committed capital of $3,000 million in the form of a revolving credit facility (the "Revolving Loan") maturing on August 10, 2021. As of December 31,

2017, the outstanding principal balance of the Revolving Loan was $195 million, with $2,799 million of borrowing capacity remaining thereunder (net of $6 million in outstanding letters of credit issued under the Revolving Loan).

The obligations of FIS under the FIS Credit Agreement and under all of its outstanding senior notes rank equal in priority and are unsecured. The FIS Credit Agreement and the senior notes are subject to customary covenants, including, among others, limitations under the FIS Credit Agreement on the payment of dividends by FIS, and customary events of default.

On August 11, 2016, FIS issued $2,500 million of new senior notes, including $750 million of Senior Notes due in 2021 (the "2021 Notes") that bear interest at 2.250%, $1,250 million of Senior Notes due in 2026 (the "2026 Notes") that bear interest at 3.000% and $500 million of Senior Notes due in 2046 (the "2046 Notes") that bear interest at 4.500%. Net proceeds from the offering, after deducting discounts and underwriting fees, were $2,461 million. FIS used the proceeds to pay down the outstanding balance of its Revolving Loan and partially pay down the 2018 Term Loans.

On March 15, 2017, FIS redeemed 100% of the outstanding aggregate principal amount of its $700 million 5.000% Senior Notes due March 2022 (the "Notes"). On February 1, 2017, the Company also paid down the outstanding balance on the 2018 Term Loans. The Notes and 2018 Term Loans were funded by borrowings under the Company’s Revolving Loan and cash proceeds from the sale of the Public Sector and Education ("PS&E") business. As a result of the redemption of the Notes and the pay down of the 2018 Term Loans, FIS incurred a pre-tax charge of approximately $25 million consisting of the call premium on the Notes and the write-off of previously capitalized debt issuance costs.

On July 10, 2017, FIS issued €1,000 million and £300 million principal amount of new senior notes in an inaugural European bond offering. The new senior notes include €500 million of Senior Notes due in 2021 (the “2021 Euro Notes”) that bear interest at 0.400%, £300 million of Senior Notes due in 2022 (the “2022 GBP Notes”) that bear interest at 1.700% and €500 million of Senior Notes due in 2024 (the “2024 Euro Notes”) that bear interest at 1.100%. Net proceeds from the offering, after deducting discounts and underwriting fees, were $1,491 million using a conversion rate of 1.12 EUR/USD and 1.27 GBP/USD. The new senior notes include covenants and events of default customary for similar debt obligations.

On July 25, 2017, pursuant to cash tender offers ("Tender Offers"), FIS repurchased approximately $2,000 million in aggregate principal of debt securities with a weighted average coupon of approximately 4.0%. The following approximate amounts of FIS's debt securities were repurchased: $600 million of its 3.625% notes due 2020, $600 million of its 5.000% notes due 2025, $200 million of its 4.500% notes due 2022, $300 million of its 3.875% due 2024 and $300 million of its 3.500% notes due 2023. The Company funded the Tender Offers with proceeds from the European bond offering and borrowings on its Revolving Loan, approximately $469 million of which were almost immediately repaid with proceeds from the sale of a majority ownership stake in the Capco consulting business and risk and compliance consulting business, which was completed on July 31, 2017 (see Note 17). FIS paid approximately $150 million in tender premiums to par to purchase the notes in the Tender Offers.

During the year ended December 31, 2017, due to the issuance of the 2021 and 2024 Euro Notes and 2022 GBP Notes, FIS recorded approximately $13 million of deferred financing costs, which will be amortized into interest expense over the life of the notes. Also, as a result of the Tender Offers above, FIS incurred a pre-tax charge upon extinguishment of approximately $171 million, consisting of tender premiums, the write-off of previously capitalized debt issue costs and other direct costs.

During the year ended December 31, 2016, as a result of the pay down of the 2017 Term Loans and the partial pay down of the 2018 Term Loans, FIS incurred a pre-tax charge upon extinguishment of approximately $2 million due to the write-off associated with previously capitalized debt issue costs.

The following summarizes the aggregate maturities of our debt and capital leases on stated contractual maturities, excluding unamortized non-cash bond premiums and discounts net of $30 million as of December 31, 2017 (in millions):

	Total
2018	$ 1,045
2019	44
2020	1,157
2021	1,546
2022	705
Thereafter	4,349
Total principal payments	8,846
Debt issuance costs, net of accumulated amortization	(53)
Total long-term debt	$ 8,793

There are no mandatory principal payments on the Revolving Loan and any balance outstanding on the Revolving Loan will be due and payable at its scheduled maturity date, which occurs at August 10, 2021.

FIS may redeem the 2018 Notes, 2020 Notes, 2021 Notes, 2021 Euro Notes, 2022 Notes, 2022 GBP Notes, 2023 Notes, 2024 Notes, 2024 Euro Notes, 2025 Notes, 2026 Notes, and 2046 Notes at its option in whole or in part, at any time and from time to time, at a redemption price equal to the greater of 100% of the principal amount to be redeemed and a make-whole amount calculated as described in the related indenture in each case plus accrued and unpaid interest to, but excluding, the date of redemption, provided no make-whole amount will be paid for redemptions of the 2020 Notes, the 2021 Notes, the 2021 Euro Notes and the 2022 GBP Notes during the one month prior to their maturity, the 2022 Notes during the two months prior to their maturity, the 2023 Notes, the 2024 Notes, the 2024 Euro Notes, the 2025 Notes, and the 2026 Notes during the three months prior to their maturity, and the 2046 Notes during the six months prior to their maturity.

Debt issuance costs of $53 million, net of accumulated amortization, remain capitalized as of December 31, 2017, related to all of the above outstanding debt.

We monitor the financial stability of our counterparties on an ongoing basis. The lender commitments under the undrawn portions of the Revolving Loan are comprised of a diversified set of financial institutions, both domestic and international. The failure of any single lender to perform its obligations under the Revolving Loan would not adversely impact our ability to fund operations.

The fair value of the Company’s long-term debt is estimated to be approximately $156 million higher than the carrying value as of December 31, 2017. This estimate is based on quoted prices of our senior notes and trades of our other debt in close proximity to December 31, 2017, which are considered Level 2-type measurements. This estimate is subjective in nature and involves uncertainties and significant judgment in the interpretation of current market data. Therefore, the values presented are not necessarily indicative of amounts the Company could realize or settle currently.

(13) Financial Instruments

As of December 31, 2017, we had no outstanding interest rate swap transactions and no significant forward contracts.

Interest rate swaps with a notional amount totaling $500 million and $1,250 million, respectively, were terminated as of December 31, 2017 and 2016. As a result, FIS recognized approximately $1 million and $2 million, respectively, before tax loss due to the release of fair value changes from other comprehensive earnings during the years ended December 31, 2017 and 2016.

The amount of gain (loss) recognized in accumulated other comprehensive earnings was $0 million, $(7) million and $(17) million during the years ended December 31, 2017, 2016 and 2015, respectively. The amount of gain (loss) reclassified from

accumulated other comprehensive earnings into income was $(1) million, $(9) million and $(4) million during the years ended December 31, 2017, 2016 and 2015, respectively.

Net Investment Hedges

In June 2017, the Company entered into two Euro-denominated foreign currency exchange forward contracts totaling €999 million and a GBP-denominated foreign currency exchange forward contract of £298 million, which were designated as a net investment hedge of its investment in Euro and GBP denominated operations, respectively, in order to reduce the volatility in the income statement caused by the changes in foreign currency exchange rates of the Euro and GBP with respect to the U.S. dollar.

In July 2017, the forward contracts above were terminated and the Company designated its Euro-denominated Senior Notes due 2021 (€500 million) and Senior Notes due 2024 (€500 million) and GBP-denominated Senior Notes due 2022 (£300 million) as a net investment hedge of its investment in Euro and GBP denominated operations, respectively, in order to reduce the volatility in the income statement caused by the changes in foreign currency exchange rates of the Euro and GBP with respect to the U.S. dollar.

The change in fair value of the net investment hedges due to remeasurement of the effective portion is recorded in other comprehensive income (loss). The ineffective portion of the hedging instruments impacts net income when the ineffectiveness occurs. During the year ended December 31, 2017, net investment hedge combined losses of $63 million, net of tax, respectively, were recognized in other comprehensive income. No ineffectiveness was recorded on the net investment hedges.

(14) Income Taxes

Income tax expense (benefit) attributable to continuing operations for the years ended December 31, 2017, 2016 and 2015 consists of the following (in millions):

	2017	2016	2015
Current provision:			
Federal	$ 476	$ 308	$ 249
State	81	54	33
Foreign	127	131	52
Total current provision	$ 684	$ 493	$ 334
Deferred provision (benefit):			
Federal	$ (979)	$ (171)	$ 46
State	(24)	(14)	4
Foreign	(2)	(17)	(9)
Total deferred provision	(1,005)	(202)	41
Total provision for income taxes	$ (321)	$ 291	$ 375

The provision for income taxes is based on pre-tax income from continuing operations, which is as follows for the years ended December 31, 2017, 2016 and 2015 (in millions):

	2017	2016	2015
United States	$ 530	$ 503	$ 852
Foreign	446	334	173
Total	$ 976	$ 837	$ 1,025

Total income tax expense for the years ended December 31, 2017, 2016 and 2015 is allocated as follows (in millions):

	2017	2016	2015
Tax expense per statements of earnings	$ (321)	$ 291	$ 375
Tax expense attributable to discontinued operations	—	1	(2)
Unrealized (loss) gain on foreign currency translation	—	30	—
Other components of other comprehensive income	(11)	1	(5)
Total income tax expense (benefit) allocated to other comprehensive income	(11)	31	(5)
Tax benefit from exercise of stock options	—	(32)	(29)
Total income tax expense	$ (332)	$ 291	$ 339

A reconciliation of the federal statutory income tax rate to the Company's effective income tax rate for the years ended December 31, 2017, 2016 and 2015 is as follows:

	2017	2016	2015
Federal statutory income tax rate	35.0 %	35.0 %	35.0 %
State income taxes	2.4	2.9	4.6
Federal benefit of state taxes	(0.8)	(1.0)	(1.6)
Foreign rate differential	(5.1)	(3.1)	(2.6)
Tax Cuts and Jobs Act of 2017	(73.1)	—	—
Book basis in excess of tax basis for dispositions	18.5	—	—
Tax benefit from stock-based compensation	(6.7)	—	—
Other	(3.1)	1.0	1.2
Effective income tax rate	(32.9)%	34.8 %	36.6 %

The significant components of deferred income tax assets and liabilities as of December 31, 2017 and 2016 consist of the following (in millions):

	2017	2016
Deferred income tax assets:		
Net operating loss carryforwards	$ 130	$ 223
Employee benefit accruals	69	111
Other deferred tax assets	128	158
Total gross deferred income tax assets	327	492
Less valuation allowance	(129)	(177)
Total deferred income tax assets	198	315
Deferred income tax liabilities:		
Amortization of goodwill and intangible assets	1,452	2,436
Deferred contract costs	94	127
Other deferred tax liabilities	90	75
Total deferred income tax liabilities	1,636	2,638
Net deferred income tax liability	$ 1,438	$ 2,323

Deferred income taxes have been classified in the Consolidated Balance Sheets as of December 31, 2017 and 2016 as follows (in millions):

	2017	2016
Current assets	$ —	$ 101
Noncurrent assets (included in other noncurrent assets)	30	25
Total deferred income tax assets	30	126
Current liabilities (included in accounts payable and accrued liabilities)	—	(4)
Noncurrent liabilities	(1,468)	(2,445)
Total deferred income tax liabilities	(1,468)	(2,449)
Net deferred income tax liability	$ (1,438)	$ (2,323)

We believe that based on our historical pattern of taxable income, projections of future income, tax planning strategies and other relevant evidence, the Company will produce sufficient income in the future to realize its deferred income tax assets. A valuation allowance is established for any portion of a deferred income tax asset for which we believe it is more likely than not that the Company will not be able to realize the benefits of all or a portion of that deferred income tax asset. We also receive periodic assessments from taxing authorities challenging our positions that must be taken into consideration in determining our tax accruals. Resolving these assessments, which may or may not result in additional taxes due, may require an extended period of time. Adjustments to the valuation allowance will be made if there is a change in our assessment of the amount of deferred income tax asset that is realizable.

As of December 31, 2017 and 2016, the Company had income taxes (payable) receivable of $(141) million and $13 million, respectively. These amounts are included in accounts payable and accrued liabilities and other long-term liabilities as of December 31, 2017 and other receivables as of December 31, 2016, in the Consolidated Balance Sheets.

As of December 31, 2017 and 2016, the Company has federal, state and foreign net operating loss carryforwards resulting in deferred tax assets of $130 million and $223 million, respectively. The federal and state net operating losses result in deferred tax assets as of December 31, 2017 and 2016 of $44 million and $49 million, respectively, which expire between 2020 and 2037. The Company has a valuation allowance related to these deferred tax assets for net operating loss carryforwards in the amounts of $37 million and $34 million as of December 31, 2017 and 2016. The Company has foreign net operating loss carryforwards resulting in deferred tax assets as of December 31, 2017 and 2016 of $86 million and $174 million, respectively. The Company has a full valuation allowance against the net operating losses as of December 31, 2017 and a valuation allowance of $143 million as of December 31, 2016. As of December 31, 2017 and 2016, the Company had foreign tax credit carryforwards of $3 million and $1 million, respectively, which expire between 2020 and 2027.

The Company participates in the IRS' Compliance Assurance Process (CAP), which is a real-time continuous audit. The IRS has completed its review for years through 2015. Currently, we believe the ultimate resolution of the IRS examinations will not result in a material adverse effect to the Company's financial position or results of operations. Substantially all material foreign income tax return matters have been concluded through 2010. Substantially all state income tax returns have been concluded through 2011.

The Company provides for United States income taxes on earnings of foreign subsidiaries unless they are considered indefinitely reinvested outside the United States. As of December 31, 2016, neither U.S. income nor foreign income taxes had been provided on a cumulative total of $813 million of such earnings. As of December 31, 2017, the Company has a cumulative total of $930 million of earnings that are indefinitely reinvested outside of the United States. Due to changes introduced by the Tax Act, the Company provided for U.S. income tax on such earnings in 2017. As of December 31, 2017, the Company has not provided foreign income taxes on such earnings. At this time, a determination of the amount of unrecognized deferred tax liability is not practicable.

As of December 31, 2017 and 2016, the Company had gross unrecognized tax benefits of $75 million and $87 million of which $56 million and $67 million would favorably impact our income tax rate in the event that the unrecognized tax benefits are recognized.

The following table reconciles the gross amounts of unrecognized tax benefits at the beginning and end of the period (in millions):

	Gross Amount
Amounts of unrecognized tax benefits as of January 1, 2016	$ 98
Amount of decreases due to lapse of the applicable statute of limitations	(4)
Amount of decreases due to settlements	(23)
Increases as a result of tax positions taken in the current period	2
Increases as a result of tax positions taken in a prior period	14
Amount of unrecognized tax benefit as of December 31, 2016	87
Amount of decreases due to lapse of the applicable statute of limitations	(12)
Amount of decreases due to settlements	(19)
Increases as a result of tax positions taken in the current period	5
Increases as a result of tax positions taken in a prior period	14
Amount of unrecognized tax benefit as of December 31, 2017	$ 75

The total amount of interest expense recognized in the Consolidated Statements of Earnings for unpaid taxes is $5 million, $6 million and $2 million for the years ended December 31, 2017, 2016 and 2015, respectively. The total amount of interest and penalties included in the Consolidated Balance Sheets is $22 million and $25 million as of December 31, 2017 and 2016, respectively. Interest and penalties are recorded as a component of income tax expense in the Consolidated Statements of Earnings.

Due to the expiration of various statutes of limitation in the next twelve months, an estimated $3 million of gross unrecognized tax benefits may be recognized during that twelve-month period.

On December 22, 2017, H.R. 1, originally known as the Tax Cuts and Jobs Act, the "Act", was signed into law. The Act included significant changes to the Internal Revenue Code. Changes impacting the Company were the decrease in the corporate Federal rate from 35% to 21%, the transition to a territorial system of taxation from a worldwide system, and a one-time tax on the deemed repatriation of cumulative foreign earnings and profits. The Company has included in its December 31, 2017 tax provision its best estimate of the impact of the Act based on its understanding of the Act and the related guidance issued as of the date of this filing. The Company recorded a tax benefit of approximately $751 million related to re-measurement of its net deferred tax liabilities using the decreased federal rate, tax expense related to the one-time deemed repatriation tax of approximately $68 million, and a tax benefit of approximately $30 million related to the release of the tax liability for earnings previously not considered to be indefinitely reinvested. The Company also recorded a tax benefit of approximately $48 million related to foreign taxes which are now available to partially offset the deemed repatriation tax.

On December 22, 2017, the SEC issued SEC Staff Accounting Bulletin No. 118 (SAB 118) providing a measurement period for determining the final financial statement impacts from the Act. This guidance allows a registrant to report provisional amounts for the effects of the law change when accounting for the change can be reasonably estimated but the final accounting is not complete. Provisional items included in the December 31, 2017 financial statements are tax expense related to the one-time deemed repatriation tax of approximately $68 million, and a tax benefit of approximately $30 million related to the release of the US tax liability for earnings previously not considered to be indefinitely reinvested. These items are provisional because the data necessary for their computation is not yet fully available. Additional collection and review of data in determining cash and cash equivalents and applicable tax attributes necessary for the computation of these provisional items is required and will be compiled and evaluated within the measurement period allowed by SAB 118. As the provisional amounts are finalized during the measurement period, the required adjustments, if any, will be recorded in the quarter when the final amount is determined.

(15) Commitments and Contingencies

Reliance Trust Claims

Reliance Trust Company, the Company’s subsidiary, is named as a defendant in a class action arising out of its provision of services as the discretionary trustee for a 401(k) Plan for one of its customers. Plaintiffs in the action seek damages and

attorneys' fees, as well as equitable relief, for alleged breaches of fiduciary duty and prohibited transactions under the Employee Retirement Income Security Act of 1974. The action also makes claims against the Plan's sponsor and recordkeeper. Reliance Trust Company is vigorously defending the action and believes that it has meritorious defenses. While we believe that the ultimate resolution of the matter will not have a material impact on our financial condition, we are unable at this time to make an estimate of potential losses arising from the action because the matter is still in pretrial proceedings and involves unresolved questions of fact and law.

Brazilian Tax Authorities Claims

In 2004, Proservvi Empreendimentos e Servicos, Ltda., the predecessor to Fidelity National Servicos de Tratamento de Documentos e Informatica Ltda. ("Servicos"), a subsidiary of Fidelity National Participacoes Ltda., our former item processing and remittance services operation in Brazil, acquired certain assets and employees and leased certain facilities from the Transpev Group ("Transpev") in Brazil. Transpev's remaining assets were later acquired by Prosegur, an unrelated third party. When Transpev discontinued its operations after the asset sale to Prosegur, it had unpaid federal taxes and social contributions owing to the Brazilian tax authorities. The Brazilian tax authorities brought a claim against Transpev and beginning in 2012 brought claims against Prosegur and Servicos on the grounds that Prosegur and Servicos were successors in interest to Transpev. To date, the Brazilian tax authorities filed 11 claims against Servicos asserting potential tax liabilities of approximately $15 million. There are potentially 24 additional claims against Transpev/Prosegur for which Servicos is named as a co-defendant or may be named, but for which Servicos has not yet been served. These additional claims amount to approximately $56 million making the total potential exposure for all 35 claims approximately $71 million. We do not believe a liability for these 35 total claims is probable and, therefore, have not recorded a liability for any of these claims.

Acquired Contingencies (SunGard)

The Company became responsible for certain contingencies which were assumed in the SunGard acquisition. The Consolidated Balance Sheet as of December 31, 2017 includes a liability of $75 million mostly related to unclaimed property examinations and tax compliance matters.

Indemnifications and Warranties

The Company generally indemnifies its clients, subject to certain limitations and exceptions, against damages and costs resulting from claims of patent, copyright, or trademark infringement associated solely with its customers' use of the Company's software applications or services. Historically, the Company has not made any material payments under such indemnifications, but continues to monitor the conditions that are subject to the indemnifications to identify whether it is probable that a loss has occurred, and would recognize any such losses when they are estimable. In addition, the Company warrants to customers that its software operates substantially in accordance with the software specifications. Historically, no material costs have been incurred related to software warranties and no accruals for warranty costs have been made.

Leases

The Company leases certain of its property under leases which expire at various dates. Several of these agreements include escalation clauses and provide for purchases and renewal options for periods ranging from one to five years.

Future minimum operating lease payments for leases with remaining terms greater than one year for each of the years in the five years ending December 31, 2022, and thereafter, in the aggregate, are as follows (in millions):

2018	$	87
2019		79
2020		62
2021		46
2022		28
Thereafter		42
Total	$	344

In addition, the Company has operating lease commitments relating to office equipment and computer hardware with annual lease payments of approximately $3 million per year that renew on a short-term basis. See Note 6 for information on the Company's capital lease obligations.

Rent expense incurred under all operating leases during the years ended December 31, 2017, 2016 and 2015, was $134 million, $143 million and $93 million, respectively.

Data Processing, Maintenance and Other Service Agreements. The Company has agreements with various vendors, which expire between 2017 and 2023, principally for portions of its computer data processing operations and related functions. The Company’s estimated aggregate contractual obligation remaining under these agreements was approximately $420 million as of December 31, 2017. However, this amount could be more or less depending on various factors such as the inflation rate, foreign exchange rates, the introduction of significant new technologies, or changes in the Company’s data processing needs.

(16) Employee Benefit Plans

Stock Purchase Plan

FIS employees participate in an Employee Stock Purchase Plan (ESPP). Eligible employees may voluntarily purchase, at current market prices, shares of FIS’ common stock through payroll deductions. Pursuant to the ESPP, employees may contribute an amount between 3% and 15% of their base salary and certain commissions. Shares purchased are allocated to employees based upon their contributions. The Company contributes a matching amount as specified in the ESPP of 25% of the employee's contribution. The Company recorded expense of $14 million, $19 million and $26 million, respectively, for the years ended December 31, 2017, 2016 and 2015, relating to the participation of FIS employees in the ESPP.

401(k) Profit Sharing Plans

The Company’s U.S. employees are covered by a qualified 401(k) plan. Eligible employees may contribute up to 40% of their pretax annual compensation, up to the amount allowed pursuant to the Internal Revenue Code. The Company generally matches 50% of each dollar of employee contribution up to 6% of the employee’s total eligible compensation. The Company recorded expense of $80 million, $80 million and $38 million, respectively, for the years ended December 31, 2017, 2016 and 2015, relating to the participation of FIS employees in the 401(k) plan.

SunGard and its subsidiaries also maintained savings and other defined contribution plans in and outside of the U.S. The U.S. 401(k) plan was frozen with respect to new contributions effective with the SunGard acquisition and during 2016 was merged with the FIS plan, in which legacy SunGard employees now participate.

Stock Compensation Plans

In 2008, the Company adopted the FIS 2008 Omnibus Incentive Plan ("FIS Plan"). The FIS Plan was amended and restated in 2013 and combined with a plan assumed in conjunction with the 2009 Metavante acquisition ("FIS Restated Plan"). The restatement authorized an additional 6 million shares for issuances, which was approved by stockholders in 2013. In May 2015, another 12 million shares were authorized for issuance under the FIS Restated Plan and approved by stockholders. Restricted stock awards and options granted under the FIS Restated Plan for the years ended 2017, 2016, and 2015 are subject to time- and performance-based vesting criteria.

On November 30, 2015, in conjunction with the SunGard acquisition, the Company registered an additional 10 million shares, representing the remaining shares available for issuance under the SunGard 2005 Management Incentive Plan, as amended ("the SG Plan"), immediately prior to the consummation of the SunGard acquisition. These shares are now available for grant under the FIS Restated Plan for legacy SunGard employees and new FIS employees.

Also on November 30, 2015, in conjunction with the SunGard acquisition, the Company registered up to approximately 2 million shares of FIS common stock on a Post-Effective Amendment on Form S-8, reserved for issuance with respect to converted restricted stock units ("RSU's") under the SG Plan. This SG Plan will remain in existence until such time as these RSU's vest and the shares are exercised or the SG Plan is otherwise terminated.

A summary of the options granted (all of which vest over three years and are subject to performance-based vesting criteria), outstanding and shares available for grant under the FIS Restated Plan follows (in millions):

	FIS Restated Plan
Available for grant as of December 31, 2015	26
Granted in 2016	5
Outstanding as of December 31, 2016	17
Available for grant as of December 31, 2016	21
Granted in 2017	4
Outstanding as of December 31, 2017	15
Available for grant as of December 31, 2017	17

The following schedule summarizes the stock option activity for the years ended December 31, 2017, 2016 and 2015 (in millions except for per share amounts):

	Shares	Weighted Average Exercise Price
Balance, December 31, 2014	15	$ 41.56
Granted	3	65.91
Exercised	(2)	29.67
Cancelled	—	54.08
Balance, December 31, 2015	16	47.19
Granted	5	63.58
Exercised	(3)	36.15
Cancelled	(1)	62.25
Balance, December 31, 2016	17	53.21
Granted	4	80.05
Exercised	(5)	44.72
Cancelled	(1)	70.50
Balance, December 31, 2017	15	61.97

The intrinsic value of options exercised during the years ended December 31, 2017, 2016 and 2015 was $196 million, $103 million and $73 million, respectively. The Company generally issues shares from treasury stock for stock options exercised.

The following table summarizes information related to stock options outstanding and exercisable as of December 31, 2017:

	Outstanding Options				Exercisable Options			
Range of Exercise Price	Number of Options	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Intrinsic Value as of December 31, 2017 (a)	Number of Options	Weighted Average Remaining Contractual Life	Weighted Average Exercise Price	Intrinsic Value as of December 31, 2017 (a)
	(In millions)			(In millions)	(In millions)			(In millions)
$ 0.00 - $ 34.33	1	1.40	$ 30.05	$ 81	1	1.40	$ 30.05	$ 81
$ 34.34 - $ 48.75	2	2.76	48.75	100	2	2.76	48.75	100
$ 48.76 - $ 59.91	3	3.81	58.19	93	2	3.80	58.17	63
$ 59.92 - $ 62.92	3	5.21	62.92	94	1	5.22	62.92	30
$ 62.93 - $ 66.62	2	4.71	65.78	59	1	4.60	65.52	25
$ 66.63 - $ 93.36	4	6.14	80.03	53	—	3.87	79.41	1
$ 0.00 - $ 93.36	15	4.45	61.97	$ 480	7	3.35	51.99	$ 300

(a) Intrinsic value is based on a closing stock price as of December 31, 2017 of $94.09.

The weighted average fair value of options granted during the years ended December 31, 2017, 2016 and 2015 was estimated to be $12.78, $9.35 and $10.67, respectively, using the Black-Scholes option pricing model with the assumptions below:

	2017	2016	2015
Risk free interest rate	1.8%	1.2%	1.4%
Volatility	20.1%	20.4%	21.7%
Dividend yield	1.4%	1.6%	1.6%
Weighted average expected life (years)	4.2	4.2	4.2

The Company estimates future forfeitures at the time of grant and revises those estimates in subsequent periods if actual forfeitures differ from those estimates. The Company bases the risk-free interest rate that is used in the stock option valuation model on U.S. Treasury securities issued with maturities similar to the expected term of the options. The expected stock volatility factor is determined using historical daily price changes of the Company's common stock over the most recent period commensurate with the expected term of the option and the impact of any expected trends. The dividend yield assumption is based on the current dividend yield at the grant date or management's forecasted expectations. The expected life assumption is determined by calculating the average term from the Company's historical stock option activity and considering the impact of expected future trends.

The Company granted a total of 1 million restricted stock shares at prices ranging from $79.44 to $93.36 on various dates in 2017. The Company granted a total of 1 million restricted stock shares at prices ranging from $56.44 to $79.41 on various dates in 2016. The Company granted a total of 1 million restricted stock shares at prices ranging from $61.33 to $69.33 on various dates in 2015. These restricted stock shares were granted at the closing market price on the date of grant, vest annually over three years and are subject to performance-based vesting criteria. As of December 31, 2017 and 2016, we have approximately 2 million and 3 million unvested restricted shares remaining. The December 31, 2017 balance includes those RSU's converted in connection with the SunGard acquisition as noted above.

The Company has provided for total stock compensation expense of $107 million, $137 million and $98 million for the years ended December 31, 2017, 2016 and 2015, respectively, which is included in selling, general, and administrative expense in the Consolidated Statements of Earnings, unless the expense is attributable to a discontinued operation.

As of December 31, 2017 and 2016, the total unrecognized compensation cost related to non-vested stock awards is $111 million and $141 million, respectively, which is expected to be recognized in pre-tax income over a weighted average period of 1.5 years and 1.4 years, respectively.

German Pension Plans

Our German operations have unfunded, defined benefit plan obligations. These obligations relate to benefits to be paid to German employees upon retirement. The accumulated benefit obligation as of December 31, 2017 and 2016, was $57 million and $49 million, respectively, and the projected benefit obligation was $57 million and $50 million, respectively. The plan remains unfunded as of December 31, 2017.

(17) Divestitures and Discontinued Operations

On July 31, 2017, FIS closed on the sale of a majority ownership stake in its Capco consulting business and risk and compliance consulting business to Clayton, Dubilier & Rice L.P., by and through certain funds that it manages ("CD&R"), for cash proceeds of approximately $469 million, resulting in a pre-tax loss of approximately $41 million. The divestiture is consistent with our strategy to focus on our IP-led businesses. CD&R acquired preferred units convertible into 60% of the common units of the venture, Cardinal Holdings, L.P. ("Cardinal") and FIS obtained common units representing the remaining 40%, in each case before equity is issued to management. The preferred units are entitled to a quarterly dividend at an annual rate of 12%, payable in cash (if available) or additional preferred units at FIS' option. The businesses sold were included within the GFS and IFS segments. The sale did not meet the standard necessary to be reported as discontinued operations; therefore, the pre-tax loss and related prior period earnings remain reported within earnings from continuing operations. Prior to the sale, the Capco consulting business and risk and compliance consulting business' pre-tax earnings, excluding certain unallocated corporate costs, for the periods ended December 31, 2017, 2016 and 2015 were $14 million, $55 million, and $60 million, respectively.

FIS' 40% ownership in Cardinal was initially valued at $172 million and was recorded as an equity method investment included within other noncurrent assets on the Consolidated Balance Sheet. After the sale on July 31, 2017, FIS began to recognize the investment earnings in after-tax equity method investment earnings outside of operating income and segment Adjusted EBITDA. For periods prior to July 31, 2017, the Capco consulting business and risk and compliance consulting business were included within operating income and segment Adjusted EBITDA.

On February 1, 2017, the Company closed on the sale of the PS&E business for $850 million, resulting in a pre-tax gain of $85 million. The transaction included all PS&E solutions, which provided a comprehensive set of technology solutions to address public safety and public administration needs of government entities as well as the needs of K-12 school districts. The divestiture is consistent with our strategy to serve the financial services markets. Cash proceeds were used to reduce outstanding debt (Note 12). Net cash proceeds after payment of taxes and transaction-related expenses were approximately $500 million. The PS&E business was included in the Corporate and Other segment. The sale did not meet the standard necessary to be reported as discontinued operations; therefore, the gain and related prior period earnings remain reported within earnings from continuing operations. Prior to the sale, PS&E's pre-tax earnings, excluding certain unallocated corporate costs, for the periods ended December 31, 2017, 2016 and 2015 were $3 million, $42 million, and $6 million, respectively.

During the second quarter of 2015, we sold certain assets associated with our gaming industry check warranty business, resulting in a pre-tax gain of $139 million, which is included in Other income (expense), net. The sale did not meet the standard necessary to be reported as discontinued operations; therefore, the gain and related prior period earnings remain reported within earnings from continuing operations.

As described below, certain operations are reported as discontinued in the Consolidated Statements of Earnings for the years ended December 31, 2017, 2016 and 2015. The earnings (losses) of the businesses included in discontinued operations for the periods presented were as follows:

Earnings (loss) from discontinued operations net of tax:	**2017**	**2016**	**2015**
eCas business line	$ —	$ —	$ (4)
Participacoes operations	—	1	(3)
Total discontinued operations	$ —	$ 1	$ (7)

China eCas Business Line

During the second quarter of 2014, the Company committed to a plan to sell our business operation that provides eCas core banking software solutions to small financial institutions in China because it did not align with our strategic plans. We entered into a purchase agreement in January 2015 to sell this business and the transaction closed during the second quarter of 2015.

Brazil Item Processing and Remittance Services Operations

During the third quarter of 2010, the Company decided to pursue strategic alternatives for Fidelity National Participacoes Ltda. (“Participacoes”). Participacoes' processing volume was transitioned to other vendors or back to its clients during the second quarter of 2011. Participacoes had earnings (losses) before taxes of $0 million, $2 million and $(5) million during the years ended December 31, 2017, 2016 and 2015, respectively. The shut-down activities involved the transfer and termination of approximately 2,600 employees, which was completed in 2011. Former employees generally had up to two years from the date of terminations, extended through April 2013, to file labor claims and a number of them did file labor claims. As of December 31, 2017, there were approximately 320 active claims remaining. Consequently, we have continued exposure on these active claims, which were not transferred with other assets and liabilities in the disposal. Our accrued liability for active labor claims, net of $9 million in court ordered deposits, is $9 million as of December 31, 2017. Any changes in the estimated liability related to these labor claims will be recorded as discontinued operations.

(18) Components of Other Comprehensive Earnings

The following table shows accumulated other comprehensive earnings ("AOCE") attributable to FIS by component, net of tax, for the year ended December 31, 2017 (in millions):

	Interest Rate Swap Contracts	Foreign Currency Translation Adjustments	Other (1)	Total
Balances, December 31, 2016	$ 1	$ (314)	$ (18)	$ (331)
Other comprehensive gain/(loss) before reclassifications	(1)	25	(25)	(1)
Balances, December 31, 2017	$ —	$ (289)	$ (43)	$ (332)

(1) Includes the minimum pension liability adjustment and the cash settlement payment on treasury lock contracts associated with bridge financing for the SunGard acquisition. This amount will be amortized as an adjustment to interest expense over the ten years in which the related interest payments that were hedged are recognized in income.

The amount reclassified from AOCE for interest rate derivative contracts includes $1 million recorded as interest expense, reduced by a related $0 million provision for income taxes. See Note 14 for the tax provision associated with each component of other comprehensive income.

(19) Related Party Transactions

Cardinal Holdings

On July 31, 2017, FIS closed on the sale of a majority ownership stake in the Capco consulting business and risk and compliance consulting business to CD&R. CD&R acquired a 60% interest in the entity, Cardinal, and FIS obtained the remaining 40% interest, in each case before equity issued to management (Note 17). Cardinal became a related party effective July 31, 2017.

Upon closing on the sale of the Capco consulting business and risk and compliance consulting business, FIS and Cardinal entered into a short-term Transition Services Agreement ("TSA"), whereby FIS provides various agreed upon services to Cardinal**.** FIS also provides ongoing management consulting services and other services to Cardinal. Amounts transacted through these agreements were not significant to the 2017 periods presented.

Capco continues to provide Banco Bradesco S.A. ("Banco Bradesco") with consulting services. Capco revenue and related party receivables from Banco Bradesco through the July 31, 2017 closing is included below under Brazilian Venture revenue from Banco Bradesco.

Brazilian Venture

The Company operates a joint venture ("Brazilian Venture") with Banco Bradesco S.A. ("Banco Bradesco") in which we own a 51% controlling interest, to provide comprehensive, fully outsourced transaction processing, call center, cardholder support and collection services to multiple card issuing clients in Brazil, including Banco Bradesco. The original accounting for this transaction resulted in the establishment of a contract intangible asset and a liability for amounts payable to the original partner banks upon final migration of their respective card portfolios and achieving targeted volumes (the “Brazilian Venture Notes”). The unamortized contract intangible asset balance as of December 31, 2017 was $67 million. Upon the exit of one partner bank, certain terms of the Brazilian Venture were subsequently renegotiated between Banco Bradesco and FIS and were memorialized in an Amended Association Agreement in November 2010. Among other things, the payout for the Brazilian Venture Notes was extended over a ten-year period. Additional performance remuneration provisions upon the achievement of targeted account and transaction volumes were renegotiated, for which additional related party payables were recorded as of December 31, 2012, based on management's expectation that the targets will be met. The passage of time and the achievement of certain targets triggered payments to Banco Bradesco of $6 million and $6 million in 2017 and 2016, respectively. In addition, the board of directors for the Brazilian Venture declared a dividend during the years ended December 31, 2017 and 2016, resulting in payments of $23 million and $20 million respectively, to Banco Bradesco. The carrying value of the noncontrolling interest as of December 31, 2017 was $102 million.

The Company recorded revenues of $329 million, $272 million and $237 million during the years ended December 31, 2017, 2016 and 2015, respectively, from Banco Bradesco. Revenues included $24 million of favorable and $12 million of unfavorable currency impact during the years ended December 31, 2017 and 2016, respectively, resulting from foreign currency exchange rate fluctuations between the U.S. Dollar and Brazilian Real in 2017 as compared to 2016 and 2016 as compared to 2015.

The Brazilian Venture currently processes approximately 73 million cards for clients in Brazil and provides call center, cardholder support and collection services for their card portfolios.

A summary of the Company’s related party receivables and payables is as follows (in millions):

		December 31,	
Related Party	**Balance sheet location**	**2017**	**2016**
Banco Bradesco	Trade receivables	$ 47	$ 42
Banco Bradesco	Contract assets	5	2
Banco Bradesco	Accounts payable and accrued liabilities	10	10
Banco Bradesco	Other long-term liabilities	17	22

(20) Concentration of Risk

The Company generates a significant amount of revenues from large clients, however, no individual client accounted for 10% or more of total revenues in the years ended December 31, 2017, 2016 and 2015.

Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of cash equivalents and trade receivables.

The Company places its cash equivalents with high credit-quality financial institutions and, by policy, limits the amount of credit exposure with any one financial institution.

Concentrations of credit risk with respect to trade receivables are limited because a large number of geographically diverse clients make up the Company’s client base, thus spreading the trade receivables credit risk. The Company controls credit risk through monitoring procedures.

(21) Segment Information

In 2015, FIS finalized a reorganization and began reporting its financial performance based on three segments: Integrated Financial Solutions (“IFS”), Global Financial Solutions (“GFS”) and Corporate and Other. We recast all previous periods to conform to the new segment presentation. Following our November 30, 2015 acquisition of SunGard, the SunGard business was included within the GFS segment as its economic characteristics, international business model, and various other factors largely aligned with those of our GFS segment. As we further integrated the acquired SunGard businesses through March 31, 2016, we reclassified certain SunGard businesses (corporate liquidity and wealth and retirement) that are oriented more to the retail banking and payments activities of IFS into that segment. Certain other businesses from both SunGard (public sector and education businesses, which was divested on February 1, 2017), and legacy FIS (global commercial services and retail check processing) were reclassified to the Corporate and Other segment, as were SunGard administrative expenses.

Integrated Financial Solutions ("IFS")

The IFS segment is focused primarily on serving North American clients for transaction and account processing, payment solutions, channel solutions, lending and wealth and retirement solutions, corporate liquidity, digital channels, risk and compliance solutions, and services, capitalizing on the continuing trend to outsource these solutions. Clients in this segment include regional and community banks, credit unions and commercial lenders, as well as government institutions, merchants and other commercial organizations. IFS’ primary software applications function as the underlying infrastructure of a financial institution's processing environment. These applications include core bank processing software, which banks use to maintain the primary records of their customer accounts, and complementary applications and services that interact directly with the core processing applications. This market is primarily served through integrated solutions and characterized by multi-year processing contracts that generate highly recurring revenues. The predictable nature of cash flows generated from this segment provides opportunities for further investments in innovation, integration, information and security, and compliance in a cost-effective manner. The business solutions in this segment included the risk and compliance consulting business through its divestiture on July 31, 2017 (Note 17).

Global Financial Solutions ("GFS")

The GFS segment is focused on serving the largest global financial institutions and/or international financial institutions with a broad array of capital markets and asset management and insurance solutions, as well as banking and payments solutions.

GFS clients include the largest global financial institutions, including those headquartered in the United States, as well as all international financial institutions we serve as clients in more than 130 countries. These institutions face unique business and regulatory challenges and account for the majority of financial institution information technology spend globally. The purchasing patterns of GFS clients vary from those of IFS clients who typically purchase solutions on an outsourced basis. GFS clients purchase our solutions and services in various ways including licensing and managing technology “in-house”, fully outsourced end-to-end solutions, and using consulting and third-party service providers. We have long-established relationships with many of these financial institutions that generate significant recurring revenue. GFS clients also include asset managers, buy- and sell-side securities and trading firms, insurers and private equity firms. This segment also includes the Company's consolidated Brazilian Venture (see Note 19 of the Notes to Consolidated Financial Statements). The business solutions in this segment included the Capco consulting business through its divestiture on July 31, 2017 (Note 17).

Corporate and Other

The Corporate and Other segment consists of corporate overhead expense, certain leveraged functions and miscellaneous expenses that are not included in the operating segments, as well as certain non-strategic businesses. The business solutions in this segment included the PS&E business through its divestiture on February 1, 2017 (Note 17), commercial services and retail check processing. The overhead and leveraged costs relate to marketing, corporate finance and accounting, human resources, legal, and amortization of acquisition-related intangibles and other costs that are not considered when management evaluates revenue generating segment performance, such as acquisition, integration and severance costs. The Corporate and Other segment also includes the impact on revenue for 2017, 2016 and 2015 of adjusting SunGard's deferred revenue to fair value.

During 2017 and 2016 the Company recorded certain costs relating to integration and severance activity primarily from the SunGard acquisition of $178 million and $281 million, respectively. During 2015 the Company recorded transaction and other costs, including integration activity, related to SunGard and other recent acquisitions and other severance costs of $171 million and severance costs in connection with the reorganization and streamlining of operations in our GFS segment of $45 million.

Adjusted EBITDA

This measure is reported to the chief operating decision maker for purposes of making decisions about allocating resources to the segments and assessing their performance. For this reason, Adjusted EBITDA, as it relates to our segments, is presented in conformity with Accounting Standards Codification Topic 280, "Segment Reporting". Adjusted EBITDA is defined as EBITDA (defined as net income (loss) before net interest expense, income tax provision (benefit) and depreciation and amortization, including amortization of purchased intangibles), plus certain non-operating items. The non-operating items affecting the segment profit measure generally include acquisition accounting adjustments, acquisition, integration and severance costs, and restructuring expenses. For consolidated reporting purposes, these costs and adjustments are recorded in the Corporate and Other segment for the periods discussed below. Adjusted EBITDA for the respective segments excludes the foregoing costs and adjustments.

Summarized financial information for the Company’s segments is shown in the following tables reclassified to conform to the current segment presentation.

As of and for the year ended December 31, 2017 (in millions):

	IFS	GFS	Corporate and Other	Total
Revenues	$ 4,260	$ 4,050	$ 358	$ 8,668

EBITDA				$ 1,743
Interest expense, net				183
Depreciation and amortization from continuing operations				418
Purchase accounting amortization				238
Other income (expense) unallocated				121
Provision for income taxes				375
Net earnings (loss) from discontinued operations				(7)
Net earnings attributable to noncontrolling interest				19
Net earnings attributable to FIS common stockholders				$ 624
Capital expenditures (1)	$ 235	$ 168	$ 21	$ 424
Total assets	$ 10,007	$ 9,579	$ 6,598	$ 26,184
Goodwill	$ 7,676	$ 6,605	$ 464	$ 14,745

(1) Capital expenditures include $9 million of capital leases.

Total assets as of December 31, 2017, 2016 and 2015 exclude $2 million, $6 million and $1 million, respectively, related to discontinued operations.

Revenue generated from contracts executed outside of our North American operations represented approximately 27%, 29% and 24% of total revenue in 2017, 2016 and 2015, respectively. Clients in Brazil, the United Kingdom, Germany, India, France, Switzerland and Australia accounted for the majority of the revenues from clients based outside of North America for all periods presented. FIS conducts business in over 130 countries, with no individual country outside of North America accounting for more than 10% of total revenue for the years ended December 31, 2017, 2016 and 2015.

Long-term assets, excluding goodwill and other intangible assets, located outside of the United States totaled $559 million and $510 million as of December 31, 2017 and 2016, respectively. These assets are predominantly located in Brazil, India, Germany and the United Kingdom.

(22) Share Repurchase Program

Our Board of Directors has approved a series of plans authorizing repurchases of our common stock in the open market at prevailing market prices or in privately negotiated transactions, the most current of which on July 20, 2017, authorized repurchases of up to $4.0 billion through December 31, 2020. This share repurchase authorization replaced any existing share repurchase authorization plan. Approximately $3,895 million of plan capacity remained available for repurchases as of December 31, 2017.

The table below summarizes annual share repurchase activity under these plans (in millions, except per share amounts):

Year ended	Total number of shares purchased	Average price paid per share	Total cost of shares purchased as part of publicly announced plans or programs
December 31, 2017	1	$ 93.24	$ 105
December 31, 2016	—	$ —	$ —
December 31, 2015	5	$ 66.10	$ 300

There were no share repurchases in 2016.

During January and February 2018, we repurchased an additional 4 million shares of our common stock for $401 million at an average price of $97.70 per share.
